

People born in the European Economic Area (EEA) living in SCOTTISH BORDERS

Demographic and Census Analysis

This analysis focuses on residents based on their country of birth as the 2011 Census did not include a question on nationality. It should be noted that people born abroad may later acquire British nationality.

EEA countries include EU member countries at March 2011 (excluding the UK in this data) and Norway, Iceland and Liechtenstein. Within the EEA area there is free movement of people, goods, services and capital in the European Single Market.

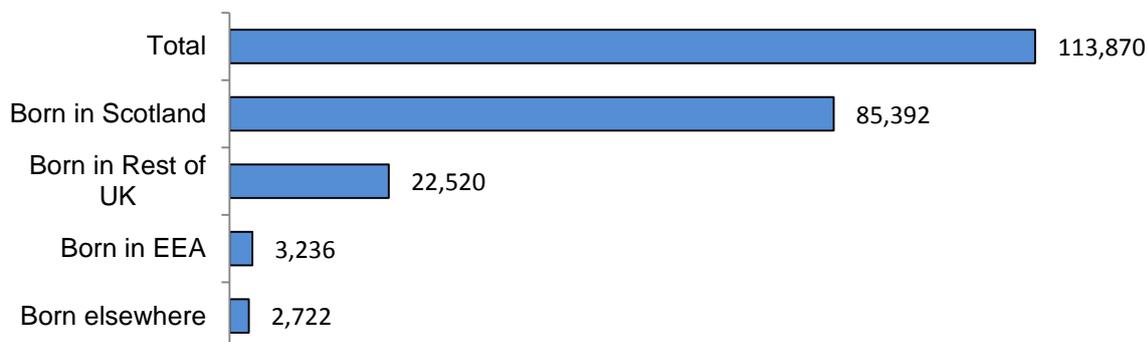

Key points

- In the 2011 Census, 2.8% (3,200 people) of Scottish Borders' population was born in a country in the EEA.
- Net migration to Scottish Borders from overseas has been low for most of the last 12 years.
- In 2011, a higher proportion of the EEA-born population in Scottish Borders was of working age (16-64 years) (78%; 2,500 people), compared with 62% of its overall population.
- Scottish Borders is projected to have an ageing population over the next 25 years, including a projected increase of 51% for those aged 65 or over. In contrast, the working age population (aged 16-64 years) is projected to decrease by 15% between 2014 and 2039.
- In 2011, a higher proportion of EEA-born residents in Scottish Borders aged 16 and over were in employment (68%; 2,000 people) compared with the total population aged 16 and over of the council area (58%).
- The proportion of the EEA-born population of Scottish Borders aged 16-74 with a degree level qualification in 2011 was 39% (1,100 people). The proportion of all people aged 16 -74 in the council area with a degree level qualification was lower at 28%.

Number of EEA-born residents

According to the 2011 census, 2.8% (3,200 people) of Scottish Borders' population was born in the EEA. The corresponding proportion for the whole of Scotland was 3.0%.

Migration trends

The migration estimates at local level do not allow the overseas component of migration to be broken down into individual countries or groups of countries. The charts start from 2003/04 as the Treaty of Accession came into force in 2003 followed by an enlargement of the EU in 2004.

Over most of the past 12 years, Scottish Borders has experienced low levels of net migration from overseas, varying from a net loss of 200 people in 2012/13 and 2013/14, to a net gain of 300 people in 2006/07.

Net migration from the rest of the UK has been positive over the last 12 years. In 2015/16 there was a net gain of 300 people compared to 1,100 people in 2003/04.

Population projections

These are trend-based and do not take into account shifts in government policy and other social and economic factors that influence population change, including the UK's decision to leave the EU.

	Scottish borders	Scotland
Projected population change over the next 25 years	+2.7%	+6.6%

Figure 4: Components of projected population change over next 25 years (2014 – 2039)

Source: Population Projections for Scottish areas, National Records of Scotland (NRS)

The projected increase in Scottish Borders population over the next 25 years is attributable mostly to gains from migration from the rest of the UK, followed by migration within Scotland.

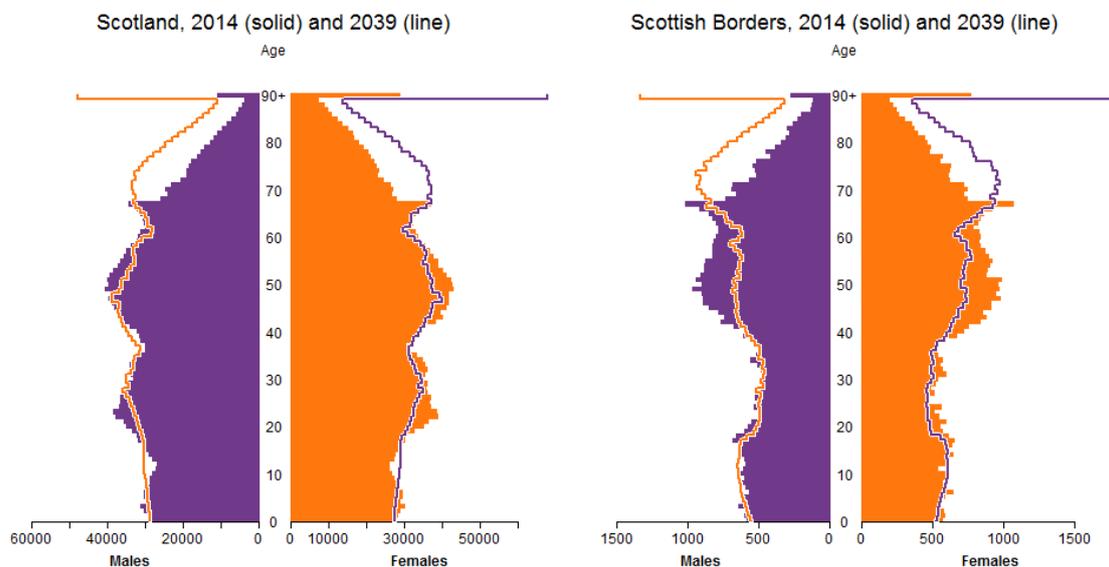

Changing age structure

The demographic resilience of local areas is affected by the changing age structure of the population and levels of migration. Working age migrants can play an important role in addressing the ageing population.

Over the next 25 years, Scottish Borders is projected to experience a 51% increase in population aged 65 or over, with the male population projected to increase by 7,100 (+59%) compared to 6,400 (+45%) for females.

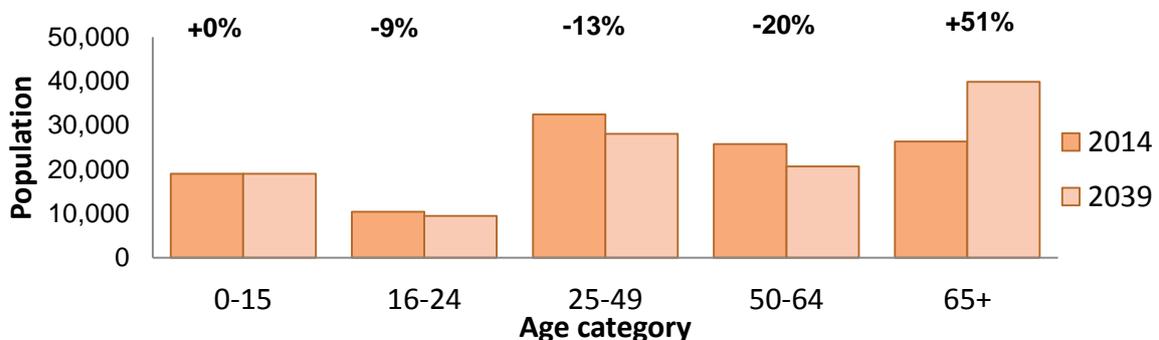

In contrast, there is a projected decrease in the working age population (aged 16-64) of 15% with the largest decrease (-20%) in those aged 50-64.

Nationalities of National Insurance Number (NINo) allocations to overseas nationals in 2015

A NINo is generally required by any overseas national looking to work or claim benefits / tax credits in the UK, including the self-employed or students working part time.

	Number of nationalities	Top five nationalities (NINo allocations)
Scottish borders	24	Poland, Romania, Ireland, Australia, Italy
Scotland	129	Poland, Romania, Spain, Italy, Bulgaria

Economic activity

According to the 2011 census, a higher percentage of Scottish Borders's EEA-born residents aged 16 and over were in employment (68%; 2,000 people) compared with the total population aged 16 and over of the council area (58%). A smaller proportion of EEA residents were economically inactive¹ (26%; 750 people compared with the total population (38%).

Figure 7: Percentage of people aged 16 and over in each category of economic activity by country of birth, Scottish Borders, 2011

Source: Scotland's Census 2011, National Records of Scotland (NRS)

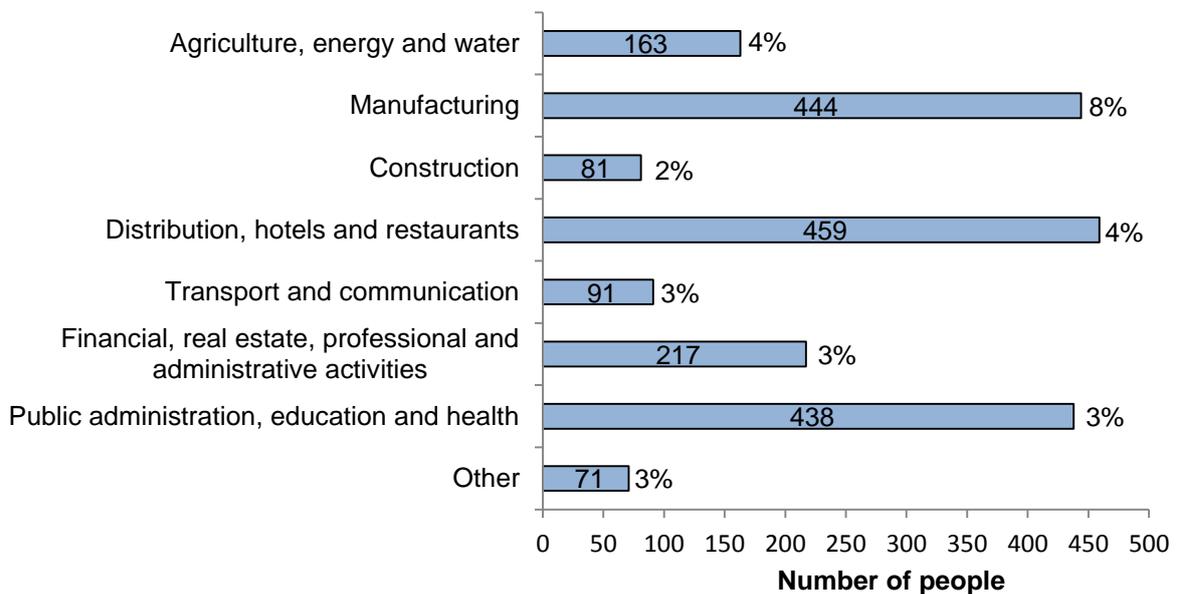

¹ Economic inactive people include: students not seeking employment, people who are retired, and other people not seeking employment (such as those who are long-term sick or disabled or who are looking after a home or family).

Industry of employment

A total of 2,000 EEA-born residents of Scottish Borders aged 16-74 were in employment at the time of the 2011 Census. The largest numbers by industrial sector were: Distribution, hotels and restaurants (460 people) and Public administration, education and health (440).

In 2011, EEA-born people made up 4% of all residents of Scottish Borders aged 16-74 in employment. The industrial sector in which this proportion was highest was manufacturing (8%).

National Statistics Socio-economic classification (NS-SeC) and education

In 2011, the proportion of EEA-born residents of Scottish Borders aged 16-74 who held a degree level qualification (1,100 people; 39%) was higher than for all people aged 16-74 in the council area (28%). This qualification gap tended to be greater in lower level occupation categories.

Figure 9: Percentage of people aged 16-74 with a degree level qualification² in each NS-SeC³ category by country of birth, Scottish Borders, 2011

Source: Scotland's Census 2011, National Records of Scotland (NRS)

² In the 2011 Census, this is defined as Level 4 and above and includes: Degree, Postgraduate qualifications, Masters, PhD, SVQ level 5 or equivalent; Professional qualifications (for example, teaching, nursing, accountancy); Other Higher Education qualifications not already mentioned (including foreign qualifications).

³ The National Statistics Socio-economic Classification (NS-SeC) provides an indication of socio-economic position based on occupation. It is an Office for National Statistics standard classification.
