Footnotes:

- 1 The term 'area' is used to define the particular geographical area level being shown in the table. So, in the case of a table for a ward, this will mean the term 'area' translates to the name of the ward.*
- 2 Net migration within the UK (Inflow minus Outflow) subtracts the number of people who have moved out of the area, to elsewhere within the UK (Outflow) from the number of people who have moved into the area, from elsewhere within the UK (Inflow). It does not include people who have moved to or from outside the UK.*
- 3 People with no usual address last year are included within 'lived at same address, or moved from within same area'.*
- 4 Because of the nature of migration, tables cannot be aggregated above Output Area.*
- 5 One year ago is one year before Census day (29 April 2001).*
- 6 Inflow is not an exact count of people moving into an area as it does not include people who had no usual address one year ago who did not live within the area.*
- 7 Outflow is not a count of all people moving out of the area as it does not include people who have moved outside the UK.*

Footnotes:

1 The terms used to describe tenure are defined as:

Owned: either owned outright, owned with a mortgage or loan, or paying part rent and part mortgage (shared ownership).

Other social rented includes rented from Registered Social Landlord, Housing Association, Housing Co-operative and Charitable Trust.

'Rented from the Council' refers to Rented from Council (local authority)/Scottish Homes in Scotland and Northern Ireland Housing Executive in Northern Ireland.

Private rented: renting from a private landlord or letting agency, employer of a household member, or relative or friend of a household member or other person.

2 'Living rent free' could include households that are living in accommodation other than private rented.

3 Pensionable age at the time of the Census (29 April 2001) was 65 for men and 60 for women.

4 It is possible that form-fillers on housing benefit may have ticked 'living rent free' in response to the Census question on 'owns/rents'. Households recorded as living rent free are not analysed by type of landlord in this table. Users who wish to count these households by landlord and, possibly, make adjustments to this table can do so using tables UV91, UV92, T54 & T55.

Footnotes:

1 The terms used to describe tenure are defined as:

Owned: either owned outright, with a mortgage or loan, or paying part rent and part mortgage (shared ownership).

Social rented includes both 'Rented from Council' and 'rented from Registered Social Landlord or Housing Association.

'Rented from the Council' refers to Rented from Council (local authority)/Scottish Homes in Scotland and Northern Ireland Housing Executive in Northern Ireland.

'Living rent free' could include households that are living in accommodation other than private rented.

2 General health refers to health over the 12 months prior to Census day (29 April 2001).

3 It is possible that form-fillers on housing benefit may have ticked 'living rent free' in response to the Census question on 'owns/rents'. Households recorded as living rent free are not analysed by type of landlord in this table. Users who wish to count these households by landlord and, possibly, make adjustments to this table can do so using tables UV91, UV92, T54 & T55.

Footnotes:

- 1 The occupancy rating provides a measure of under-occupancy and overcrowding. For example a value of -1 implies that there is one room too few and that there is overcrowding in the household. It assumes that every household, including one person households, requires a minimum of two common rooms (excluding bathrooms).
- 2 General health refers to health over the 12 months prior to Census day (29 April 2001).
