

Figure 4.5: Life Expectancy at birth, 95 per cent confidence intervals¹ by level of deprivation², 2008-2010³ (Males & Females)

Footnotes

- 1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95 per cent probability).
- 2) Scottish Index of Multiple Deprivation (SIMD) 2009. For more information refer to Appendix 2.
- 3) These estimates are for 2008-2010 and use population estimates rolled-forward from the 2001 Census.
