

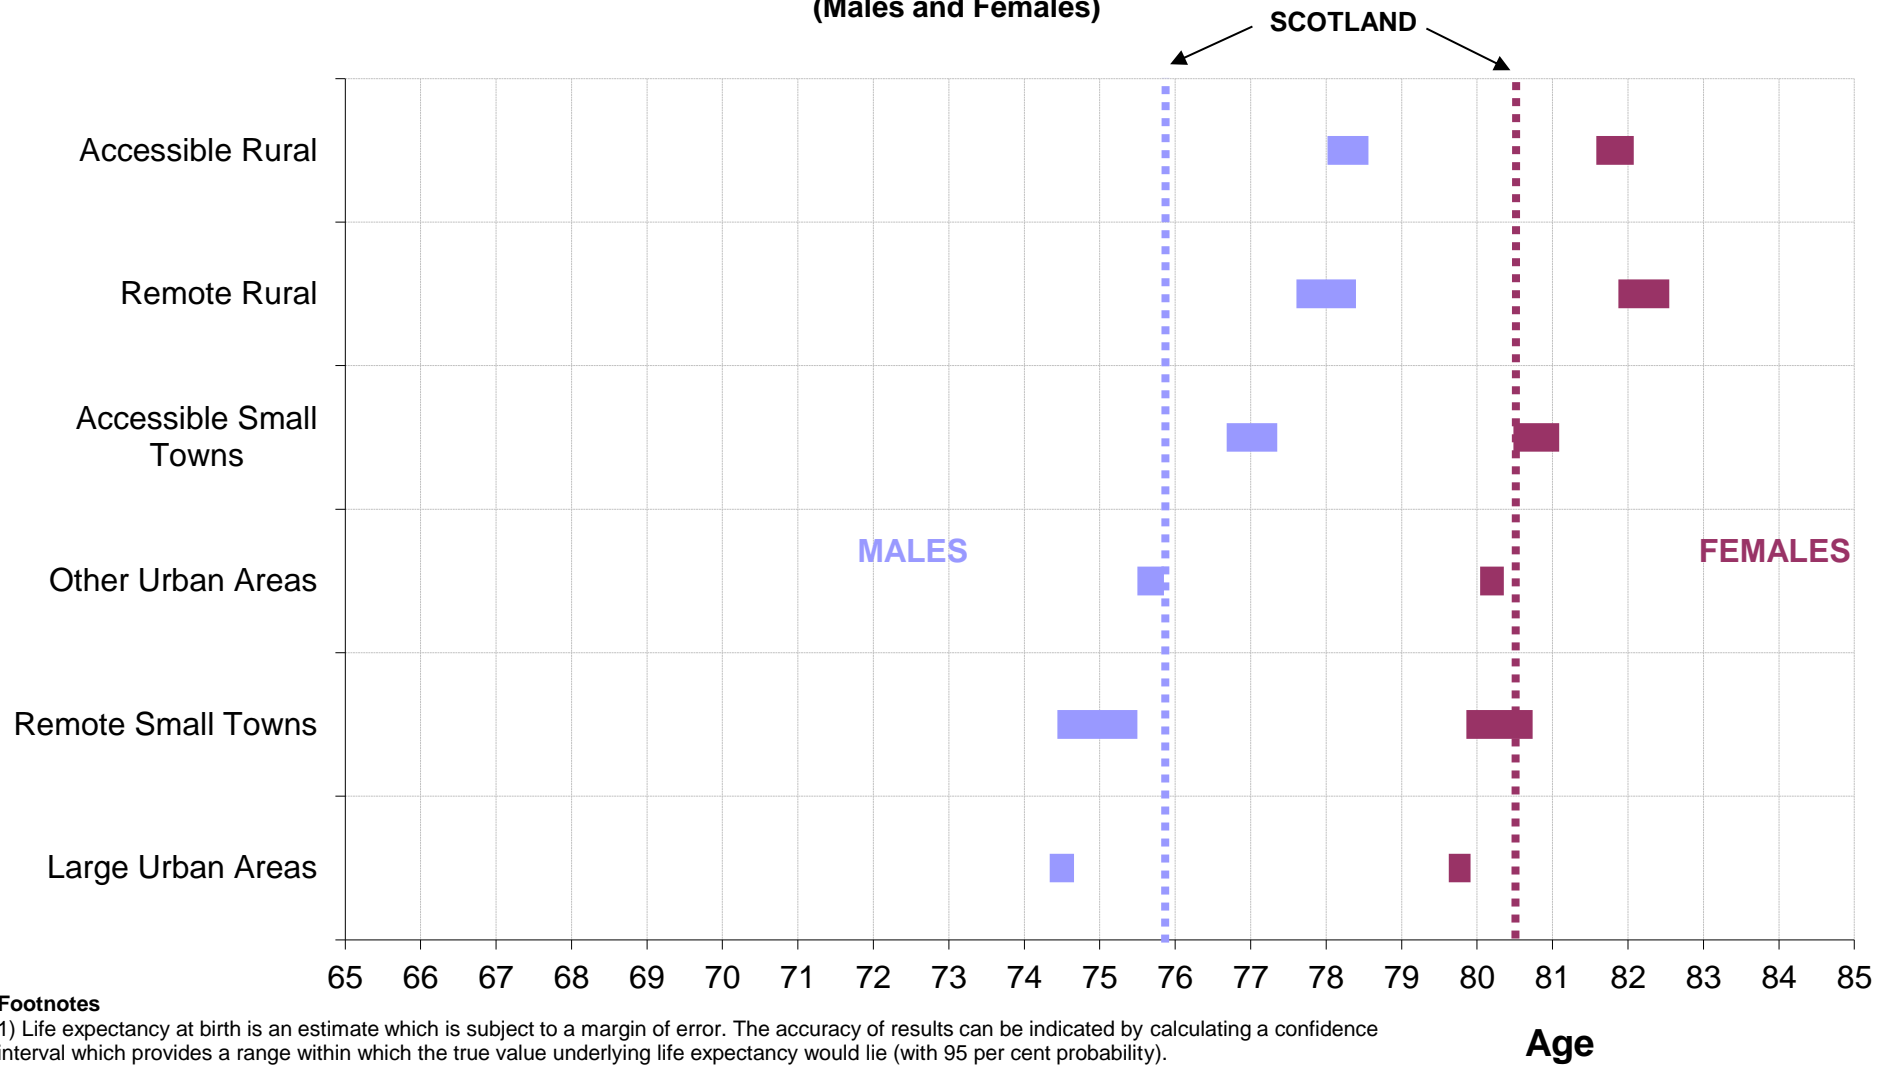

**Figure 4.4: Life Expectancy at birth, 95 per cent confidence intervals¹ for Urban and Rural² areas, 2008-2010³
(Males and Females)**

Footnotes

- 1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95 per cent probability).
- 2) Scottish Government's 6-fold Urban Rural Classification version 2009-2010. Refer to Appendix 2 for more details.
- 3) These estimates are for 2008-2010 and use population estimates rolled-forward from the 2001 Census
