Yes, 50+ hours a week

This question records whether a person gives any help or support to family members, friends, neighbours or others because of long-term physical or mental ill-health or disability, or problems related to old age.

Note that there is no specific reference to whether this care is provided within the household or outside the household. Therefore, no explicit link can be created to infer that the individual providing care is providing it to a person within the same household.

The variable records the time spent in a typical week.

Applicability: All people, UK

This is a multi-tick question asking the person to identify all qualifications obtained. In England and Wales, there is a separate question, which records teaching, nursing, medical and dental professional qualifications. These are described in a separate variable (see *Qualifications, professional* PQU(x)PEW). Respondents are asked to tick all boxes that apply.

During processing, the answers to the tick-boxes are held in a compound field consisting of 0s and 1s. In order to produce a 'count' of qualifications held, separate variables are provided on the final output database for each qualification group represented by each tick-box. Note that these variables might not produce accurate counts because, for example, people with 2+ A levels did not always also tick the box for 1+ A levels.

Different questions are asked in England and Wales, Scotland and Northern Ireland to reflect local requirements.

6.51 Relationship within household

RELATIONSHIP

This variable is based on the relationship question which asks the first 5 people in the household (6 in Northern Ireland) to provide information on their relationship with all previously numbered persons in the household. Persons 6 (Person 7 in Northern Ireland) and over are asked to identify their relationships with Persons 1 and the previous two people only.

During processing the responses to the question are held in a compound field that gives the relationship of that person to all other people in the household. Reciprocal relationships (that is those that are implied by a given relationship) are also held in this field. For example, person 2 is not asked to provide a relationship to person 3, but the relationship can be determined from the relationship to person 2 provided by person 3. The information is used to derive the family variables but is not directly used in standard output.

Applicability: All people in households, UK

8b What religion, religious denomination or body were you brought up in?

Roman Catholic

Presbyterian Church in Ireland

Church of Ireland

Methodist Church in Ireland

Other, *please write in*

None

These questions ask the person to record their religion. In Scotland there is a separate question asking for the religion the person was brought up in. In Northern Ireland, people who do not regard themselves as belonging to any religion are asked to record the religion they were brought up in. A write-in is provided where the person's religion is not provided as a tick box response. A detailed list of codes was used to code the write-in responses for England and Wales and Northern Ireland. This list contains some codes, added during processing, which are

only applicable in Northern Ireland. Write-in answers are not coded in Scotland.

Missing answers are not imputed so the classifications include a 'not stated' category.

The classifications used in standard output are:

England and Wales

- Christian
- Buddhist
- Hindu
- Jewish
- Muslim
- Sikh
- Other religions
- No religion
- Not stated

Scotland

- None
- Roman Catholic
- Other Christian
- Buddhist
- Hindu
- Jewish
- Muslim
- Sikh
- Another religion
- Not answered

Northern Ireland

- Catholic
- Presbyterian Church in Ireland
- Church of Ireland
- Methodist Church in Ireland
- Other Christian (including Christian related)
- Other religions and philosophies
- No religion or religion not stated

The last category 'No religion or religion not stated' can be split into 'No religion, with a religion brought up in stated' and 'Neither religion nor religion brought up in stated' if requested as part of an ad-hoc request

The group 'Catholic' includes those respondents who gave their religion as Roman Catholic, Catholic Apostolic Church, Ukrainian Catholic, Greek Catholic, Palmarian Catholic or Catholic.

Responses have been categorised as 'Other Christian (including Christian-related)' or 'Other Religions and Philosophies' on the basis of the best available information, although it is acknowledged that the categorisation of some of the smaller religions is open to interpretation.

In Northern Ireland a complete listing of all religious groups (with 10 or more adherents) is given in a standard table.

Detailed codes available for commissioned output are as follows. In Scotland, there was no coding of write-in answers. Write-in answers were coded to 'Other Christian' and 'Another religion' solely on the basis of which box was used. The additional codes available only in Northern Ireland are shown separately.

Using individual religion codes

Note 1: Users need to be aware that to get a complete number of adherents to a particular religious group they may need to collapse several codes, for example Free Presbyterian and Free Presbyterian Church of Ulster. This is due to several factors:

- a) Adherents to a particular religious group do not always label themselves identically;
- b) Lack of space required respondents to abbreviate the full title of their religious group. This was done in several different ways and often resulted in a more general term which could not accurately be assigned to one particular religious group; and
- c) The requirement for a common England, Wales and Northern Ireland index meant that while in Northern Ireland all Free Presbyterians are probably Free Presbyterian Church of Ulster, this may not be true in England as there may also be adherents of the Free Presbyterian Church of Scotland

However, users must be aware that when collapsing codes, the two codes may not be identical. For example, the code Presbyterian does not only include respondents who just wrote Presbyterian but also Presbyterian USA and Presbyterian in NZ. Similarly, the code United Church is probably predominately United Church of Canada but may include other respondents.

Note 2: Apart from making it necessary to collapse categories, the use of abbreviations may have resulted in several respondents (possibly on the same form) who belong to the same religious group having been coded differently. This is particularly relevant to automatic coding where there is no human intervention. Examples include 'Christian Fellowship Church' coded as 029. If a respondent abbreviates this as 'Christian Fellowship' it would be coded as 028 and if it is abbreviated as 'Fellowship Church' it would be coded as 165. As 'Christian Fellowship' includes many other respondents apart from those belonging to this one denomination these codes cannot be collapsed.

_____ Postcode _____

This variable records the person's usual address one year before Census Day. People are asked to tick 'no usual address one year ago' for a child aged under one. In the *Migrant indicator* variable MIGPUK, the migrant status for children in households aged under one is determined by the migrant status of their 'next of kin' (defined as in order of preference, mother, father, sibling (with nearest age), other related person, Household Reference Person). The migrant status for children aged under one in communal establishments is set to 'No usual address one year ago'.

The *Migration postcode* variable MIGPCPUK contains, where appropriate, a postcode or a country code. Otherwise it is set to 'not applicable'.

6.63 Alternative household composition

AHCHUK

This derived variable describes households in an alternative way to the classification used in most of the standard tables (see *Household composition* HHCHUK at 6.83). It defines households by the age of the people in it. It takes no account of the relationships between people.

Note that for the purposes of this classification an 'adult' is defined as any person aged 16 or over and a 'child' is any person aged under 16.

Any '1 child' household will be included with '1 adult of non-pensionable age' households. Any 'no adults' household will be included with '1 adult of any age and 1 or more children' households.

Applicability: All occupied household spaces, UK

One person household

0 1 adult of pensionable age
1,2 1 adult of non-pensionable age

Other households

- 3,4 1 adult of any age and 1 or more children

6.64 Alternative household type

AHTHUK

This derived variable describes households in an alternative way to the classification used in most of the standard tables (see *Household composition* HHCHUK at 6.83).

A household is defined by the type of family in it. A household with more than one family is categorised according to the following priority order:

- Married couple family,
- Cohabiting couple family,
- Lone parent family

Within a family type a family with dependent children takes priority.

Note that same-sex couple households will be grouped with cohabiting couple households.

Applicability: All occupied household spaces, UK

- 0 Married couple household with dependent child(ren)
- 1 Married couple household with no dependent children
- 2,6 Cohabiting couple household with dependent child(ren)
- 3,7 Cohabiting couple household with no dependent children

This derived variable is created using information from the questions above, and the question on *Hours worked* HOUPIK and *Employment type* EMTPUK. The classification is based on the International Labour Office (ILO) definition of economic activity, and is an ONS harmonised survey classification.

As well as inevitable differences between a census and surveys, minor differences include the definition of part-time and full-time, and the sub-categorisation of economically inactive. For the Census, part-time is defined as working 30 hours or less, whereas for the harmonised output classification, part-time status is self-assessed. 'In employment' includes people on Government Sponsored Training Schemes.

The full classification given below provides detailed economic activity information for all economically active full-time students.

Total number of categories: 8

6.79 Family type one

FT1

This variable is derived during the algorithm that allocates people to families. It classifies families according to the characteristics of the people in generation one.

Cohabiting couple families include both opposite sex and same sex couples

Applicability: All families, UK

- 0 Ungrouped individual
- 1 Married couple family
- 2,3,4 Cohabiting couple family
- 5 A lone parent family (male)
- 6 A lone parent family (female)

Total number of categories: 5

6.80 Family type two

FT2

This variable is derived during the algorithm that allocates people to families. It classifies families according to the characteristics of the people in generation two.

Applicability: All families, UK

- 0 No generation 2
- 1 All generation 2 are children of one female member of generation 1 only
- 2 All generation 2 are children of one male member of generation 1 only
- 3 All generation 2 are children of both members of generation 1
- 4 Some belong only to female member of generation 1, others to both
- 5 Some belong only to male member of generation 1, others to both
- 6 Some belong to only one member of generation 1; some belong only to the other
- 7 Some belong to only one member of generation 1; some belong only to the other and some belong to both

Total number of categories: 8

6.81 Generation in family

GENINFAM

This variable is derived during the algorithm that allocates people to families. It classifies people according to their generation within a family.

Applicability: All people in households, UK

- 0 A person not in a family (an 'ungrouped individual')
- 1 Generation 1: a member of a couple or a lone parent
- 2 Generation 2: a child (any age) in a family

Total number of categories: 4

Not applicable category (X) comprises: Person in a communal establishment

6.82 Health and disability - selected characteristics, household indicator

DEPHDHUK

This derived variable is used in table UV67 in England and Wales. A household has selected characteristics in the health and disability domain if n if any person in the household has general health 'not good' or has a limiting long term illness.

This variable is not available in Northern Ireland. It is not used in Standard Area Statistics in Scotland.

Applicability: All occupied household spaces, England, Wales and Scotland

- 0 Not deprived in health and disability dimension
- 1 Deprived in health and disability dimension
- X Not applicable

Total number of categories: 3

Not applicable category (X) comprises: Household spaces with no residents

6.83 Household composition

HHCHUK

This derived variable describes the type of household. Note that, as for all other derived variables, the classification does not take account of students and schoolchildren living away from the family home during term-time.

Applicability: All occupied household spaces, UK

6.85 Household Reference Person country of birth

COBHUK

This derived variables classifies a household according to the country of birth of the Household Reference Person (HRP).

Applicability: All occupied household spaces, UK
For codes see COBPUK.

Not applicable category comprises: Household spaces with no residents

6.86 Household Reference Person ethnic group

ETHHUK

This derived variables classifies a household according to the ethnic group of the Household Reference Person (HRP).

Applicability: All occupied household spaces, UK
For codes see ETHPUK.

Not applicable category comprises: Household spaces with no residents

6.87 Household Reference Person NS-Sec

NSSHUK

This derived variables classifies a household according to the NS-SEC of the Household Reference Person (HRP).

Applicability: All occupied household spaces, UK
For codes see NSSPUK.

Not applicable category comprises: Household spaces with no residents

6.88 Household Reference Person social grade

SCGHUK

This derived variable classifies a household according to the approximated social grade of the Household Reference Person (HRP).

Applicability: All occupied household spaces, UK
For codes see SCGPKUK

Not applicable category comprises:

- household spaces with no residents
- households where HRP is not aged 16 – 74

6.89 Household Reference Person indicator

HRPPUK

This derived variable identifies the person who is the reference person for the household. For a

person living alone, that person is the Household Reference Person (HRP). If the household contains only one family (with or without ungrouped individuals) the HRP is the same as the Family Reference Person (FRP). If there is more than one family in the household, the HRP is chosen from among the FRPs using the same criteria as for choosing the FRP (economic activity, then age, then order on the form). If there is no family, the HRP is chosen from the individuals using the same criteria.

Applicability: All people in households, UK

- 0 Not HRP
- 1 HRP
- X Not applicable

Total number of categories: 3

Not applicable (X) category comprises: People in communal establishments

6.90 Household size

SIZHUK

This derived variable records the number of people resident in each household. Note that, as for all other derived variables, it does not include students and schoolchildren living away from the family home during term-time.

Applicability: All household spaces, UK

00 – 30 0 – 30 residents singly

Total number of categories: 31

6.91 Households with students away during term-time

STAHUK

This derived variable provides information, at the parental or vacation address, on the number and age of students who are living away from home during term-time.

Applicability: All household spaces, UK

- 1 No students away from home
- 2 One student away from home, aged under 18
- 3 One student away from home, aged 18 or over
- 4 Two students away from home, both aged under 18

6.95 Moving group identifier

MVGNUM

This variable identifies the moving group within a household or communal establishment to which the person belongs.

A moving group is a group of people who have moved together. This is defined as a group of people within a household or communal establishment who are migrants and who have the same postcode or country code for their address one year before Census day. A person moving by his or herself constitutes a moving group. A person with no usual address one year before Census day is in a moving group by him or herself.

Applicability: All migrants

- 0001 – 4000 1 – 4000
XXXX Not applicable

Not applicable category (XXXX) comprises: People who are not migrants

6.96 Moving group, number of people

MVGSIZ

XXXX Not applicable

Total number of categories: 4001

Not applicable category (XXXX) comprises: People who are not migrants

6.97 Moving Group Reference Person

MGRPUK

This derived variable identifies the person who is the reference person for a moving group. If there is only one person in the moving group, that person is the Moving Group Reference Person (MGRP). If the moving group contains the Household Reference Person (HRP), the MGRP is the HRP. If the HRP is not in the moving group, the MGRP is chosen from among any Family Reference Persons (FRPs) using the same criteria as for choosing the FRP (economic activity, then age, then order on the form). If no FRP, the MGRP is chosen from among any people in generation one of a family using the same criteria. If no person in generation one, the MGRP is chosen from all the people in the moving group using the same criteria.

Applicability: All migrants

- 0 Not MGRP
- 1 MGRP

6.100 Output area of travel destination

TOAPUK

This variable identifies the Output Area (OA) for the person's travel destination. Travel destination relates to workplace in England, Wales and Northern Ireland and to place of work or study in Scotland.

The variable applies to all people, not just those in a job (or studying in Scotland).

In England, Wales and Northern Ireland, if the person works mainly at or from home or has no fixed place of work or is aged less than 16 or over 74 or was not working in the week before the census the OA is the same as the OA of residence.

In Scotland, if the person works or studies mainly at or from home or has no fixed place of work or study or is not currently working or studying the OA is the same as the OA of residence.

Applicability: All people

OA code - Person with travel destination within UK

999999999 - Person with travel destination outside UK

888888888 - Person with workplace 'offshore installation' (England, Wales and Northern Ireland)

In Scotland, a person with workplace 'offshore installation' is classified by the departure point:

D998	Outside Scotland but within UK
D999	Outside UK
D001	Aberdeen Airport (Dyce)
D002	Aberdeen Harbour
D003	Shetland Scatsta
D004	Shetland Sumburgh

6.106 Qualifications, highest level of

HLQPUK

This derived variable provides information on the highest level of qualification. In England and Wales it is based on responses to both the qualifications question and the professional qualification question QU(x)PEW and PQU(x)PEW. For Scotland and Northern Ireland it is based on QU(x)PS and QU(x)PNI respectively. The codes are preceded by 1 for England and Wales, 2 for Scotland and 3 for Northern Ireland to emphasise that the levels are derived from different questions.

Applicability: All people aged 16 – 74, UK
England/ Wales

- 10 No academic or professional qualifications

XX Not applicable

Total number of categories: 100

Not applicable category (XX) comprises:

Dwellings that are partially occupied, second/holiday homes or vacant.

6.108 Rooms required**ROOMREQ**

This variable counts the number of rooms that are 'required' by the members of the household. It is compared with the actual number of rooms NORHUK to provide a measure of under-occupancy and overcrowding (the 'occupancy rating'). The calculation for room requirement is given in the glossary.

Applicability: All occupied household spaces, UK

03 – 32 3 – 32 rooms singly
XX Not applicable

Total number of categories: 31

Not applicable category (XX) comprises:

Household spaces with no residents

6.109 Social Grade, approximated**SCGPIUK**

Social grade is a socio-economic classification used by the Market Research and Marketing Industries. Although it is not possible to allocate social grade precisely from information collected in the Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade (see the *Glossary* in chapter 5).

Most output by social grade will be for people aged 16 and over in households. They will be classified by the social grade of their Household Reference Person (HRP). For households where the HRP is aged less than 16 or over 74 the social grade of people in the household will be determined by the household tenure. Table UV78, for the workplace population (people in employment whose usual place of work is in the area) categorises people by their own social grade based on their own occupation.

Applicability: All people aged 16 – 74, UK

6.110 Socio-economic Classification (NS-SeC) NSSPUK

The National Statistics Socio-economic Classification (NS-SeC) provides an indication of socio-economic position, based on occupation. It is an Office for National Statistics standard classification.

Applicability: All people aged 16 and over ,UK

People aged 75 and over are not asked the economic activity questions. They are coded to L17 (code 40)

In England, Wales and Scotland occupation has not been coded for people aged 65 – 74 not working in the week before the Census, nor for people aged 16 – 64 who last worked before 1996. Some of these people will be allocated to L 14.1 (never worked) or L14.2 (long-term unemployed). The remaining people will be coded 39 (occupation not coded).

Note that category L16 'occupation not stated or inadequately described' is not included in census tables because missing answers are imputed.

6.111 Student accommodation

STAPUK

This derived variable records the type of accommodation in which the student lives. Note that this variable relates to students and schoolchildren at their term-time address.

6.114 Vacant/ second home indicator, household

VSHHUK

This variable provides information as to whether an unoccupied household space is a second or holiday home or is a vacant household space. It is based on information provided by the enumerator. The enumerator is not asked to differentiate between second homes and holiday homes so they cannot be distinguished in output.

Applicability: Household spaces for which a dummy form is completed by the enumerator.

- 4 Second residence, holiday accommodation
- 5 Vacant household space

Note that household spaces which are identified by the enumerator as absents, refusals or non-returns but which do not subsequently have a household imputed by the One Number Census process will be classified as vacant in output. Households that return a form but then prove to be all visitor households will be classified as second/holiday homes in output.
