Footnotes

1) Provisional.

2) There may be a break of more than 5% between 2010 and 2011 in the continuity of the statistics for this ICD 10 Chapter (and therefore, larger percentage breaks in the series of figures for some of the categories that are within this Chapter) because, in January 2011, the software for coding the causes of death was upgraded to take account of some updates that the World Health Organisation had made to ICD 10. 3) Many of the deaths which are counted against this heading are ones for which National Records of Scotland has yet to receive further information that will enable it to classify them properly. So the final number of deaths for this year for this category is expected to be much smaller than the current figure.
