INTRODUCTION

This report is one of five printed reports presenting the main results from the 2001 Census in Scotland. The report provides summary statistics for the majority of Census questions and topics for each Council area and Health Board area. It is published under the authority of, and to meet the requirements of, Section 4(1) of the Census Act 1920.

2001 Census Reports

There are five printed reports presenting the main results of Scotland's Census 2001.

Scotland's Census 2001 - 2001 Population Report (GROS 2002, ISBN 1-874451-66-4).

This report gives population by age and sex for Council areas.

The Registrar General's 2001 Census Report to the Scottish Parliament
(GROS 2003, ISBN 1-874451-70-2).

This is a summary report introducing the Census results – mainly at Scotland level. It also contains some brief commentary on the findings.

Key Statistics for Council areas and Health Board areas, Scotland
(GROS 2003, ISBN 1-874451-67-2).

This report provides summary statistics covering the majority of Census topics for Council and Health Board areas.

Key Statistics for Settlements and Localities, Scotland (GROS 2003, ISBN 1-874451-68-0).

This report provides summary statistics covering the majority of Census topics for Settlements and Localities.

Scotland's Census 2001 - Reference Volume (GROS 2003, ISBN 1-874451-69-9).

This report contains, for Scotland level only, the detailed statistical tables produced for the Census. It is useful as a guide to the many tables that are only available electronically. Comparable tables are available electronically for Council areas, Health Board areas, and a range of other areas.

Information in this report

This report, *Key Statistics for Council areas and Health Board areas Scotland*, is intended as a compact summary volume, providing key Census results in an easily understandable and accessible format. It has also been made available on the GROS website at www.gro-scotland.gov.uk.

This report contains 24 tables, each giving information for Scotland, for 32 Council areas and for 15 Health Board areas. Table titles are listed on the contents page.

The results in this report are a combination of counts, percentages, and derived statistics.

- Counts provide a population total (see **Definitions** - Populations covered in this report) or a subset of that total. Occasionally, a count is given for a group, which is not a subset of the population, covered by the bulk of the tables (such as the number of students away from home in **Table KS01**).
- Most results are expressed as percentages. The count to which the percentage relates is normally self-evident and is usually a count shown earlier in the same row of the table. Percentages are expressed to two decimal places. Note that where a percentage appears, the corresponding count can be approximated by applying the percentage to the appropriate population total.
- Derived statistics are used to indicate averages or ratios where necessary. For example average (mean) number of rooms per household appears in **KS19**, both average (mean) age and median age are used in **KS02**, and population density ratio appears in **KS01**.

Information on daytime population and the distance travelled to work, which was intended to be included in **Tables KS01 and KS15** is not available at the time of publication of this report but will be provided once available in electronic formats along with results for smaller areas. The blank columns 'n' in both have been retained in the tables published in this report to maintain consistency between table specifications within the Key Statistics reports and those in other products containing Key Statistics.

Similarly, migration within the UK, which was intended to be included in **Table KS24** columns 'd, f, g, j, l and m' is not available at time of going to print but will be provided once available in electronic formats.

Most of these tables are being produced not only for Scotland but for other parts of the UK as well. Accordingly, the order of countries in **KS05** lists the four UK countries in a common order, in descending size in terms of population, with England first. Tables produced for Scotland only:

Table KS01	Usual resident population
Table KS06	Ethnic group and language
Table KS07	Current religion
Table KS13	Qualifications and students
Table KS15	Travel to work and place of study
Table KS16	Dwellings, household spaces and accommodation type
Table KS18	Tenure and landlord

The tables in this report form only a small subset of the results to be made available from the 2001 Census. Information on further results and the different methods of accessing the results are provided in the **Further Information** section on page 4. More detailed information on the terms used in tables; comparability with 1991; the Census questions; and response and imputation rates is available as part of the Supporting Information for the Census results. This can be found in the electronic document *'Scotland's Census - A guide to the results and how to obtain them'* on the Census pages of the GROS website (www.gro-scotland.gov.uk) or by contacting GROS Customer Services.

Comparisons with the 1991 Census

The 2001 Census results have been adjusted to take account of estimated undercoverage in the Census based on the One Number Census methodology, which used the results of the Census Coverage Survey (see page 8 for more detail on the **One Number Census**). **Table KS01** includes population figures re-aggregated from the 1991 Census which were not adjusted for under-enumeration like those for 2001, **so the 1991 and 2001 figures are not truly comparable**. Comparisons of 1991 and 2001 population figures for Council areas and Health Board areas are more appropriate using the revised set of population estimates for 1991 to be produced in February 2003 which will be available on the GROS website (www.gro-scotland.gov.uk). The original figures from the 1991 Census are included in **KS01** because the table is also available for areas such as 2001 wards for which there will be no revised 1991 figure for comparison, and because there is a requirement to maintain a common format for the table for all types of areas. For more information on the availability of Key Statistics for other areas see the **Further Information** section on page 4 or contact GROS Customer Services.

FURTHER INFORMATION

More detailed statistics covering the full range of topics from the 2001 Census in Scotland will be available by March 2003. Descriptions of the products and how they will be delivered are available in the Supporting Information section of the electronic document '*Scotland's Census – A guide to the results and how to obtain them*', which is available on the Census pages of the GROS website (www.gro-scotland.gov.uk).

SCROL (Scotland's Census Results On Line)

SCROL, accessible at www.scrol.gov.uk, from March 2003 will progressively provide free on line access to all of the detailed results from the 2001 Census in Scotland.

In addition to the website, a series of CD-ROMs has also been developed. These provide access to a wider range of data than the SCROL website, along with more functionality for analysing the results.

Contacts

Further information about the Census products, or assistance in finding the appropriate data or requests for additional data not part of the Census products can be obtained from GROS Customer Services.

2001 CENSUS BACKGROUND

Consultation

Potential users of the results from 2001 Census have been consulted since 1996, when plans for the first tests of procedures and questions were being planned. A White Paper *'The 2001 Census of Population'* published in March 1999 set out the (pre-devolution) UK government's plans for the 2001 Census. Further major consultations involving Roadshows and consultation papers took place in spring 1999 and autumn 2001 to identify user needs and to assist the design of the results to be produced from the collected data.

Legislation

The 1920 Census Act allows for the carrying out of a Census no sooner than five years after the previous Census. However, various other legislative requirements need to be fulfilled before a Census can be held. In the period up to publication of the White Paper, the Census Offices and users had been refining both the business cases for each Census topic and the wording of the question (or questions) to be asked in order to obtain the required information. Prior to every Census, a Census Order is required. This states the date of the Census, the people who are required to complete the form, those who are to be included on the form and the topics on which questions will be asked. The operational aspects of the Census also require legislative approval. This information is set out in Census Regulations, which contain details of how the Census is to be conducted. The Regulations include a copy of the Census form. The decision to include a question on religion in the 2001 Census, resulted in additional legislation, with the 1920 Census Act, Census Order 2000 and Census Regulations 2000 all requiring amendment to make provision for religion information to be asked.

Fieldwork

The Census was designed to collect information on the resident population on Census Day - 29 April 2001. Ahead of this day, enumerators delivered Census forms to every identified household space and communal establishment. Residents were asked to complete the forms with the information as correct on Census Day, and to return the completed forms by post. If a completed form was not received back, an enumerator visited the address in order to collect the form by hand or to issue a reminder to post back. Special arrangements were made to enumerate the Armed Forces and people sleeping rough. The overall response rate (that is, the proportion of people included on a returned Census form) is estimated as 96 per cent.

The Census was followed by the Census Coverage Survey (CCS), which took place between 24 May and 18 June 2001. This was an interview survey of some 36,000 households and 92 communal

establishments in Scotland. Comparison of the results of the CCS with the Census was used to adjust the Census counts for under-enumeration (see the **One Number Census** paragraphs). The CCS achieved a household response rate (the proportion of identified households, which were successfully interviewed) of 95 per cent.

Census content

The results are based on the information collected from the Census forms. Copies of the Census forms used are contained in the *2001 Census Definitions Volume* or available on the Census pages of the GROS website (www.gro-scotland.gov.uk). All questions included in the 1991 Census were included in the 2001 Census with the exception of questions relating to usual address and whereabouts on Census night (see **Populations covered in this report** in the **Definitions** section on page 11). However, the answer categories in some questions, such as ethnic group were updated. There were also new questions on general health, the provision of unpaid care, time since last paid employment, the size of work force at place of work, supervision of employees and two voluntary questions on religion.

The Census questions asked of all people covered:

- sex, age (date of birth) and marital status
- relationship to others in the household (where applicable)
- whether schoolchild/student
- whether term-time address
- country of birth
- ethnic group
- religion - current and upbringing
- health
- limiting long-term illness
- provision of unpaid care
- address one year ago
- address of place of work or study
- means of travel to work or study
- knowledge of Gaelic

whilst questions for those aged 16 to 74 covered:

- qualifications
- economic activity and employment status
- number of employees at place of work
- year since last employed
- occupation and industry of employment
- hours worked

in addition, the person filling in the form in each household was asked about:

- type of accommodation and whether self-contained
- number of rooms
- availability of bath/shower and toilet
- lowest floor level
- presence of central heating
- availability of cars or vans
- tenure
- landlord
- whether or not accommodation was rented as furnished

Processing

Returned forms were fed through scanning machinery, which captured all the ticked responses, and stored most written answers in digital form. The latter were coded into categories either by automatic systems, which recognise terms given in response to questions, or by manual coding. This data was then edited to ensure that the data was consistent, and was followed by an imputation process to supply responses for questions, which had not been completed on the original form.

One Number Census

Following the 1991 Census, it was acknowledged that the Census suffered from a degree of undercount, the extent and nature of which was not identified by the 1991 Census Validation Survey. As a result the detailed 1991 Census tables were not consistent with the final estimate of 1991 Census Day population.

To avoid a similar situation following the 2001 Census, the Census Coverage Survey (CCS) and the One Number Census (ONC) projects were initiated.

The 2001 CCS was an intensive enumeration of a representative sample of postcodes in Scotland and was designed to be independent of the Census and provide the ONC Project with the required data to estimate underenumeration. The ONC Project derives its name from the intention to eliminate different population counts so that all Census outputs add to one number – the national population estimate that has been adjusted for undercounting. The ONC Project ensured that the most appropriate estimation procedures were used to calculate the final Census data.

More detail on the conduct of the One Number Census is available on the Census pages of the GROS website (www.gro-scotland.gov.uk).

Comparability with the 1991 Census

Given the approach taken to estimating underenumeration in the 2001 Census, it is not appropriate to compare the 2001 Census results directly with the 1991 Census results. This is because the 2001 Census results cover the whole population but the 1991 Census results did not. In many cases a comparison of percentage distributions will give a more useful comparison than a comparison of counts.

A comparison of the coverage achieved in the 1991 and 2001 Censuses is presented in the table below.

	<i>percentage</i>	
	1991	2001
Enumerated in the Census	96.9	96.1
People identified as missing and included in Census results	1.2	3.9
Census coverage of the population	98.1	100
Missing but not included in Census results	1.9	0
Total	100	100

The level of actual Census enumeration was similar in 1991 and 2001, 96.9 per cent compared with 96.1 per cent, respectively. But, as the table shows, the 2001 Census results cover the whole population compared with 98.1 per cent coverage in the 1991 Census. The difference in coverage lies in the approach to estimating under-enumeration in the two Censuses.

In 1991, the Census method allowed enumerators to identify many occupied households where the people within them had not returned a form and include an allowance for them in the Census tables. This gave an overall coverage of 98.1 per cent. The method did not enable enumerators to identify people missed from households where a form was returned, nor to make an allowance for any occupied households that they failed to locate. Using data from administrative sources and the 1991 Census Validation Survey it was estimated that these people accounted for about 1.9 per cent of the population. These were not added to the Census tables.

In the 2001 Census, the One Number Census methodology allowed for both types of missing people to be adjusted for in the Census tables.

Quality of the Results

The use of the One Number Census methodology means that the results of the 2001 Census cover the entire population of Scotland, and are believed to be the most reliable results obtained by any Census in Scotland. However, there are a number of sources of potential error in the results. These include:

- Incorrect or incomplete information provided on the forms.
- Sampling error related to estimates derived through the One Number Census process.
- Unidentified dependencies between the Census and the Census Coverage Survey.
- Errors introduced during processing and imputation.

Some elements of incorrect information will have been corrected during the edit process (see **Processing** above). Other biases will have been corrected by the One Number Census process. Following this, the results have undergone an extensive quality assurance process, including checks against aggregated administrative information on particular groups such as students and the Armed Forces. Elements of dependency between the Census and Census Coverage Survey have been identified and corrected for, by cross-checking with alternative data sources.

Since the adjustments for under-enumeration through the One Number Census methodology are estimates based on a sample survey, sampling errors can be used as a guide in assessing the accuracy of the adjustments. The sampling error can be used to construct a 95 per cent confidence interval - that is a range in which we can be 95 per cent confident that the true value lies. For the population of Scotland, this confidence interval is ± 0.3 per cent of the estimated population.

Confidentiality

The Registrar General has a legal obligation not to reveal information collected in confidence in the Census about individual people and households. Protecting the Census data is of key importance and steps have been taken to safeguard confidentiality and protect against disclosure of personal information provided on the Census form. Further information is given in *'Scotland's Census – A guide to the results and how to obtain them'* on the Census pages of the GROS website (www.gro-scotland.gov.uk) or by contacting GROS Customer Services.

DEFINITIONS

Populations covered in this report

Each table in this report relates to one or more populations, where population is used in the statistical sense of an item being counted. Many tables relate to the population 'All people', but other tables relate to subsets of 'All people', such as 'People in employment aged 16 to 74', or to distinct populations such as 'All households'.

People

In the 2001 Census information was collected only on usual residents (this contrasts to the 1991 Census which collected information on both usual residents and visitors on Census night). A usual resident at an address is generally defined as someone who spends most of their time residing at that address. It includes:

- People who usually live at the address but are temporarily away from home (on holiday, visiting friends or relatives or temporarily in a hospital or similar establishment) on Census Day.
- A spouse or partner who works away from home for part of the time, or is a member of the Armed Forces.
- Students at their term-time address.
- A baby born before 30th April 2001 even if he or she is still in hospital.
- People present on Census Day, even if temporarily, who have no other usual address.

However, it does not include:

- Anyone present on Census Day who has another usual address.
- Anyone who has been living, or will live, in a special establishment such as a residential home, nursing home or hospital for six months or more.

Households

A household comprises one person living alone, or a group of people (not necessarily related) living at the same address with common housekeeping - that is, sharing either a living room or sitting room or at least one meal a day.

Communal Establishments

A communal establishment is defined as an establishment providing managed residential accommodation. Managed means full-time or part-time supervision of the accommodation.

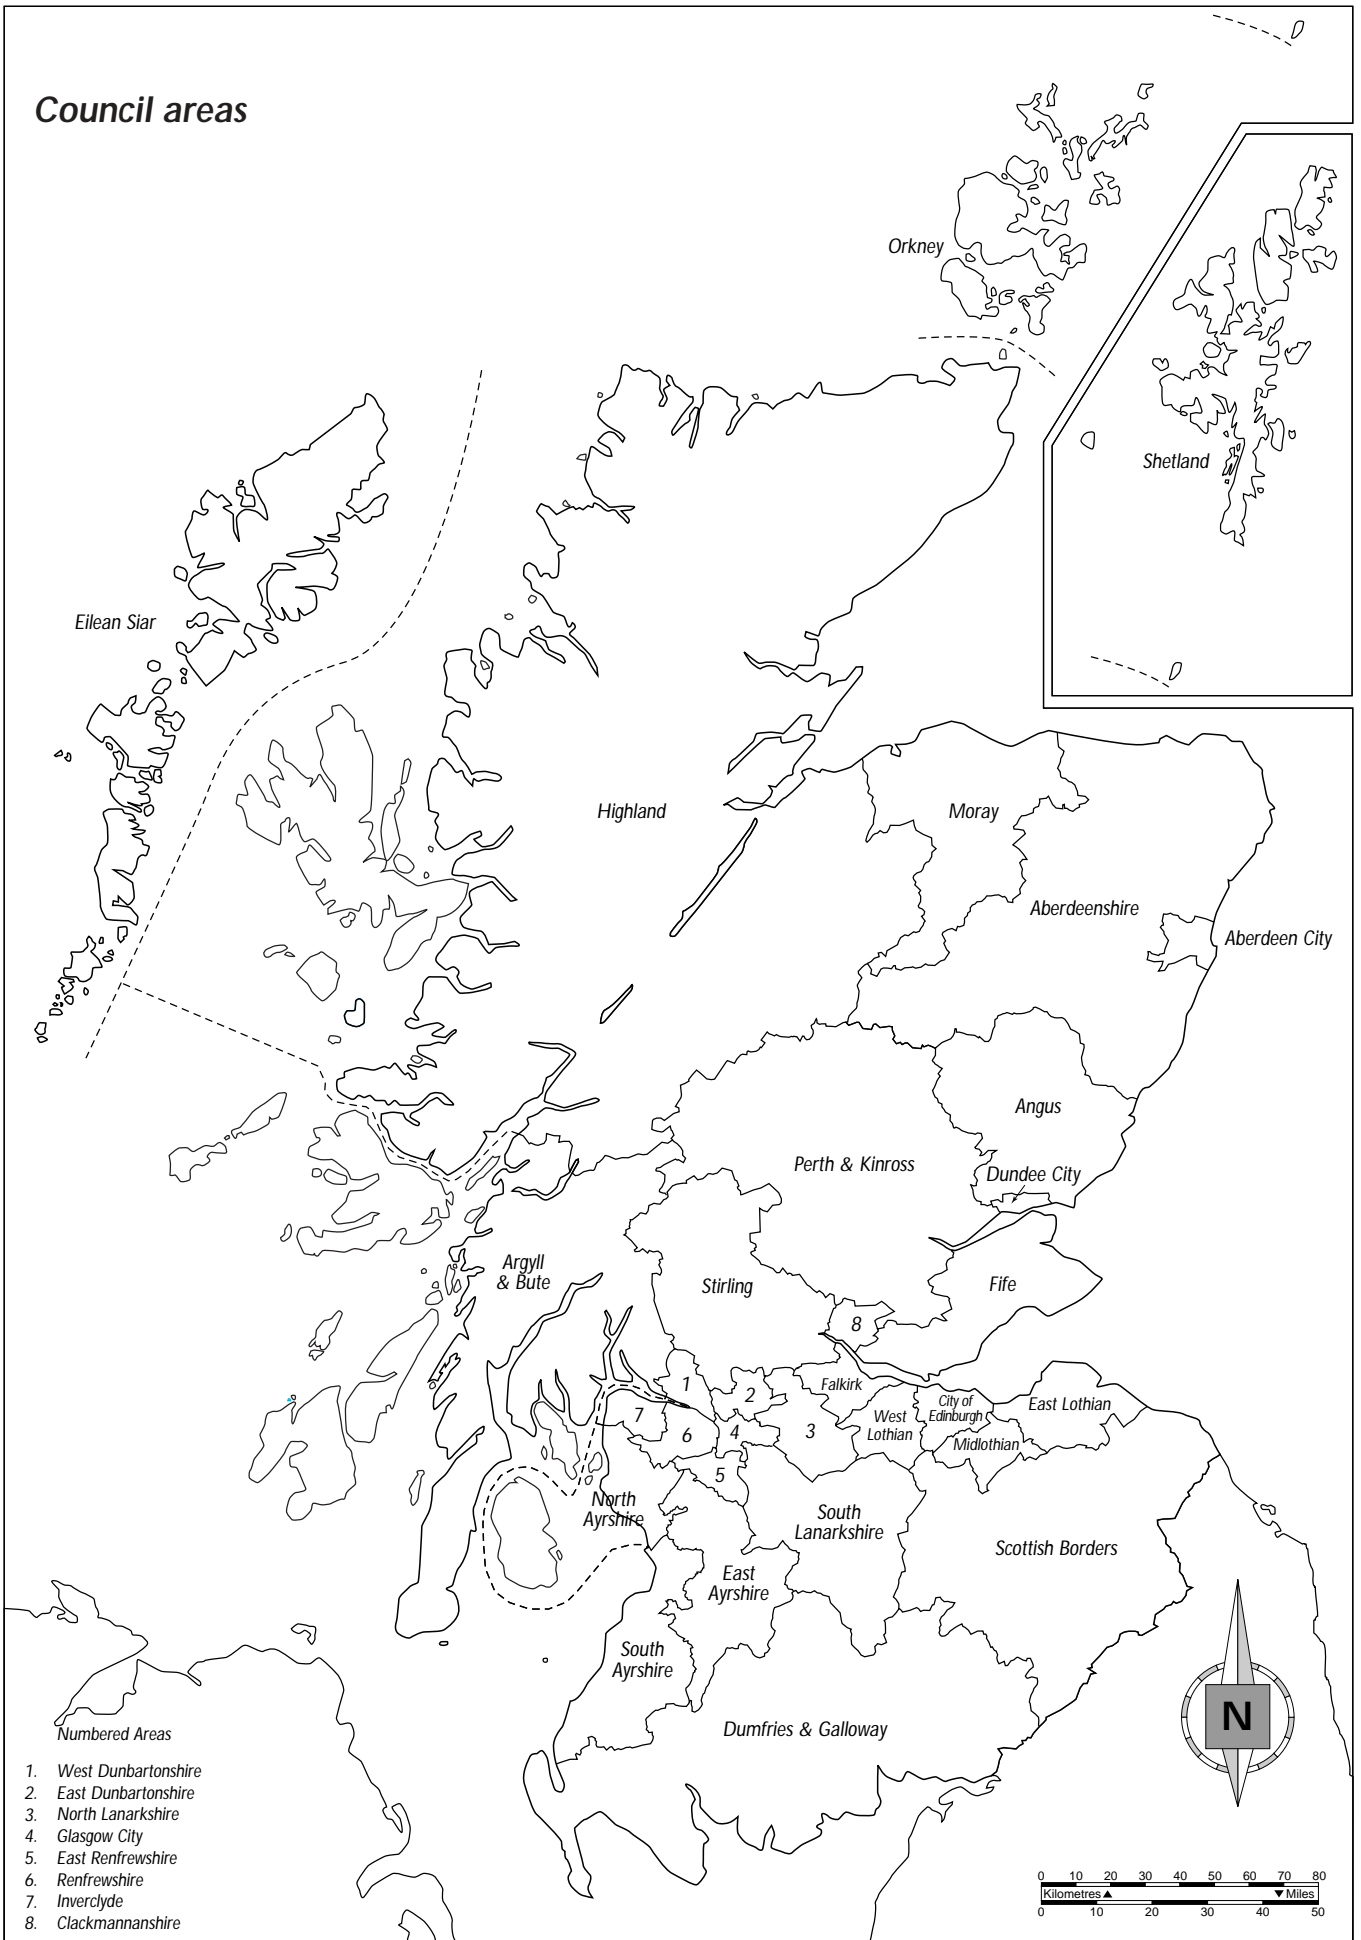

In most cases (for example, prisons, large hospitals, hotels) communal establishments can be easily identified. However, difficulties can arise with small hotels, guesthouses and sheltered accommodation.

Special rules apply in these cases:

- Small hotels and guesthouses are treated as communal establishments if they have the capacity to have 10 or more guests, excluding the owner/manager and his/her family.
- Sheltered housing is treated as a communal establishment if less than half the residents possess their own facilities for cooking. If half or more possess their own facilities for cooking (regardless of use) the whole establishment is treated as separate households.

More information on the definition of table populations can be found in the *2001 Census Definitions Volume* due to be published by the Office for National Statistics in March 2003 or from the Census Supporting Information which can be accessed via the electronic document '*Scotland's Census - A Guide to the results and how to obtain them*' on the Census pages of the GROS website (www.gro-scotland.gov.uk) or by contacting GROS Customer Services.

Footnotes:

1 Given the approach taken to estimating underenumeration in the 2001 Census, it is not appropriate to compare the 2001 Census results directly with the 1991 Census results.

For more information see Introduction under 'Comparisons with the 1991 Census'.

2 Area is on Census Day 29 April 2001.

3 'Number of students away from home' is the number of students and schoolchildren in full-time education who would reside in the area were they not living away from home in term-time.

Data for the number of students away from home was not available from the 1991 Census.

4 'Daytime' population is calculated by subtracting those living in the area but working or studying outside the area, and adding those living outside the area but working or studying inside the area, to the resident population.

Footnotes:

1 'Age' is age at last birthday.

2 'Mean age' and 'Median age' are calculated using the underlying single year counts of age last birthday. To estimate 'mean age' including part-years add 0.50 to the value shown in the table.

Footnotes:

1 'Age' is age at last birthday.

2 'Mean age' and 'Median age' are calculated using the underlying single year counts of age last birthday. To estimate 'mean age' including part-years add 0.50 to the value shown in the table.

Footnotes:

1 The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix.

Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.

2 A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Footnotes:

1 Limiting long-term illness covers any long-term illness, health problem or disability which limits daily activities or work.

2 Working age population is 16 - 64 inclusive for men and 16 - 59 inclusive for women.

3 General health refers to health over the 12 months prior to Census Day (29 April 2001).

4 Provision of unpaid care: looking after, giving help or support to family members, friends, neighbours or others because of long-term physical or mental ill-health or disability or problems relating to old age.

1 Includes any company car or van if available for private use.

2 'All cars or vans in the area' comprises only those cars and vans owned by, or available for use by, households.

This count is not exact as households with more than 10 cars or vans are counted as having 10 cars or vans.

Footnotes:

1 Pays part rent and part mortgage.

2 Includes Housing Co-operative, Charitable Trust and non-profit making company.

3 Includes employer of a household member and relative or friend of a household member and living rent free.

4 Equals the 2001 number minus the 1991 number expressed as a percentage of the 1991 number.

5 It is possible that form-fillers on housing benefit may have ticked 'living rent free' in response to the Census question on 'owns/rents'. Households recorded as living rent free are not analysed by type of landlord in this table. Users who wish to count these households by landlord and, possibly, make adjustments to this table can do so using tables UV91, UV92, T54 & T55.

Footnote:

1 The occupancy rating provides a measure of under-occupancy and overcrowding. For example, a value of -1 implies there is one room too few and that there is overcrowding in the household. The occupancy rating assumes that every household, including one person households, requires a minimum of two common rooms (excluding bathrooms).

Footnotes:

1 A dependent child is a person in a household aged 0 - 15 (whether or not in a family) or a person aged 16 - 18 who is a full-time student in a family with parent(s).

2 For the Census, part-time is defined as working 30 hours or less a week. Full-time is defined as working 31 or more hours a week.

3 In this table, a lone parent family household is a household containing one family and that family is a lone parent family.

Footnotes:

1 Table is based on Census question about each person's address one year before the Census which took place on 29 April 2001.

2 This includes people with no usual address one year before the Census.

3 People whose address one year ago was within the area but whose current address is outside the area but within the UK, expressed as a percentage of current population of the area. People in these columns do not appear in columns b and h.

KS24 Migration ¹

All people

Health Board area	All people	Percentage of these who are migrants into or within the area	Percentage of all people				All people in ethnic groups other than white	Percentage of these who are migrants into or within the area	Percentage of people in ethnic groups other than 'white'
