

Subject: Date of birth and death for individuals who died of E. Coli in 2016

FOI reference: FOI/17/02414

Date received: 18 October 2017

Date responded: 31 October 2017

Information requested:

DOB and DOD of everyone who died of E. Coli in 2016.

NRS Response:

The information requested is contained in the table below. This data includes all deaths registered in 2016 where the medical certificate of the cause of death included one or more of the following terms:

Escherichia coli;
E coli;
E-coli;
E. coli.

E. Coli will not have been the underlying cause of death in all of these cases. The medical certificate of the cause of death (MCCD) often contains several conditions which the certifying doctor believes are relevant to the death but which are not the underlying cause of death. It is not possible, from the information held, to identify deaths where E. Coli was the underlying cause.
