Footnotes

1) The figures for 1981 are from the Census.

2) For the 1981 Census, 'households with children' included children aged 0-15. For the 1991, 2001 and 2011 Censuses, the definition of a dependent child also included those aged 16-18 in full-time education.

3) The figures for 1991, 2001 and 2011 are from the Census and mid-year population estimates.

4) The figures for 2002 onwards are from the Scottish Household Survey (SHS). These figures are adjusted to each year's household estimates (Table 1). They are then adjusted by an amount calculated from the differences between these results and the census in 2001 and 2011, to account for any under or over-count of a household type in the SHS. The figures for 2001 to 2011 have been revised since the publication of 'Estimates of Households and Dwellings, 2012' to fully reflect the results of the 2011 Census.

Household numbers are rounded to the nearest 1,000.
