### Footnotes:

1 The terms used to describe tenure are defined as:

*Owned: either owned outright, owned with a mortgage or loan, or paying part rent and part mortgage (shared ownership).*

*Other social rented includes rented from Registered Social Landlord, Housing Association, Housing Co-operative and Charitable Trust.*

*'Rented from the Council' refers to Rented from Council (local authority)/Scottish Homes in Scotland and Northern Ireland Housing Executive in Northern Ireland.*

*Private rented: renting from a private landlord or letting agency, employer of a household member, or relative or friend of a household member or other person.*

2 'Living rent free' could include households that are living in accommodation other than private rented.

3 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).

4 It is possible that form-fillers on housing benefit may have ticked 'living rent free' in response to the Census question on 'owns/rents'. Households recorded as living rent free are not analysed by type of landlord in this table. Users who wish to count these households by landlord and, possibly, make adjustments to this table can do so using tables UV91, UV92, T54 & T55.

**Footnote:**

1 Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade.

### Footnotes:

- 1 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full time student in a family with parent(s).
- 2 Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2001 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade.
- 3 In this table, people are classified by the Approximated Social Grade of their Household Reference Person.
