

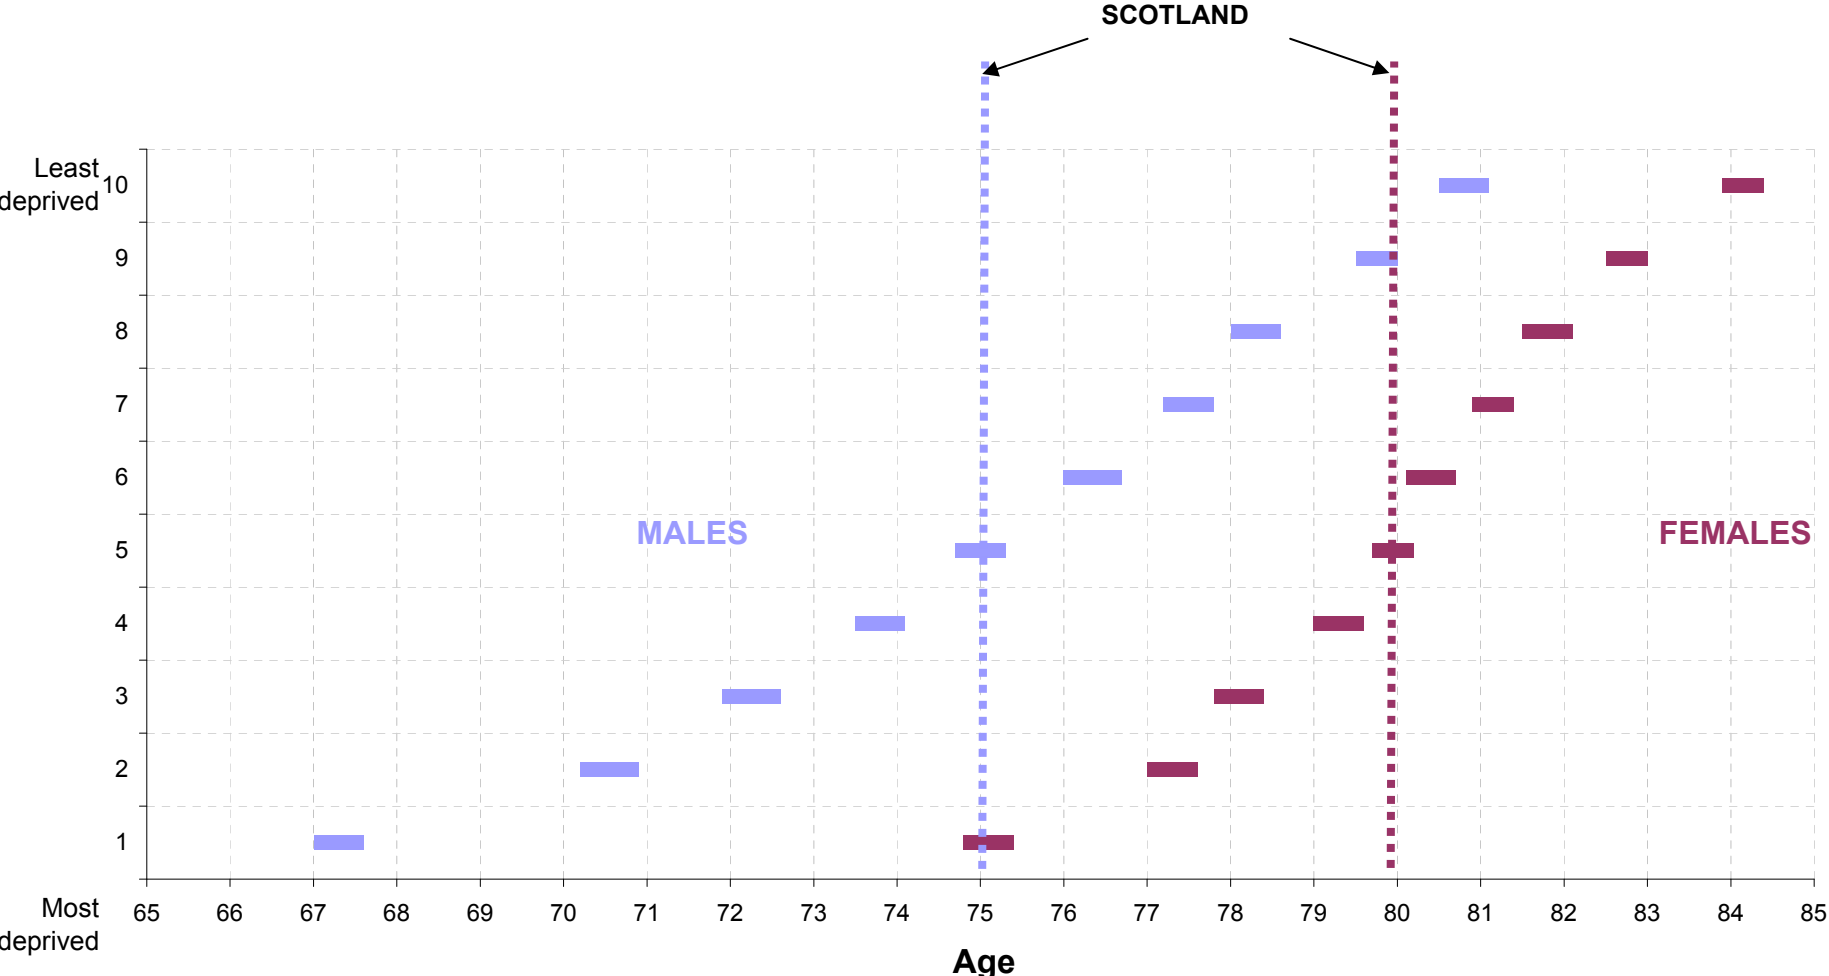

Figure 4.7 Life Expectancy at birth, 95 per cent confidence intervals¹ by level of deprivation², 2006-2008 (Males & Females)

1. Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95 per cent probability).
 2. Scottish Index of Multiple Deprivation (SIMD) 2009. For more information see Appendix 2.
