

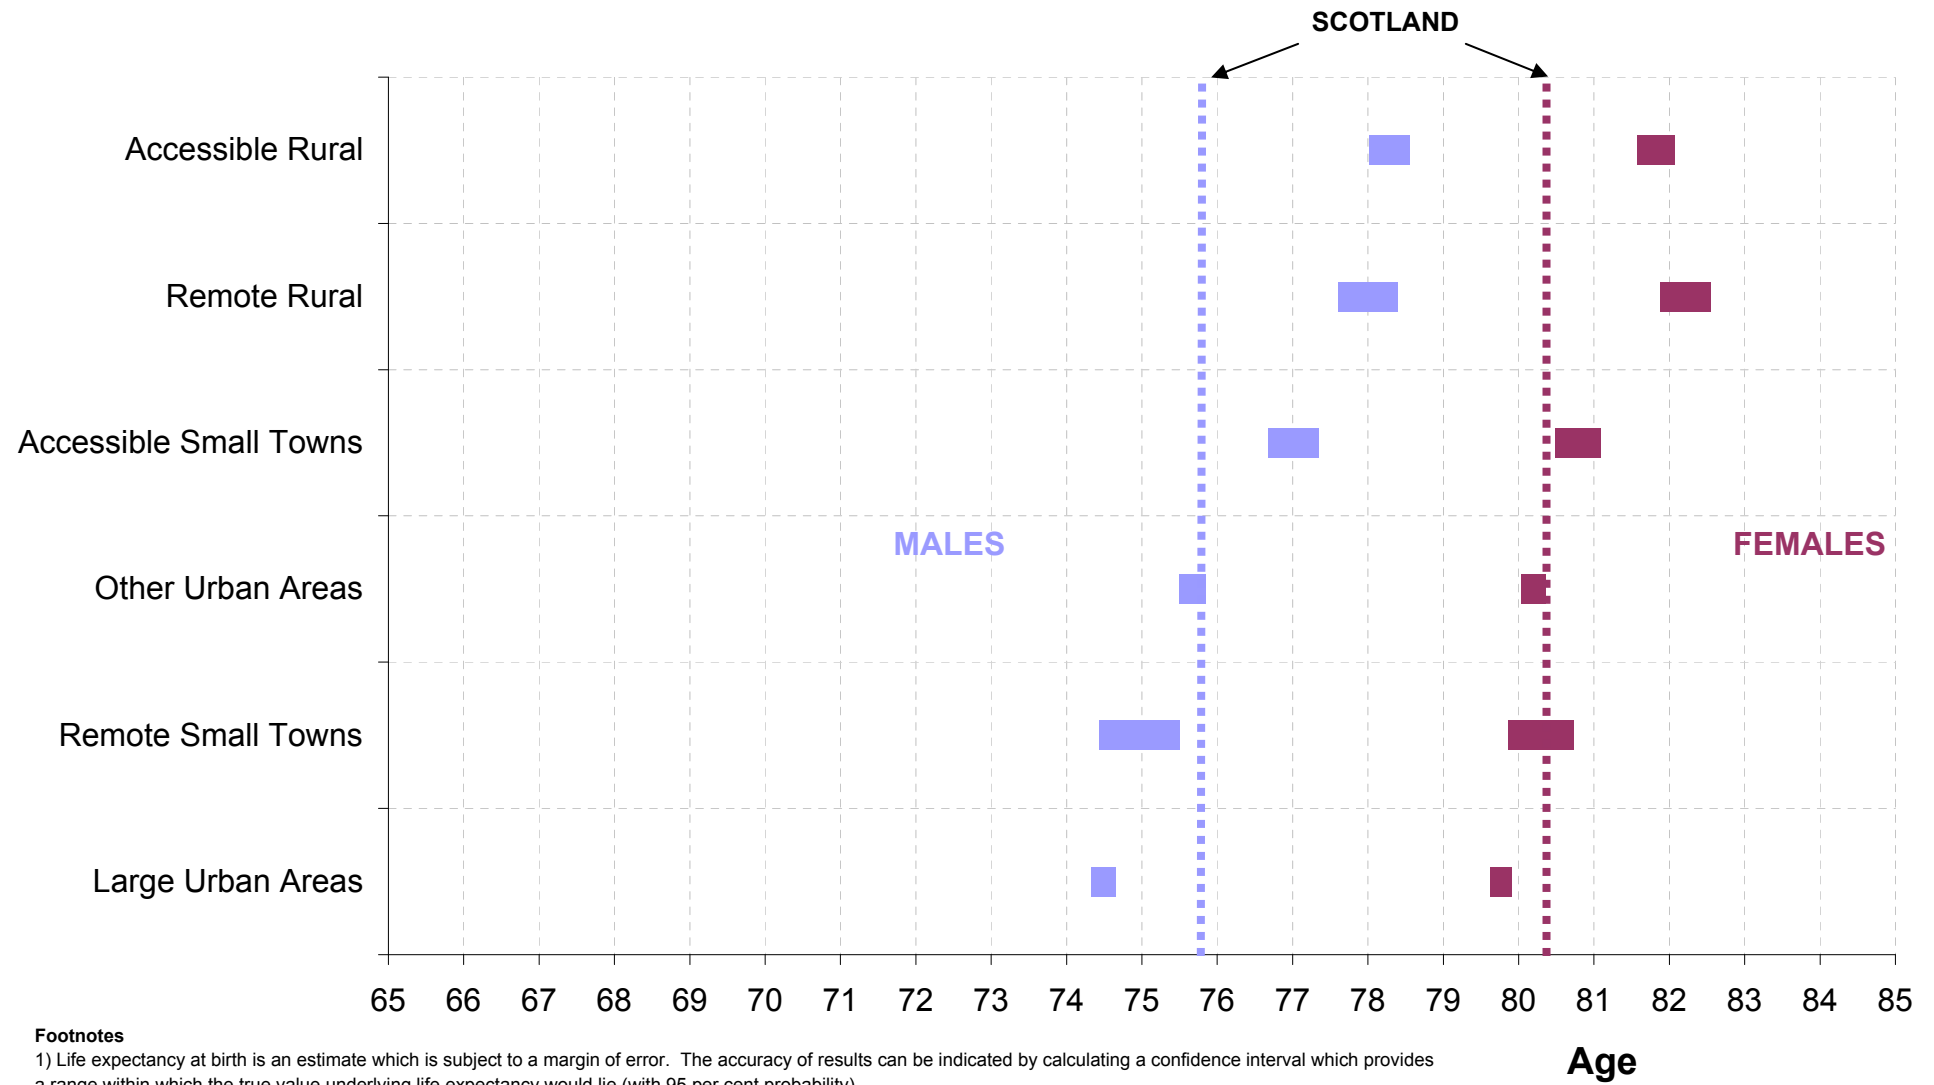

Figure 4.4: Life Expectancy at birth, 95 per cent confidence intervals¹ for Urban and Rural² areas, 2008-2010 (Males and Females)

Footnotes

1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95 per cent probability).

2) Scottish Government's 6-fold Urban Rural Classification version 2009-2010. More details can be found in Appendix 2.
