Footnotes

- 1) This is the 2014-based principal population projection for Scotland, published on the NRS website.
 - 2) The average household size is calculated by dividing the private household population (population minus people living in communal establishments) by the total number of households for each year. The private household population is available in Table D of the 'Source Data Tables' published with the 2014-based household projections.
 - 3) Average annual change is the result of dividing the absolute change (before rounding) by the number of years referred to.
- Household figures are rounded to the nearest whole number.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection).
Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Footnote
¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Table 19: Household projections for Scotland, by council area, 2014 - 2039, households headed by someone aged 75+

¹ Average annual change is the result of dividing the absolute change between 2014 and 2039 (before rounding) by 25 (the number of years of the projection). Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.

Explanation of the different variant projections is found in section 4 of the 'Household Projections for Scotland (2014-based)' publication.

1) The figure for 2014 is the same in all projections as they are all constrained to the household estimate for this year.

Household figures are rounded to the nearest whole number. As a result, totals may not equal the sum of their parts.
