

People born in the European Economic Area (EEA) living in CLACKMANNANSHIRE

Demographic and Census Analysis

This analysis focuses on residents based on their country of birth as the 2011 Census did not include a question on nationality. It should be noted that people born abroad may later acquire British nationality.

EEA countries include EU member countries at March 2011 (excluding the UK in this data) and Norway, Iceland and Liechtenstein. Within the EEA area there is free movement of people, goods, services and capital in the European Single Market.

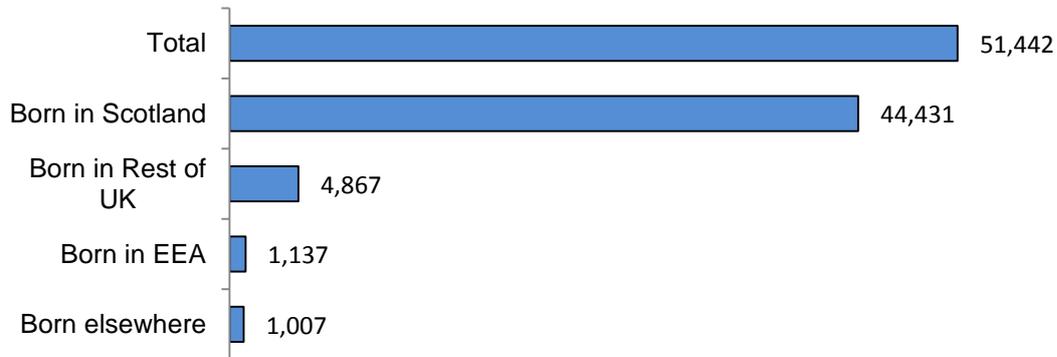

Key points

- In the 2011 Census, 2.2% (1,100 people) of Clackmannanshire's population was born in a country in the EEA.
- Net migration to Clackmannanshire from overseas has been very small or negative over the last 12 years, although was positive in the most recent year (2015/16) with a net gain of 60 people from overseas.
- In 2011, a higher proportion of the EEA-born population in Clackmannanshire was of working age (16-64 years) (77%; 880 people), compared with 66% of its overall population.
- Clackmannanshire is projected to have an ageing population over the next 25 years, including a projected increase of 59% for those aged 65 or over. In contrast, the working age population (aged 16-64 years) is projected to decrease by 19% between 2014 and 2039.
- In 2011, a higher proportion of EEA-born residents of Clackmannanshire aged 16 and over were in employment (69%; 680 people) compared with the total population aged 16 and over of the council area (57%).
- The proportion of EEA-born residents of Clackmannanshire aged 16-74 with a degree level qualification in 2011 was 42% (390 people). The proportion of all people aged 16-74 in the council area with a degree level qualification was lower at 23%.

Number of EEA-born residents

According to the 2011 Census, 2.2% (1,100 people) of Clackmannanshire's population was born in the EEA. The corresponding proportion for the whole of Scotland was 3.0%.

Migration trends

The migration estimates at local level do not allow the overseas component of migration to be broken down into individual countries or groups of countries. The charts start from 2003/04 as the Treaty of Accession came into force in 2003 followed by an enlargement of the EU in 2004.

Over the past 12 years, Clackmannanshire has experienced a decline in net migration from within Scotland. In 2003/04, there was a net gain of 300 people from within Scotland, compared to a net loss of 100 people most recently in 2015/16.

Net migration from overseas has varied over the last 12 years with a peak gain of 200 people in 2006/07 and a peak loss of 50 people in 2003/04 and 2011/12.

Population projections

These are trend-based and do not take into account shifts in government policy and other social and economic factors that influence population change, including the UK's decision to leave the EU.

	Clackmannanshire	Scotland
Projected population change over the next 25 years	-3%	+6.6%

Source: Population Projections for Scottish Areas, National Records of Scotland (NRS)

Figure 4: Components of projected population change over next 25 years (2014 – 2039)

Source: Population Projections for Scottish areas, National Records of Scotland (NRS)

The largest drivers of the projected decrease in Clackmannanshire’s population over the next 25 years are negative migration within Scotland and negative natural change (more deaths than births).

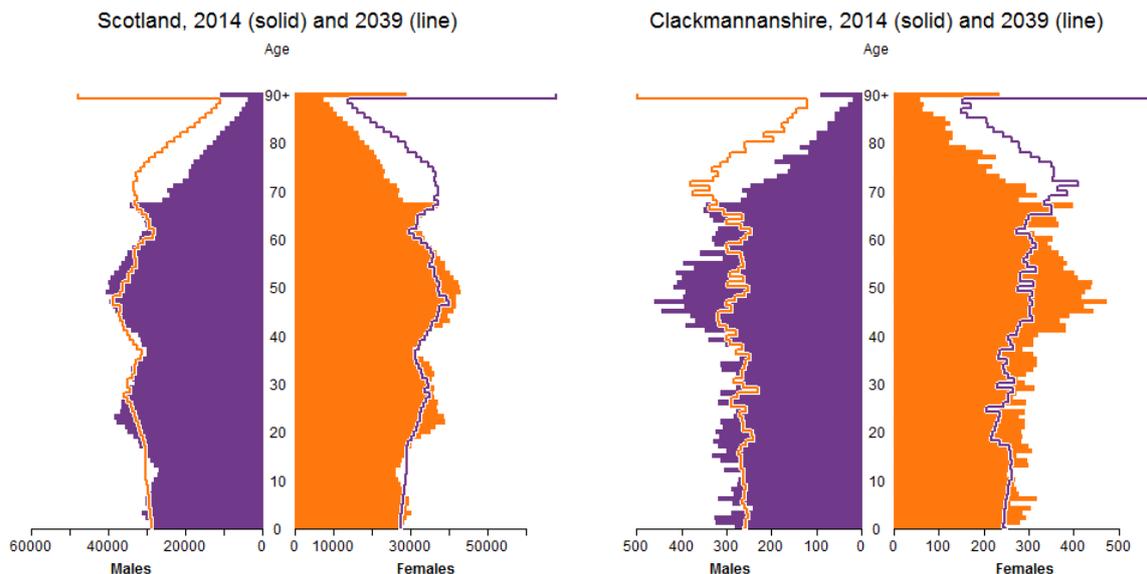

Changing age structure

The demographic resilience of local areas is affected by the changing age structure of the population and levels of migration. Working age migrants can play an important role in addressing the ageing population.

Over the next 25 years, Clackmannanshire’s population is projected to experience an increase of 59% in the population aged 65 or over, with an increase of 2,800 (+67%) for males and 2,700 (+52%) for females.

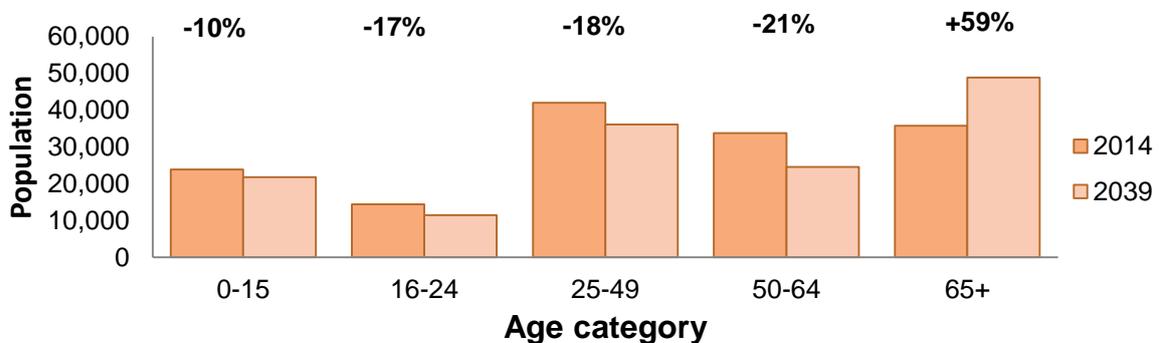

All other age categories are predicted to experience a population decrease between 2014 and 2039, with the greatest losses in the age 50-64 and 25-49 age categories (-21% and -18% respectively).

Nationalities of National Insurance Number (NINo) allocations to overseas nationals in 2015

A NINo is generally required by any overseas national looking to work or claim benefits / tax credits in the UK, including the self-employed or students working part time.

	Number of nationalities	Top five nationalities (NINo allocations)
Clackmannanshire	10	Poland, Romania, Italy, Slovakia, Bulgaria
Scotland	129	Poland, Romania, Spain, Italy, Bulgaria

Economic activity

According to the 2011 Census, a higher proportion of Clackmannanshire's EEA-born residents aged 16 and over were in employment (69%; 680 people) compared with the total population aged 16 and over of the council area (57%). A smaller proportion of EEA residents were economically inactive¹ (26%; 260 people) compared with the total population (38%).

Figure 7: Percentage of people aged 16 and over in each category of economic activity by country of birth, Clackmannanshire, 2011

Source: Scotland's Census 2011, National Records of Scotland (NRS)

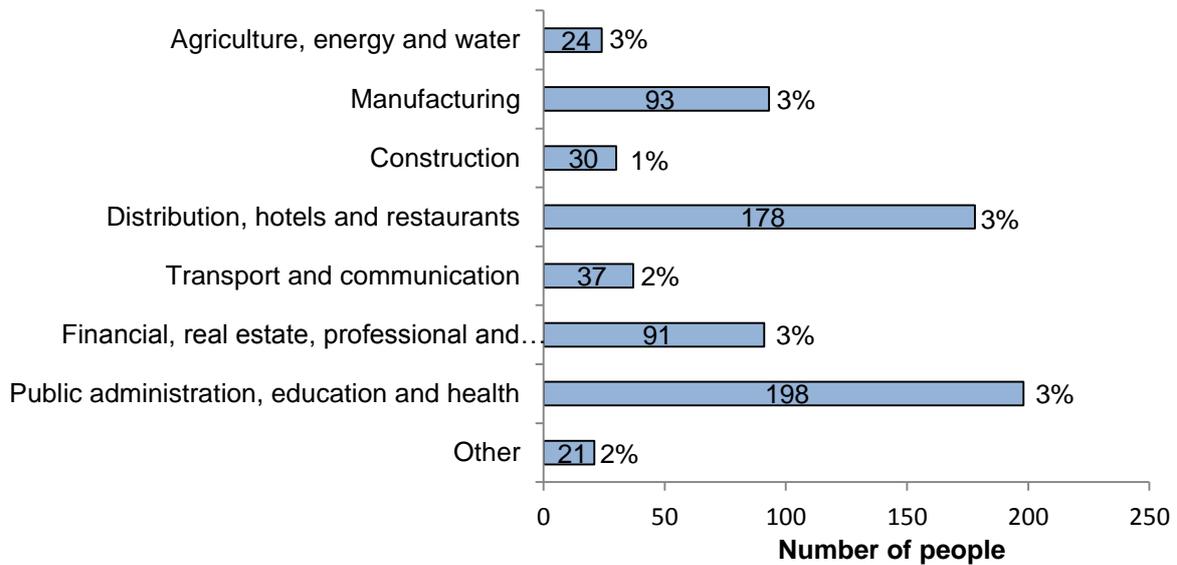

¹ Economic inactive people include: students not seeking employment, people who are retired, and other people not seeking employment (such as those who are long-term sick or disabled or who are looking after a home or family).

Industry of employment

A total of 670 EEA-born residents of Clackmannanshire aged 16-74 were in employment at the time of the 2011 Census. The largest numbers by industrial sector were: Public administration, education and health (200 people), Distribution, hotels and restaurants (180) and Manufacturing (90).

In 2011, EEA-born people made up 3% of all residents of Clackmannanshire aged 16-74 in employment. The industrial sector in which this proportion was highest was Distribution, hotels and restaurants (3%).

National Statistics Socio-economic classification (NS-SeC) and education

In 2011, the proportion of EEA-born residents of Clackmannanshire aged 16-74 who held a degree level qualification (42%; 390 people) was higher than for all people aged 16-74 in the council area (23%). This qualification gap tended to be greater at lower level occupation categories.

Figure 9: Percentage of people aged 16-74 with a degree level qualification² in each NS-SeC³ category by country of birth, Clackmannanshire, 2011

Please note that there are small numbers in some categories

Source: Scotland's Census 2011, National Records of Scotland (NRS)

² In the 2011 Census, this is defined as Level 4 and above and includes: Degree, Postgraduate qualifications, Masters, PhD, SVQ level 5 or equivalent; Professional qualifications (for example, teaching, nursing, accountancy); Other Higher Education qualifications not already mentioned (including foreign qualifications).

³ The National Statistics Socio-economic Classification (NS-SeC) provides an indication of socio-economic position based on occupation. It is an Office for National Statistics standard classification.
