

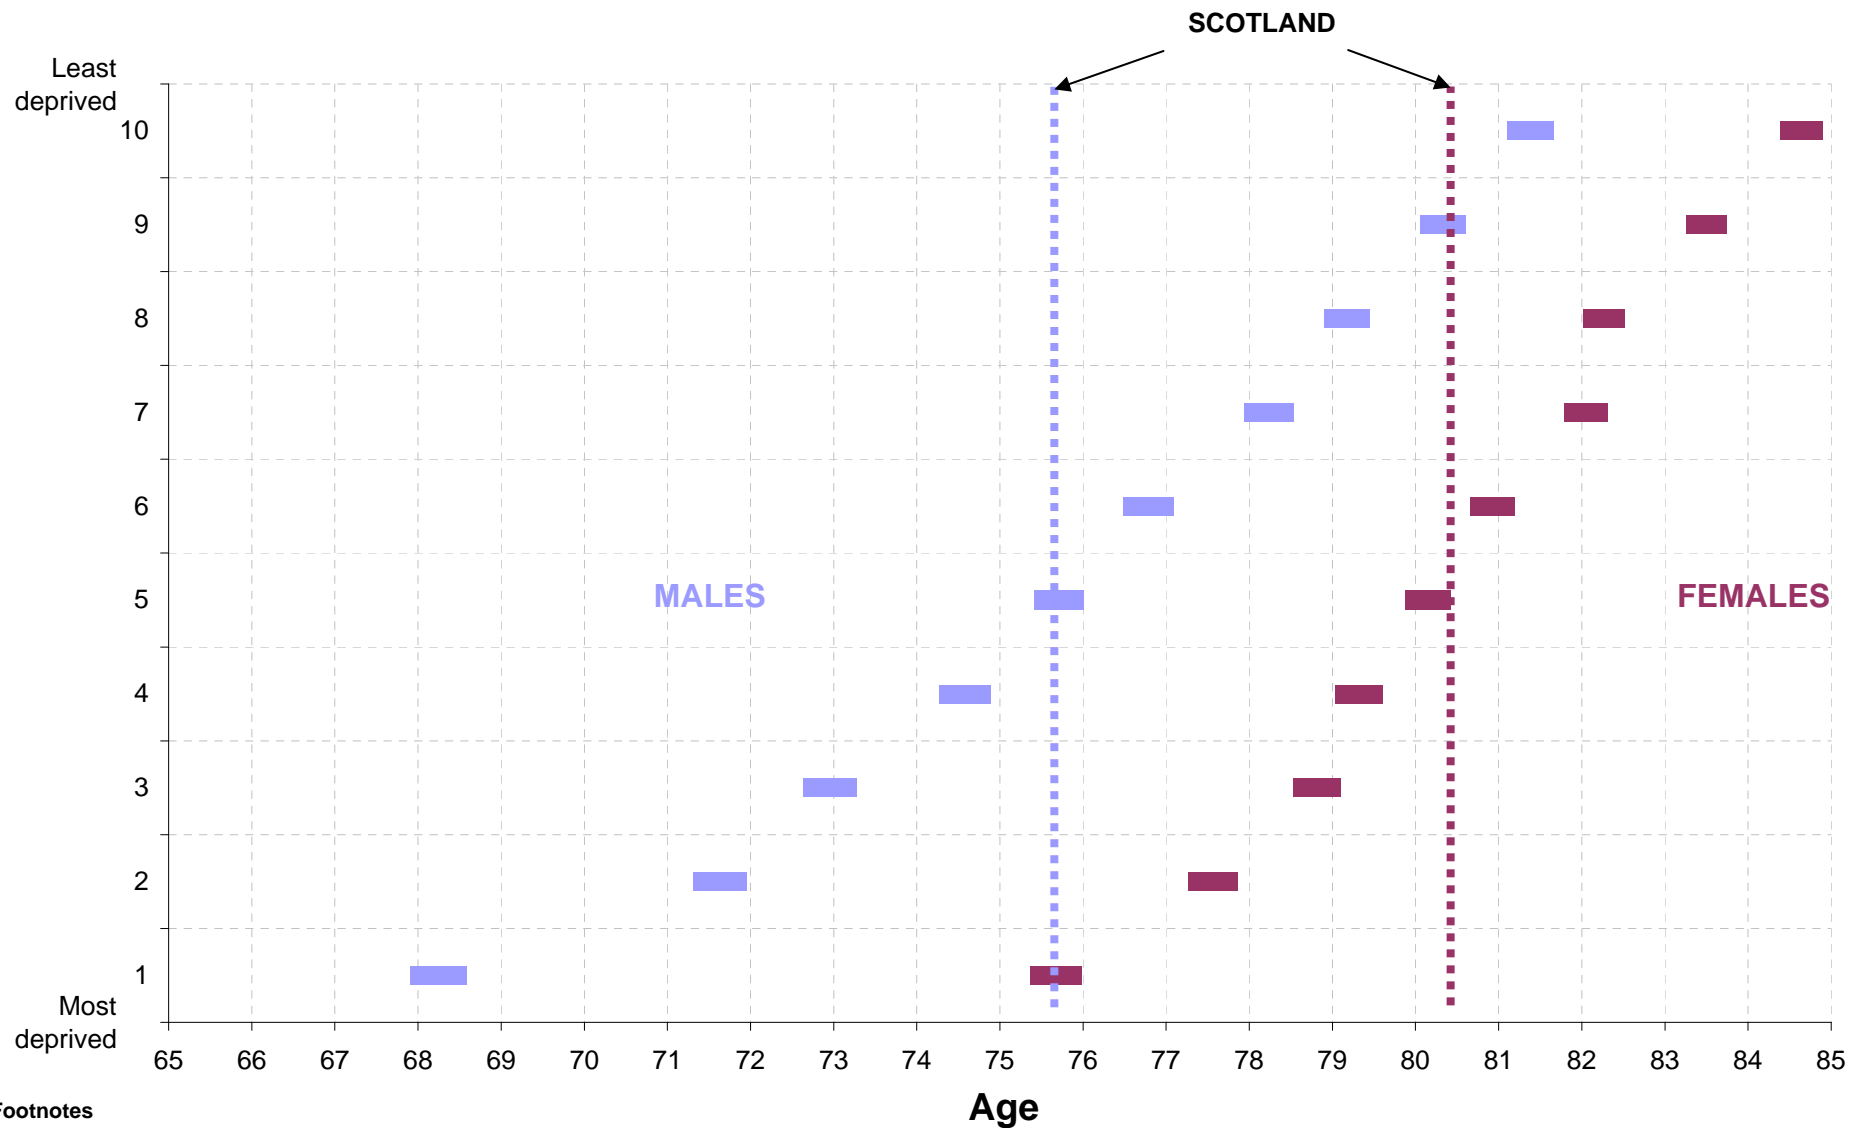

**Figure 4.7: Life Expectancy at birth, 95% confidence intervals<sup>1</sup> by level of deprivation<sup>2</sup>, 2008-2010 (Males & Females)**

**Footnotes**

- 1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95% probability).
- 2) Scottish Index of Multiple Deprivation (SIMD) 2009. For more information refer to Appendix 2.
