Information about Scotland's people

HOUSEHOLD ESTIMATES FOR SCOTLAND, 2005

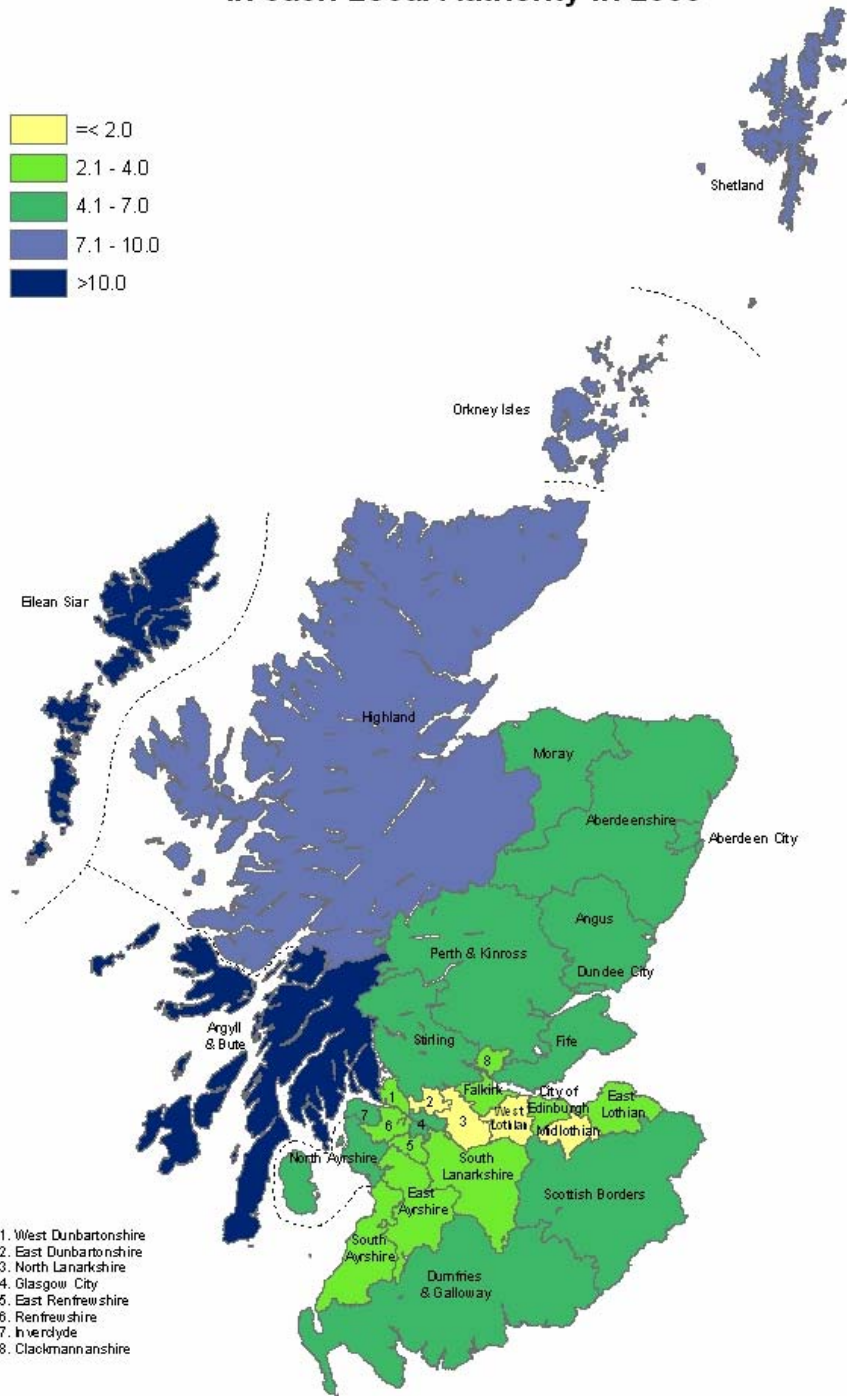

1. Summary and key findings

This publication contains household estimates for Scotland, including background information on occupied and vacant dwellings, and trends in household types.

Key findings are:

- **Number of households:** There were 2.27 million households in Scotland in June 2005, an increase of 22,000 (1 per cent) over the past year. The number of households in Scotland has increased steadily since 1991, by between 0.5 and 1 per cent each year. This year's increase is partly because there are more dwellings and partly because more existing dwellings are occupied.
- **Dwellings:** There were 2.40 million dwellings (self-contained units of accommodation such as a house or flat) in Scotland in September 2005. The number of dwellings has been increasing by around 0.8 per cent per year – an increase of nearly 20,000 over the past year.
- **Vacant dwellings and second homes:** The biggest change in trend has been in the number of vacant dwellings and second homes. Up to 2003, there was an increase each year, but since then the figures have started to decline, with a reduction of over 2,300 vacant dwellings and second homes over the past year. Overall, 4.5 per cent of all dwellings in Scotland were vacant or second homes in 2005 (including some self-catering holiday accommodation). The figures are highest in the island authorities, Argyll & Bute and Highland.
- It is too soon to be certain about the causes of this decrease in the number of vacant dwellings and second homes. It could be caused by changes in the housing market, and may have been influenced by a change in Council Tax policy which gave councils the discretion to reduce the Council Tax discount for second homes and long term empty properties. However, this policy was introduced in April 2005, one year after the decline first started.
- **Councils:** Aberdeenshire and Highland showed the largest percentage increase in the number of households over the past year (1.9 per cent), due to a combination of more dwellings, and more of the existing dwellings being occupied.
- **Size of households:** Since 1991, Scotland's population has fallen by 0.1 per cent. The number of households is increasing while the population is declining, because the average household size is getting smaller, with fewer large households and more people living alone.

Percentage of dwellings that are vacant or second homes in each Local Authority in 2005

Tables and charts

The following tables and charts are available:

Table 1: Household estimates for Scotland by local authority area, June 1991 to 2005

Table 2: Number of dwellings in Scotland by local authority area, September 2001 to 2005

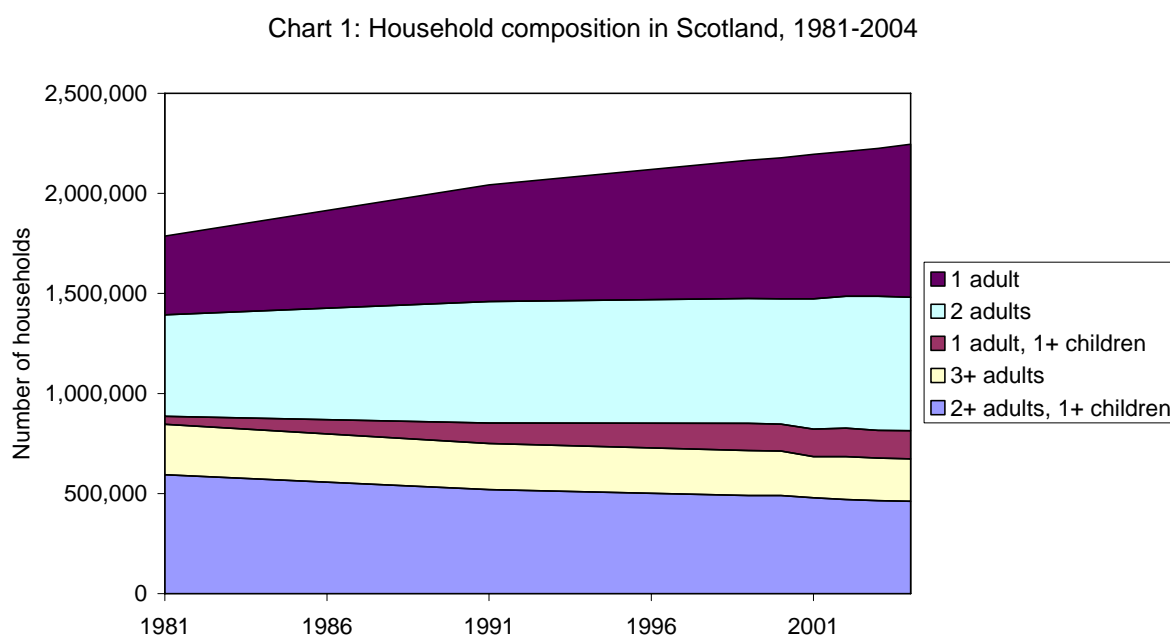

Table 3: Vacant dwellings and second homes in Scotland by local authority area, September 2001 to 2005

Table 4: Occupied dwellings in Scotland by local authority area, September 2001 to 2005

Table 5: Trends in household composition, Scotland, 1981-2004

Map 1: Percentage of dwellings that are vacant or second homes in each local authority, 2005

Chart 1: Household composition in Scotland, 1981-2004

Sources: 1981: Census. 1991: Census and mid-year population estimate
1999-2004: Scottish Household Survey

2. Purpose of household estimates

Household estimates are used for compiling and monitoring housing plans. They are also used to plan service provision, and as the denominator for other statistics, such as the percentage of households receiving benefits. Household estimates are also used in the production of household projections for Scotland, every two years.

3. Description of the methodology used

Household estimates for 2001-2005 are based on information from Council Tax billing systems. These systems contain information on each dwelling in Scotland (Table 2), and dwellings entitled to certain discounts because they are vacant or second homes (Table 3). This makes it possible to estimate the number of occupied dwellings in each local authority (Table 4).

This information is provided by each council to the Scottish Executive's Local Government Finance Statistics Branch each September, via the form CTAXBASE (<http://www.scotland.gov.uk/Topics/Statistics/16945/8104>). The figures contained in Tables 1-4 are based on these figures.

The number of occupied dwellings based on Council Tax figures (Table 4) is not exactly the same as the number of households recorded in the Census, due to differences in the way that certain types of dwellings are treated. These include shared dwellings, some communal establishments, some holiday accommodation, and dwellings occupied entirely by adults who are 'disregarded' for the purpose of paying Council Tax. Therefore, the figures are adjusted to the 2001 Census results, to obtain an estimate of the number of households in each local authority in Scotland (Table 1). The figures in Table 1 are also adjusted from September to June, to provide comparable figures with the estimates from 1991-2001 (see below). This means that the change in the number of occupied dwellings each year will not exactly match the change in the number of households, though the trends over time will be consistent.

Council Tax was introduced in the early 1990s, so a different source must be used to provide household estimates going back to 1991. Household estimates for 1991 to 2001, are based on population estimates (Table 1). This involves taking each year's mid-year population estimate, subtracting the number of people living in communal establishments, and using information from the 1991 and 2001 Censuses to estimate the number of households.

Council Tax systems contain little information about the type of household, so the Scottish Household Survey is used to estimate the number of households of each type, in Scotland as a whole (Table 5). The sample size of this survey is not large enough to provide reliable information on each household type in each local authority area.

A detailed description of the methodology and sources used can be found in the publication 'Household Estimates 2004', available from the GROS website at <http://www.gros-scotland.gov.uk/statistics/library/household-estimates-projections/index.html>.

4. Definitions

The following definitions are used in this publication:

- **Household:** This publication uses the same definition of a household as the 2001 Census - one person living alone, or a group of people (not necessarily related) living at the same address with common housekeeping (that is, sharing either a living room or sitting room or at least one meal a day). This excludes people living in communal establishments.
- **Private household population:** The population living in private households, i.e., people not living in communal establishments.
- **Communal establishment:** An establishment providing managed residential accommodation, such as a care home, prison, barracks or student hall of residence. 'Managed' means full-time or part-time supervision of the accommodation.
- **Dwelling:** A dwelling is a self-contained unit of accommodation, such as a house or flat. This does not include free-standing lock-ups.
- **Vacant dwelling:** Dwellings that are exempt from paying Council Tax because they are unoccupied, and dwellings entitled to a second home or long-term empty property discount. This includes self-catering holiday accommodation available to let for up to 140 days per year.
- **Occupied dwelling:** All dwellings, minus those that are vacant or second homes.

5. Changes to council tax systems introduced in April 2005

As of 1 April 2005, Local Authorities in Scotland were given discretion to reduce or retain the Council Tax discount for second homes and long term empty properties to between 10 per cent and 50 per cent. Nineteen Local Authorities decided to reduce the discount to 10 per cent for both classes of property, three reduced it to 10 per cent for second homes only and 10 retained the 50 per cent discount for both. Individual council policies are set out in the table below.

Local Authority Policies on Council Tax Discount for Second Homes and Long Term Empty Properties

NATIONAL STATISTICS This is a National Statistics publication. It has been produced to high professional standards set out in the National Statistics Code of Practice and Release Practice Protocol (http://www.statistics.gov.uk/about_ns/cop/default.asp).

These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

THE GENERAL REGISTER OFFICE FOR SCOTLAND (GROS) We are the department of the devolved Scottish Administration responsible for the registration of births, marriages, deaths, divorces, and adoptions in Scotland. We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce population statistics. We make available important information for family history. Our website is www.scotland.gov.uk, and the household estimates page is available at <http://www.scotland.gov.uk/statistics/library/household-estimates-projections/index.html>

ENQUIRIES ABOUT THIS PUBLICATION Enquiries should be addressed to:
Household Estimates Branch, General Register Office for Scotland, Ladywell House, Edinburgh, EH12 7TF
Telephone: (0131) 314 4251, e-mail: esther.roughsedge@gro-scotland.gsi.gov.uk

OTHER GROS STATISTICS Further detailed statistics produced by GROS are available from the Statistics Library on the GROS website (<http://www.scotland.gov.uk/statistics/library/index.html>). Statistics from the 2001 Census are on the website, Scotland's Census Results On-Line (www.scrol.gov.uk). See also the Census section of the main website (<http://www.scotland.gov.uk/statistics/census/index.html>).

Information about future publications is provided on the GROS website (<http://www.scotland.gov.uk/futurepb.html>).

COMPLAINTS AND SUGGESTIONS If you are not satisfied with our service, please write to Peter Scrimgeour, Head of Statistics Division, Ladywell House, Ladywell Road, Edinburgh, EH12 7TF, Telephone: (0131) 314 4290, e-mail: peter.scrimgeour@gro-scotland.gsi.gov.uk.

We also welcome any comments or suggestions that would help us to improve our standards of service.

- Figures for 1991 to 2001 are based on the number of households recorded in the 1991 and 2001 Censuses, and the mid-year population estimates.
- Figures for 2002 to 2005 are based on the number of occupied dwellings (Table 4), adjusted to the number of households recorded in the 2001 Census.
- The number of occupied dwellings recorded in Table 4 is not exactly the same as the number of households recorded in the Census, due to the way that some dwellings are treated. This includes shared dwellings, communal establishments, some holiday accommodation and dwellings occupied entirely by adults who are 'disregarded' for Council Tax purposes. Therefore, the figures are adjusted to the 2001 Census results to produce these household estimates.
- The figures are also adjusted from September to June for comparative purposes. This means that the yearly change in the number of households recorded in this table will not exactly match the change in the number of occupied dwellings recorded in Table 4, but the trends over time will be consistent.

Table 2: Number of dwellings in Scotland by local authority area¹⁻³, September 2001-2005

1. Total number of dwellings in Council Tax valuation list (excluding free-standing lock-ups), as provided by councils.

2. Figures include vacant dwellings and second homes

3. In some cases, the number of dwellings recorded in Council Tax systems can differ from the 2001 Census due to different definitions used.

For example, Council Tax systems will only include a caravan if it is someone's main residence, but some caravan parks were included in the 2001 Census.

Table 3: Vacant dwellings and second homes in Scotland by local authority area^{1,2}, September 2001-2005

1. Figures include:

- Unoccupied dwellings that are exempt from Council Tax
- Dwellings subject to second home or long-term empty property discount (including holiday homes and self-catering accommodation available to let for less than 140 days per year)
- Dwellings occupied entirely by adults who are 'disregarded' for the purpose of paying Council Tax, such as adults who are severely mentally impaired.

2. The figures recorded here may fluctuate for two main reasons:

- Self-catering holiday accommodation available to let for less than 140 days per year will be included here. If it is let for more than this, it will be included on the non-domestic rates valuation roll instead. This means that it is possible for properties to move between being recorded as an unoccupied dwelling or a business.
- There can be delays in the information on Council Tax systems being updated, which are most likely to affect the information on any discounts, such as vacancy status. This is most likely to lead to fluctuations in areas with high turnover, or high levels of vacancies or second homes.

3. The percentage of dwellings recorded in Table 2.

Table 4: Occupied dwellings in Scotland by local authority area^{1,2}, September 2001-2005

1. All dwellings (Table 2), minus the number of vacant dwellings and second homes (Table 3)

2. The number of occupied dwellings is not equivalent to the number of households. These figures are adjusted to produce the household estimates shown in Table 1. The footnotes to Table 1 summarise the differences between the two sets of figures.

3. The percentage of dwellings recorded in Table 2.

Table 5: Trends in household composition, Scotland, 1981-2004¹⁻³

1 The figures for 1981 are from the Census. For the 1981 Census, households with children just included children aged 0-15; for the 1991 and 2001 Censuses, the definition of a dependent child also included those aged 16-18 in full time education.

2 The figures for 1991 are from the Census and mid-year population estimates (Table 1)

2 The figures for 1999-2004 are from the Scottish Household Survey (SHS). These figures are adjusted to each year's household estimates (Table 1), and adjusted to the 2001 Census to adjust for any under- or over-count in the SHS.

The SHS has a sample size of around 15,000 households per year. More information about it is available from www.scotland.gov.uk/shs

3 Figures are rounded to the nearest 1,000.
