

Deaths involving coronavirus (COVID-19) in Scotland

Week 44 (01 November 2021 to 07 November 2021)

Published on 10 November 2021

This statistical report includes provisional 2021 statistics and finalised 2020 statistics on the number of deaths associated with coronavirus (COVID-19) and the total number of deaths registered in Scotland

Key Findings

Deaths involving COVID-19, weekly registrations

- As at the 7th of November, there have been a total of 11,818 deaths registered in Scotland where the novel coronavirus (COVID-19) was mentioned on the death certificate. In the latest week there were 140 deaths, an increase of 5 deaths from the previous week.
- Of deaths involving COVID-19 in the latest week:
 - 78 were male, 62 were female.
 - 25 deaths were aged under 65, 43 were aged 65-74 and there were 72 deaths in people aged 75 or over.
 - Glasgow City (23 deaths), East Ayrshire (14 deaths) and North Lanarkshire (11 deaths) had the highest numbers of deaths at council level. In total, 25 (out of 32) council areas had at least one death last week.
 - 116 deaths were in hospitals, 10 were in care homes, and 14 were at home or in a non-institutional setting.

Deaths from all causes, weekly registrations

- The total number of deaths registered in Scotland in week 44 of 2021 was 1,288. This was 209 more than the five year average for week 44 (19% above average).
- In week 44 there were 104 excess deaths at home or in non-institutional settings (35% above average), 109 more deaths in hospitals (20% above average) and 7 fewer deaths in care homes (3% below average) compared to the 2015-2019 average.
- There were 30 more deaths from cancer, 26 more from circulatory causes, 7 more from dementia/Alzheimer's and 5 more from respiratory causes last week compared to average levels. There were also 36 excess deaths from other causes. The number of deaths where COVID-19 was the underlying cause was 106.

Measuring excess deaths in 2021

Excess deaths are calculated by comparing the current year to the five year average from previous years. This average is based on the actual number of death registrations recorded for each corresponding week in the previous five years. Moveable public holidays, when registration offices are closed, affect the number of registrations made in the current week and in the corresponding weeks in previous years.

In 2020, excess deaths were measured by comparing the 2020 figure against the average for 2015-2019. For 2021 we would generally calculate excess deaths by comparing the 2021 figure against the average for 2016-2020.

As excess deaths are a key measure of the effect of the pandemic, it is not appropriate to compare the 2021 figure against the 2016-2020 average as that average will be affected by the pandemic with higher deaths in Spring 2020. We have therefore decided to continue to use the 2015-2019 average to measure excess deaths in 2021.

Figure 1: Weekly deaths involving COVID-19 in Scotland, week 12 2020 to week 44 2021

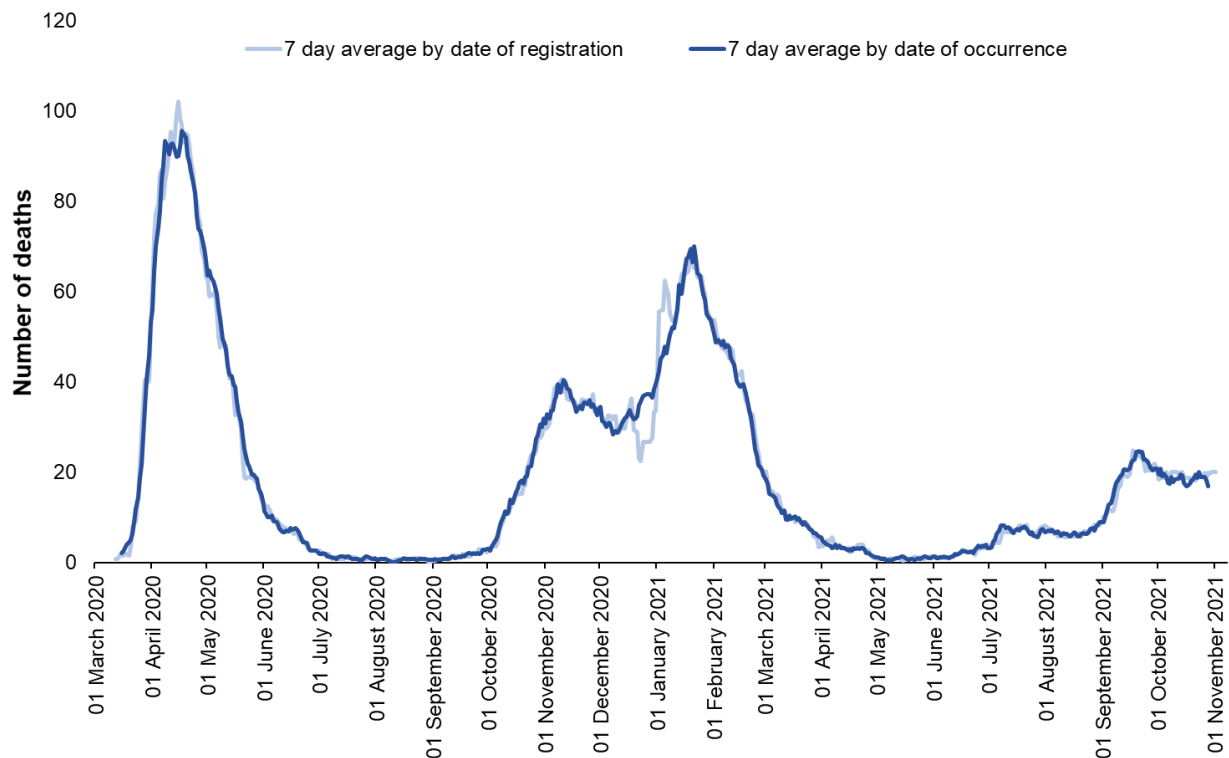

Figure 2: Deaths involving COVID-19, Date of Occurrence vs Date of Registration

The figures throughout this report are based on the date a death was registered rather than the date the death occurred. When someone dies, their family (or a representative) have to make an appointment with a registrar to register the death. Legally this must be done within 8 days, although in practice there is, on average, a 3 day gap between a death occurring and being registered. This gap can be greater at certain times of the year such as Easter and Christmas when registration offices are closed for public holidays.

In general, the trend in COVID-19 deaths by date of registration (the NRS headline measure) has a lag of around 3 days when compared with the figures on date of death.

Daily deaths began to rise again in July 2021 and then rose through most of September, before falling back in October. By late October the average number of deaths occurring per day was 17.

This report includes all deaths which were registered by 7th November. There will, however, be deaths which occurred before this date but were not yet registered. In order to include a more complete analysis based on date of occurrence, we need to wait an additional week to allow the registration process to fully complete. The trend based on date of occurrence therefore only includes deaths which occurred by 31st October as the majority of these are likely to have been registered by now.

How do NRS compile these statistics?

- Weekly figures are based on the date of registration. In Scotland deaths must be registered within 8 days but in practice, the average time between death and registration is around 3 days.
- Figures are allocated to weeks based on the ISO8601 standard. Weeks begin on a Monday and end on a Sunday. Often weeks at the beginning and end of a year will overlap the preceding and following years (e.g. week 1 of 2020 began on Monday 30 December 2019) so the weekly figures may not sum to any annual totals which are subsequently produced.
- Deaths involving COVID-19 are defined as those where COVID-19 is mentioned on the death certificate, either as the underlying cause of death or as a contributory cause. Cause of death is coded according to the International Statistical Classification of Diseases and Related Health Conditions 10th Revision (ICD-10). The relevant codes included in this publication are U07.1, U07.2, U09.9 and U10.9.
- Figures include deaths where ‘suspected’ or ‘probable’ COVID-19 appears on the death certificate.
- From the week beginning 22 March 2021, new ICD-10 codes issued by the World Health Organisation (WHO) were also used to code deaths involving COVID-19. U09.9 is used for ‘post-COVID’ conditions, when death occurred after acute or ongoing COVID-19. U10.9 is used in the rare cases where ‘Kawasaki-like’ syndrome is caused by COVID-19. Data back to March 2020 has been recoded to ensure consistency of the time series.
- 2021 data are provisional and subject to change in future weekly publications. They will be finalised in summer 2022. Reasons why the data might be revised later include late registration data being received once the week’s figure have been produced or more information being provided by a certifying doctor or The Crown Office and Procurator Fiscal Service (COPFS) on the cause of death.
- Certain user enquiries for ad-hoc analysis related to COVID-19 deaths have been published on our [website](#).
- The weekly publication includes breakdowns by sex, age, health board, local authority and location of death. It also includes an analysis of excess deaths by location and broad cause of death. We also publish a comprehensive and detailed analysis of mortality on a monthly basis.
- NRS mortality data (COVID-19 and excess deaths) continue to be made available on a weekly basis through the [Scottish Government’s COVID-19 dashboard](#)

Index of available analysis on registered deaths involving COVID-19

| Breakdown | Frequency | When Added | Latest Period Covered | Date Last updated |
|---|------------------|-----------------------------|------------------------------|--------------------------------|
| Age group | Weekly | 8 th April 2020 | Week 44 | 10 th November 2021 |
| Sex | Weekly | 8 th April 2020 | Week 44 | 10 th November 2021 |
| Location | Weekly | 15 th April 2020 | Week 44 | 10 th November 2021 |
| Health Board | Weekly | 8 th April 2020 | Week 44 | 10 th November 2021 |
| Local Authority | Weekly | 22 nd April 2020 | Week 44 | 10 th November 2021 |
| Excess deaths by cause | Weekly | 22 nd April 2020 | Week 44 | 10 th November 2021 |
| Excess deaths by cause and location | Weekly | 17 th June 2020 | Week 44 | 10 th November 2021 |
| Age-standardised mortality rates – Scotland | Monthly | 13 th May 2020 | September 2021 | 11 th October 2021 |
| Age-standardised mortality rates – sub-Scotland | Monthly | 17 th June 2020 | March 2020 – September 2021 | 11 th October 2021 |
| Leading causes of death | Monthly | 13 th May 2020 | September 2021 | 11 th October 2021 |
| Pre-existing conditions | Monthly | 13 th May 2020 | September 2021 | 11 th October 2021 |
| Deprivation | Monthly | 13 th May 2020 | March 2020 – September 2021 | 11 th October 2021 |
| Urban Rural | Monthly | 13 th May 2020 | March 2020 – September 2021 | 11 th October 2021 |
| Daily occurrences by location of death | Monthly | 13 th May 2020 | September 2021 | 11 th October 2021 |
| Occupation | Monthly | 17 th June 2020 | March 2020 – September 2021 | 11 th October 2021 |
| Intermediate Zone | Monthly | 17 th June 2020 | March 2020 – September 2021 | 11 th October 2021 |
| Deaths by ICD-10 codes | Monthly | 16 th June 2021 | March 2020 – September 2021 | 11 th October 2021 |
| Ethnic Group | One-off | 8 th July 2020 | March to mid-June | 11 th November 2020 |
| Disability | One-off | 24 th March 2021 | March to Jan | 24 th March 2021 |

National Records of Scotland

We, the National Records of Scotland, are a non-ministerial department of the devolved Scottish Administration. Our aim is to provide relevant and reliable information, analysis and advice that meets the needs of government, business and the people of Scotland. We do this as follows:

Preserving the past – We look after Scotland’s national archives so that they are available for current and future generations, and we make available important information for family history.

Recording the present – At our network of local offices, we register births, marriages, civil partnerships, deaths, divorces and adoptions in Scotland.

Informing the future – We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce statistics on the population and households.

You can get other detailed statistics that we have produced from the Statistics section of our website. Scottish Census statistics are available on the Scotland’s Census website.

We also provide information about future publications on our website. If you would like us to tell you about future statistical publications, you can register your interest on the Scottish Government ScotStat website.

You can also follow us on twitter [@NatRecordsScot](https://twitter.com/NatRecordsScot)
