

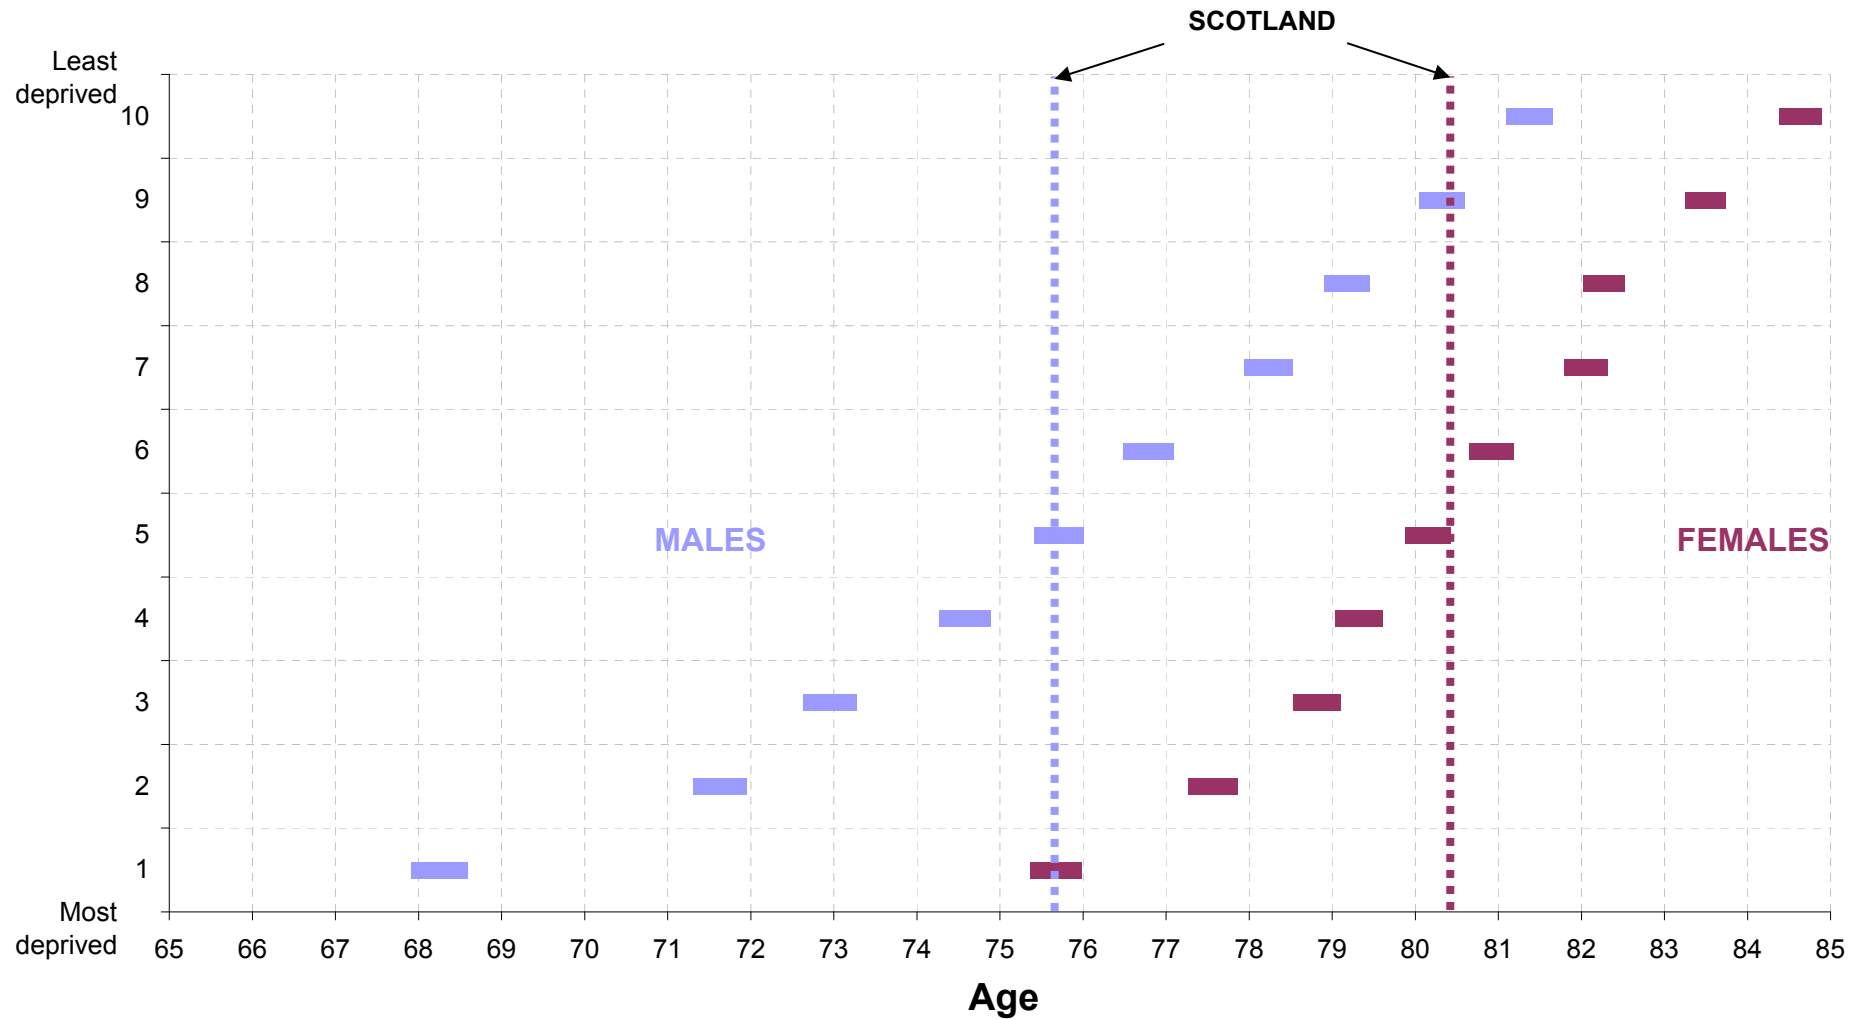

Figure 4.7: Life Expectancy at birth, 95 per cent confidence intervals¹ by level of deprivation², 2008-2010 (Males & Females)

Footnotes

1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95 per cent probability).

2) Scottish Index of Multiple Deprivation (SIMD) 2009. More information can be found in Appendix 2
