Footnotes

1) Provisional.

2) There may be a break of more than 5% between 2010 and 2011 in the continuity of the statistics for this ICD 10 Chapter (and, therefore, larger percentage breaks in the series of figures for some of the categories that are within this Chapter) because, in January 2011, the software for coding the causes of death was upgraded to take account of some updates that the World Health Organisation had made to ICD 10.

Further information about the effect on the statistics is available on the [Death Certificates and Coding the Causes of Death](#) section of the National Records of Scotland (NRS) website.

2) There may be a break of more than 5% between 2010 and 2011 in the continuity of the statistics for this ICD 10 Chapter (and, therefore, larger percentage breaks in the series of figures for some of the categories that are within this Chapter) because, in January 2011, the software for coding the causes of death was upgraded to take account of some updates that the World Health Organisation had made to ICD 10.

Further information about the effect on the statistics is available on the [Death Certificates and Coding the Causes of Death](#) section of the National Records of Scotland (NRS) website.

3) Many of the deaths which are counted against this heading in the latest quarter are ones for which NRS has yet to receive further information that will enable it to classify them properly. So the final number of deaths for this quarter for this category is expected to be much smaller than the current figure.

These categories' final numbers for the latest quarter will be much larger. This is because NRS expects to receive further information about most of the deaths that are currently counted under 'R96-99 Other ill-defined and unknown causes', which will result in them being classified to these categories.
