

Figure 4.4 Life Expectancy at birth, 95 per cent confidence intervals¹ for Urban and Rural² areas, 2006-2008 (Males and Females)

1. Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true underlying life expectancy would lie (with 95 per cent probability).

2. Scottish Government's 6-fold Urban Rural Classification version 2007-2008. See Appendix 2 for more details.
