# 1. Main Points

The key points in this report for 2003-2005 are:

- Life expectancy at birth for Scotland was 74.2 years for males and 79.2 years for females. This varied considerably amongst areas in Scotland;
- The Council area with the highest male life expectancy was East Dunbartonshire (77.7 years), 7.8 years more than Glasgow City, the lowest at 69.9 years;
- Orkney Islands had the highest life expectancy for females (81.4 years), 4.7 years more than Glasgow City (lowest at 76.7 years);
- The NHS Board with the lowest figure for both males and females was the Greater Glasgow area (71.9 and 77.8 years respectively). The highest figures were for Orkney: males (76.3 years) and females (81.4 years).

Compared with 10 years ago in 1993-1995:

- Life expectancy at birth for Scotland has improved from 71.9 years to 74.2 years for males and 77.5 years to 79.2 years for females;
- The gap between males and females is closing, dropping from 5.6 years to 5.0 years over the period;
- Although some areas had only very small increases in life expectancy over the 10 year period, there were no areas (Council and NHS Board area) that experienced a decrease:
- The gap between highest and lowest Council areas for male and female life expectancy at birth is increasing. For males, this has increased from 7.0 years in 1993-1995 to 7.8 years in 2003-2005 and for females from 4.3 years to 4.7 years over the same period;
- The biggest rise in life expectancy for males was in the Shetland Isles (5.9%) and for females was in Argyll & Bute (3.5%);
- The smallest rise was in West Dunbartonshire (0.1%) for males and East Ayrshire (0.9%) for females.

# 2. Introduction

- 2.1 This paper summarises the Registrar General for Scotland's life expectancy figures for the period 2003-2005 for administrative areas within Scotland and compares these with results for 1993-1995. It also details a historic time-series back to the period 1981-1983 to take account of the population estimates for the 1980's which were revised following the 2001 Census and published on 30 September 2002.
- 2.2 Figures for 1991-93 to 2001-03 were provided by the Office for National Statistics (ONS) and the results published in this report use their methodology (see **Section 6.2** for more details). Life expectancy data is now produced by the General Register Office for Scotland to allow earlier publication of results.
- 2.3 The results for 2003-2005, given in **Table 1** and **Table 2**, have been ranked for ease of presentation. For Council areas, this means that "1" is the area with the highest life expectancy and "32" the lowest. Similarly, NHS Boards are ranked 1 to 19 and include information for the 15 old NHS Board areas as well as the new Board areas created following the dissolution of NHS Argyll & Clyde on 31<sup>st</sup> March 2006. NHS Argyll & Clyde was split between Greater Glasgow and Highland resulting in two new NHS Board areas named Greater Glasgow & Clyde and Highland. This paper reports results for the old and new areas as well as the two parts of NHS Argyll & Clyde. See **Section 5** for more information about the dissolution of Argyll & Clyde NHS Board and **Section 4.3** about the reliability of the results.
- 2.4 The figures quoted in this publication are all period life expectancies. Period life expectancies are calculated using age specific mortality rates for a given period with no allowance for any later actual or projected future changes in mortality after that period.

# 3. Life Expectancy at Birth

- 3.1 The figures for 2003-2005 are a three year average. They are produced by aggregating deaths and population data for the three year period. Three years are needed to provide large enough numbers to ensure that the figures published in this report are sufficiently robust.
- 3.2 Period life expectancy at birth for a given time period and area is an estimate of the average number of years a new born baby would survive if he/she experienced the particular area's age specific mortality rate for that time period throughout his/her life. The figure reflects mortality among those living in the area in each period, rather than mortality among those born in each area. It is not the number of years a baby born in the area in the period is expected to live, both because death rates are likely to change in the future and because many of the new borns may live elsewhere for at least some part of their lives.
- 3.3 Life expectancy at birth is also not a guide to the remaining expectancy of life at any given age. It reflects the fact that survival from a particular age depends only on mortality rates beyond that age, whereas survival from birth is based on mortality rates at every age. See **Table 3** and **Table 4** for more details. Life expectancy at birth provides a useful summary measure of mortality rates actually experienced over a given period and, for past years, provides an objective means of comparison of the trends in mortality over time, between areas of a country and with other countries. More information on the methodology used is given in **Section 6.2**.

#### 4. Discussion of Results

#### 4.1 The Scottish Picture

4.1.1 **Figure 1** shows that the expectation of life at birth in Scotland has improved over the last 20 years or so. It has increased from 69.3 years for males and 75.5 years for females born in the period 1981-83 to 74.2 years and 79.2 years respectively for those born in 2003-05, an increase of 4.9 years and 3.7 years respectively.

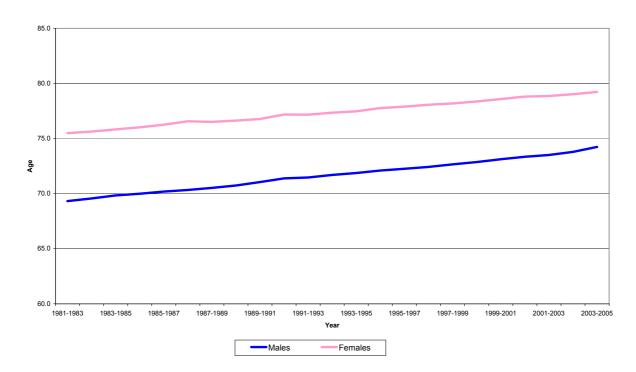

Figure 1 Estimated population of Scotland, 1981-2005

- 4.1.2 **Figure 1** also shows that the gap between males and females is closing, dropping from 6.3 years in 1981-83 to 5.0 years in 2003-05.
- 4.1.3 Alternative, but very similar, results for Scotland are also produced by ONS. For more details see **Section 6.1**.
- 4.1.4 While this report concentrates on improvements in life expectancy, mortality rates in Scotland have generally fallen more slowly than in the rest of the UK and elsewhere in Europe. The improvements are still considerable and the impact is demonstrated in the steadily rising expectation of life. However, Scottish men and woman have almost the lowest expectation of life at birth in the EU (15 states).

# 4.2 Life Expectancy at Birth 2003-2005

- 4.2.1 **Table 1** and **Table 2** show the areas with the highest and lowest life expectancy at birth in Scotland for 2003-2005 for Council and NHS Board areas.
- 4.2.2 For males, amongst the Council areas, the lowest figure was for Glasgow City (69.9 years). This was the only area in Scotland where life expectancy at birth for males was

less than 70 years in 2003-2005. The Council area with the highest life expectancy for men was East Dunbartonshire (77.7 years), 7.8 years more than Glasgow City.

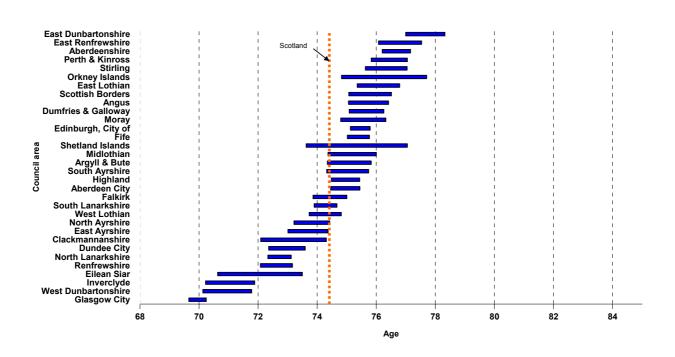

- 4.2.3 Orkney Islands has the highest life expectancy for females (81.4 years), 4.7 years more than Glasgow City, the area with the lowest figure (76.7 years).
- 4.2.4 Of the NHS Board areas, the lowest figure for both males and females was for the old Greater Glasgow area (71.9 and 77.8 years respectively). The highest was for Orkney for both males and females (76.3 and 81.4 years respectively).
- 4.2.5 **Table 3** and **Table 4** show expectation of life at an "exact age". This is the average number of years that those at this age will live thereafter. These extracts from period life tables are constructed from the estimated population in 2003, 2004 and 2005 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2003-2005. The column headed  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2003-2005 mortality probabilities from age x onwards. For example, on this basis a male aged 65 living in Glasgow City, could expect to live on average another 13.4 years, whereas a female aged 65 could expect to live on average another 17.1 years.

# 4.3 Accuracy of Results

- 4.3.1 Life expectancy at birth, like most statistics, is an estimate which is subject to a margin of error. The accuracy of the results can be indicated by calculating a confidence interval which provides a range of values within which the true underlying life expectancy would lie (with 95% probability).
- 4.3.2 The 95% confidence intervals for life expectancy at birth are given in **Table 5**, and are illustrated in **Figure 2** and **Figure 3** for Council and NHS Board areas within Scotland.
- 4.3.3 There is no simple "rule of thumb" for the size of confidence intervals, although it largely depends upon the size of the population, and so confidence intervals for areas with small populations tend to be wider. It is also worth noting that life expectancy results in these areas can be affected by the random variation in the number of annual deaths. This means that the results can be erratic and vary from year to year.
- 4.3.4 More information about the methods used to calculate the standard errors and confidence intervals used in this report can be found in the ONS methodology paper "Life expectancy at birth: methodological options for small populations". See **Section 6.2.2** for how to access this report.

<sup>^</sup> New Board areas including parts of former Argyll & Clyde.

# 4.4 Comparisons between 1993-1995 and 2003-2005

- 4.4.1 Overall, life expectancy at birth in Scotland has increased since 1993-1995 from 71.9 years to 74.2 years for males and 77.5 years to 79.2 years for females in 2003-2005. **Table 1** and **Table 2** also show the highest and lowest ranking Council and NHS Board area for both periods. The tables show the gap between males and females is closing, from 5.6 years in 1993-1995 to 5.0 years in 2003-2005. For Council areas, the gap between highest and lowest areas for male life expectancy at birth is increasing (from 7.0 years in 1993-1995 to 7.8 years in 2003-2005). For females, the gap is also increasing (from 4.3 to 4.7 years).
- 4.4.2 The maps in **Figure 4a** and **Figure 4b** and the chart in **Figure 4c** show the Council areas with the highest and lowest percentage increase over the 10 year period. For males, the Shetland Islands had the largest increase with 5.9% and West Dunbartonshire the lowest with 0.1%. For females, Argyll & Bute had the largest increase with 3.5% and East Ayrshire the lowest with 0.9%.
- 4.4.3 **Figure 5** shows similar information for NHS Boards. For males, Shetland had the largest increase at 5.9% and the Western Isles the lowest with 1.0%. For females, the Highland part of the former Argyll & Clyde had the largest increase with 3.5% and Borders the lowest with 1.3%.
- 4.4.4 Over the 10 year period the ranking of many Council and NHS Boards has changed (**Table 1** and **Table 2**). For males, amongst the Council areas, the Shetland Islands has risen 13 places to 14<sup>th</sup> while Clackmannanshire has fallen 12 places to 25<sup>th</sup>. For females, Argyll & Bute has risen 12 places to 6<sup>th</sup> while Scottish Borders has fallen 10 places to 14<sup>th</sup>.
- 4.4.5 Of the NHS Boards, Shetland has risen 9 places to 6<sup>th</sup> and Forth Valley has fallen 6 places to 12<sup>th</sup> for males. For females, the Highland part of the former Argyll & Clyde area has risen 8 places to 3<sup>rd</sup> and Borders has fallen 6 places to 8<sup>th</sup>.
- 4.4.6 Of course, when confidence intervals for the results are taken into account, the rise and fall of the rankings over time are not exact, especially for areas with relatively small populations such as Orkney and Shetland. Confidence intervals for 1993-1995 are not presented here, but they are available from the Office for National Statistics (ONS) website through the following link:

http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8841&Pos=&ColRank=1&Rank=2

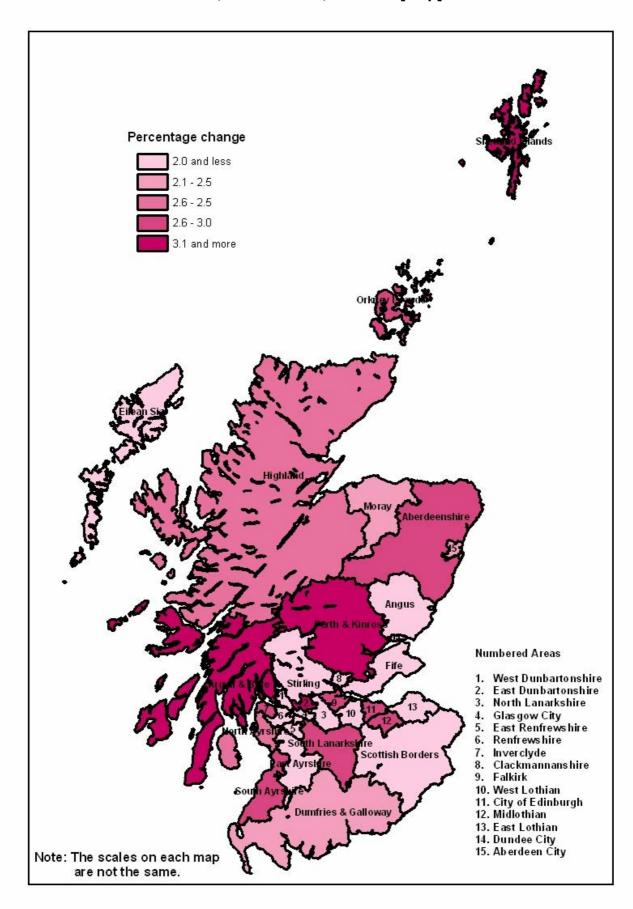

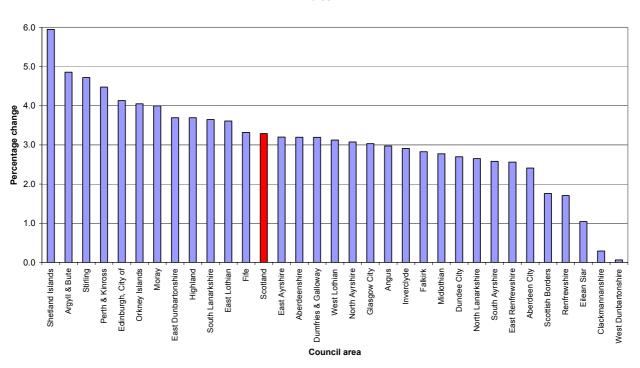

Figure 4c Percentage change in life expectancy at birth between 1993-95 and 2003-05, Council area, Males and Females

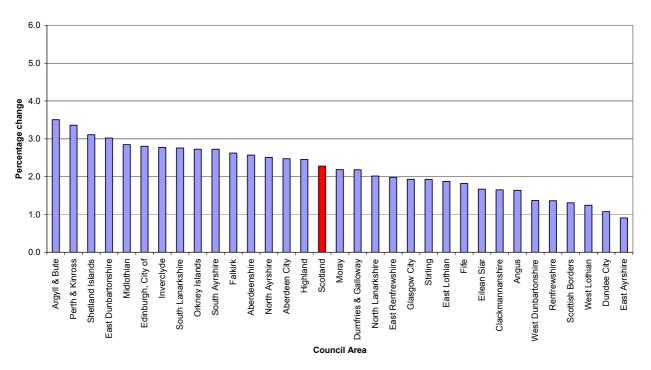

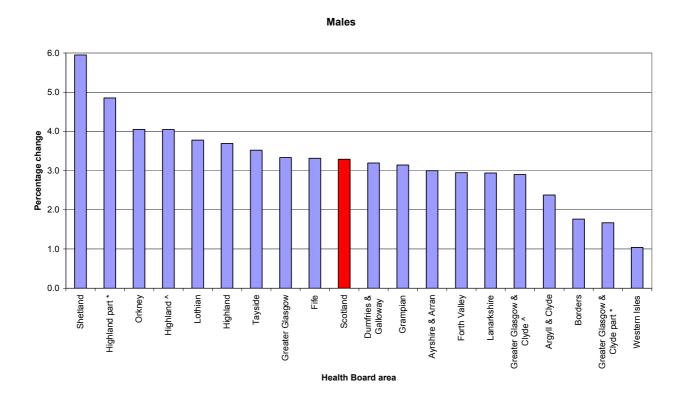

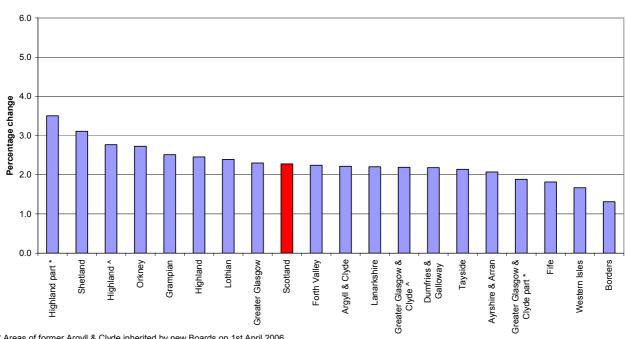

Figure 5 Percentage change in life expectancy at birth between 1993-95 and 2003-05, NHS Board area, Males and Females

<sup>\*</sup> Areas of former Argyll & Clyde inherited by new Boards on 1st April 2006. Health Board area ^ New Board areas including parts of former Argyll & Clyde.

# 4.5 Life Expectancy Figures from 1981-1983 and Comparisons with 2003-2005

- 4.5.1 Life expectancy data has been produced for the periods 1981-1983 to 1990-1992 to take account of the population estimates for the 1980's which were revised following the 2001 Census. This data will allow a more detailed comparison to be made of the long-term trends in life expectancy in different administrative areas. It is planned to carry out detailed statistical analyses of these trends, but in the meantime the following key points are presented for the 23 year period covered.
- 4.5.2 **Table 6** and **Table 7** show a historic time-series back to the period 1981-1983. Tables with more detail are available from the NRS website including life expectancy results for an "exact age":
  - Council area [ www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme //life-expectancy/life-expectancy-in-scottish-areas/archive/admin-areas-2003-2005 ];
  - NHS Board area [www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/archive/admin-areas-2003-2005];
  - Miscellaneous [www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme //life-expectancy/life-expectancy-in-scottish-areas/archive/admin-areas-2003-2005].
- 4.5.3 Life expectancy at birth in Scotland has increased since 1981-1983 from 69.3 years to 74.2 years for males (4.9 years) and 75.5 years to 79.2 years for females (3.7 years). **Table 8** and **Table 9** show the highest and lowest ranking Council and NHS Board area for both periods. These tables also show that the gap between males and females is closing, from a gap of 6.2 years in 1981-83 to 5.0 years in 2003-2005. For Council areas, the gap between highest and lowest areas for male life expectancy at birth is increasing (from 5.0 years in 1981-83 to 7.8 years in 2003-2005). For females, the gap is similarly increasing (from 3.8 to 4.7 years).
- 4.5.4 The maps at **Figure 6a** and **Figure 6b** and the chart in **Figure 6c** show the Council areas with the highest and lowest percentage increase over the period. For males, Highland had the largest increase with 10.1% and West Dunbartonshire the lowest with 2.9%. For females, South Ayrshire had the largest increase with 6.8% and Angus the lowest with 2.3%.
- 4.5.5 **Figure 7** shows similar information for NHS Boards. For males, the old Highland area had the largest increase at 10.1% and Shetland the lowest with 5.0%. For females, Orkney had the largest increase with 6.6% and Western Isles the lowest with 3.3%.
- 4.5.6 It is important to note that the populations of Orkney, Shetland and Western Isles NHS Boards are small compared with the other areas, therefore their results should be looked at along with the confidence intervals supplied in the more detailed tables (see **Section 4.5.2** for details).

# 5. Notes and Definitions

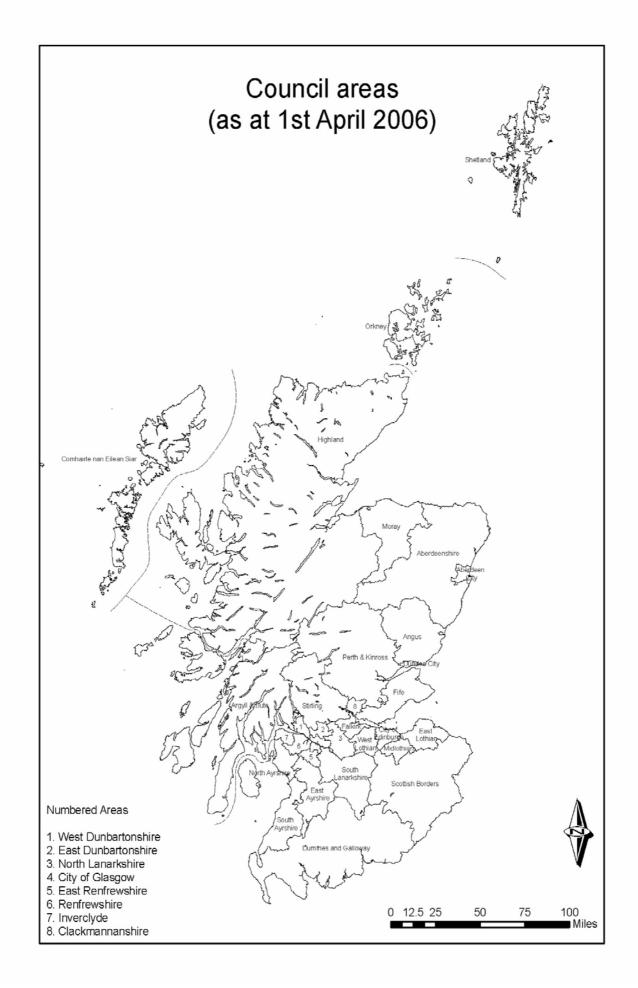

- 5.1 Following the dissolution of NHS Argyll & Clyde on 31<sup>st</sup> March 2006, it's area has been split between Greater Glasgow and Highland NHS Boards and the former has been renamed Greater Glasgow and Clyde. The calculation to produce figures for the new NHS Board areas in this report are as follows:
  - NHS Highland = old NHS Highland plus Argyll & Bute Council area;
  - NHS Greater Glasgow & Clyde = old NHS Greater Glasgow plus (old NHS Argyll & Clyde minus Argyll & Bute Council area).
- 5.2 The composition of the NHS Board areas in terms of Council areas is summarised in the table below. Maps of Council and NHS Board areas can be found on pages 18, 19 and 20.

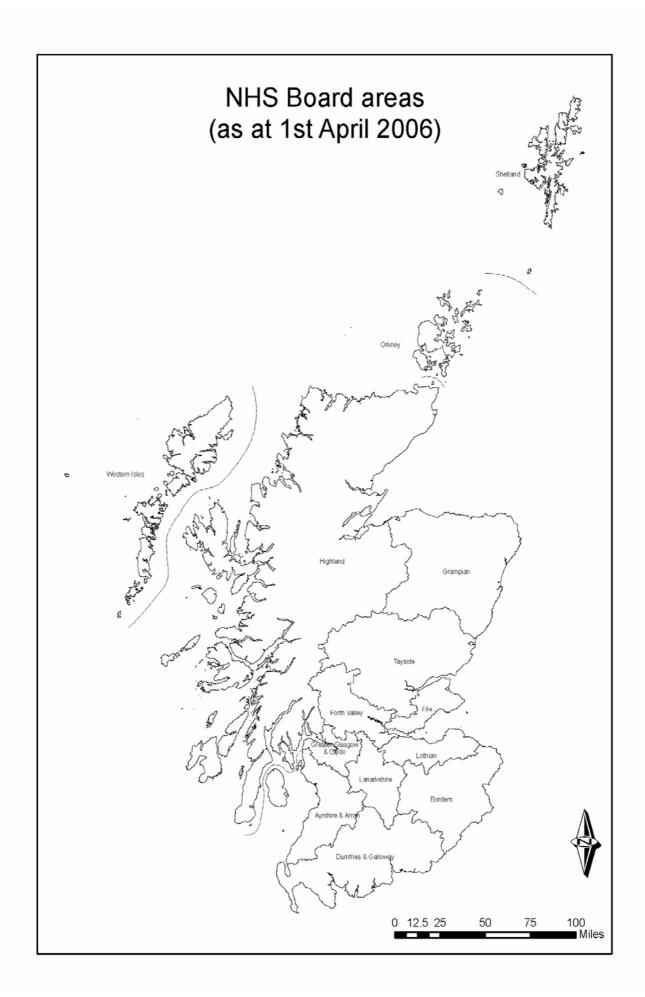

NHS Board area	Council area
Argyll & Clyde	Argyll & Bute, East Renfrewshire (part), Inverclyde,
	Renfrewshire, West Dunbartonshire (part), Stirling (part)
Greater Glasgow	East Renfrewshire (part), Inverclyde, Renfrewshire, West
& Clyde part <sup>1</sup>	Dunbartonshire (part), Stirling (part)
Highland part <sup>1</sup>	Argyll & Bute
Greater Glasgow &	East Dunbartonshire, East Renfrewshire, Glasgow City,
Clyde <sup>2</sup>	Inverclyde, North Lanarkshire (part), Renfrewshire, South
-	Lanarkshire (part), Stirling (part), West Dunbartonshire
Highland <sup>2</sup>	Argyll & Bute, Highland
Ayrshire & Arran	East Ayrshire, North Ayrshire, South Ayrshire
Borders	Scottish Borders
<b>Dumfries &amp; Galloway</b>	Dumfries & Galloway
Fife	Fife (part)
Forth Valley	Clackmannanshire, Falkirk (part), Stirling (part), Perth &
	Kinross (part)
Grampian	Aberdeen City, Aberdeenshire, Moray
Greater Glasgow	East Dunbartonshire, East Renfrewshire (part), Glasgow City,
	North Lanarkshire (part), South Lanarkshire (part), West
	Dunbartonshire (part)
Highland	Highland
Lanarkshire	North Lanarkshire (part), South Lanarkshire (part), West
	Lothian (part), Falkirk (part)
Lothian	East Lothian, City of Edinburgh, Midlothian, West Lothian
	(part), Falkirk (part)
Orkney	Orkney Islands
Shetland	Shetland Islands
Tayside	Angus, Dundee City, Perth & Kinross (part), Fife (part)
Western Isles	Eilean Siar

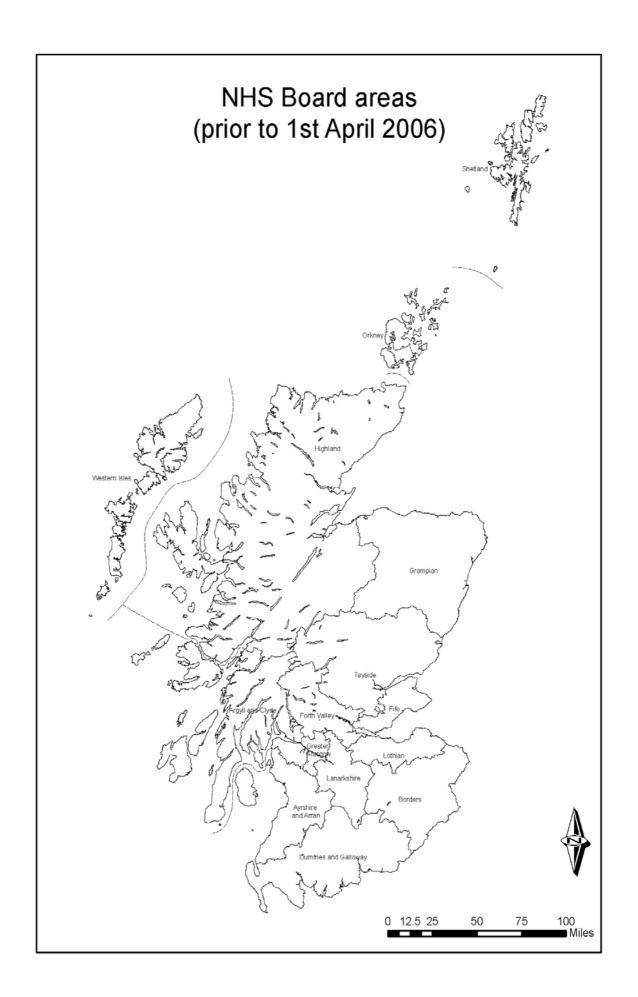

<sup>&</sup>lt;sup>1</sup> Areas of former Argyll & Clyde inherited by new Boards on 1st April 2006.

5.2.3 Data in future publications will be presented for the new NHS Board areas, but data on the components and old NHS Board areas will be also made available to allow historical comparisons.

<sup>&</sup>lt;sup>2</sup> New Board areas including parts of former Argyll & Clyde. Note: In practice there are some other very small "slivers" where NHS Board and Council area boundaries cross.

#### 6. Further information

# 6.1 National Life Expectancy at Birth

6.1.1 The Government Actuary's Department (GAD) has produced national life tables for the UK and constituent countries, which give statistics on expectation of life. Every ten years GAD has produced a set of graduated (smoothed) life tables for Scotland. In addition, each year ungraduated interim life tables have been produced for Scotland, based on data for a period of three consecutive calendar years. These latter are available for 1980-1982 to 2002-2004 from their website:

# http://www.gad.gov.uk/Life Tables/Interim life tables.htm

Responsibility for the production of national life expectancy figures for the UK and its constituent countries transferred from GAD to the Office for National Statistics (ONS) on 31 January 2006.

6.1.2 Because of the differences between complete (single year of age) and abridged (grouped years) life tables, the Scotland level figures presented in this report may differ slightly from those published by GAD. A detailed description of the standard methods and notation associated with the calculation of life expectancy can be found on the GAD website:

# http://www.gad.gov.uk/Life Tables/methodology.htm

6.1.3 Period life expectancies are worked out using the age-specific mortality rates for a given period (either a single year, or a run of years), with no allowance for any later actual or projected changes in mortality. GAD also publishes 'cohort' life expectancies for selected ages. Cohort life expectancies are worked out using age-specific mortality rates which allow for known or projected changes in mortality in later years. More information can be found on the GAD website:

# http://www.gad.gov.uk/Life Tables/Period and cohort eol.htm

6.1.4 ONS intends to publish Scotland level interim life tables for 2003-2005 in November 2006. Provisional figures for 2003-2005 are available in the vital events reference tables which go with "Scotland's Population 2005 - The Registrar General's Annual Review of Demographic Trends". These provisional results can be found on the NRS website:

www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/vital-events/general-publications/vital-events-reference-tables/archive/2005/section-5-deaths

# 6.2 Life Expectancy for Scottish Administrative Areas

6.2.1 The first publication dedicated to life expectancy, titled "Life expectancy for administrative areas within Scotland, 2002-2004", produced by NRS on 6 October 2005, is available from our website:

www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas/archive/admin-area/2002-2004

6.2.2 Life expectancy information for Council and NHS Board areas within Scotland from 1991-1993 to 2001-2003 is available on the National Statistics website, published on 15 October 2004, through the following link:

http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8841

This webpage also contains life expectancy results for local and health authorities in England, Wales and Northern Ireland.

6.2.3 A report which details the research undertaken by ONS to compare methodologies for calculating of life expectancy figures and confidence intervals can also be found on the National Statistics website:

http://www.statistics.gov.uk/downloads/theme\_other/GSSMethodology\_No\_33.pdf

#### 6.3 Other related data

6.3.1 Information on healthy life expectancy (HLE) was published in March 2004 by the Information and Statistics Division (ISD) of the NHS. HLE is defined as the number of years people can expect to live in good health. The difference between healthy and life expectancy indicates the length of time people can expect to spend in poor health. More information on this work is available on the Scottish Public Health Observatory (ScotPHO) website at:

http://www.scotpho.org.uk/web/site/home/Populationdynamics/Healthylifeexpectancy/hle\_i ntro.asp

#### 6.4 Other data available from the National Records of Scotland

6.4.1 Estimates on the resident population of Scotland are prepared by NRS each year. These are available by sex and single year of age for Council and NHS Board areas, together with historical data. Information is also available on a wide range of related topics such as small area population estimates, population projections, migration estimates and data from the 2001 and earlier Censuses. For further information please contact:

Note: This abridged life table is constructed from the estimated population in 2003, 2004 and 2005 and the total number of deaths registered in these years. The column headed I<sub>x</sub> shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2003-2005. Column exo shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2003-2005 mortality probabilities from age x onwards.

Table 4 Abridged life table, by sex, age and NHS Board area, Scotland 2003-05

Note: This abridged life table is constructed from the estimated population in 2003, 2004 and 2005 and the total number of deaths registered in these years. The column headed I<sub>x</sub> shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2003-2005. Column e<sub>x</sub>° shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2003-2005 mortality probabilities from age x onwards.

<sup>&</sup>lt;sup>1</sup> Areas of former Argyll & Clyde inherited by new Boards on 1st April 2006.

<sup>&</sup>lt;sup>2</sup> New Board areas including parts of former Argyll & Clyde.

#### 7. Notes on Statistical Publications

**ENQUIRIES ABOUT THIS PUBLICATION** Enquiries should be addressed to: Statistics Customer Services, National Records of Scotland, Ladywell House, Edinburgh, EH12 7 TF Telephone: (0131) 314 4243, Fax: (0131) 314 4696, E-mail: customer@gro-scotland.gsi.gov.uk

**NATIONAL STATISTICS** This is a National Statistics publication. It has been produced to high professional standards set out in the National Statistics Code of Practice and Release Practice Protocol (<a href="http://www.statistics.gov.uk/about\_ns/cop/default.asp">http://www.statistics.gov.uk/about\_ns/cop/default.asp</a>). These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

THE NATIONAL RECORDS OF SCOTLAND (NRS) NRS is the department of the devolved Scottish Administration responsible for the registration of births, marriages, civil partnerships, deaths, divorces and adoptions in Scotland. We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce population and household statistics. We make available important information for family history. Our website is <a href="https://www.nrscotland.gov.uk">www.nrscotland.gov.uk</a>.

**OTHER NRS STATISTICS** Further detailed statistics produced by NRS are available from the statistics pages of the NRS website (<a href="www.nrscotland.gov.uk/statistics-and-data/statistics">www.nrscotland.gov.uk/statistics-and-data/statistics</a>). Statistics from the 2001 Census are on the Scotland's Census Results On-Line web site (<a href="www.scrol.gov.uk">www.scrol.gov.uk</a>) and on the Census section of the main website (<a href="www.nrscotland.gov.uk/statistics-and-data/census">www.nrscotland.gov.uk/statistics-and-data/census</a>).

Information about future publications is provided on the NRS website (<a href="www.nrscotland.gov.uk/statistics-and-data/future-publications">www.nrscotland.gov.uk/statistics-and-data/future-publications</a>). If you would like to receive notification of forthcoming statistical publications, you can register your interest on the Scottish Executive ScotStat web site at <a href="www.scotland.gov.uk/Topics/Statistics/scotstat/Intro">www.scotland.gov.uk/Topics/Statistics/scotstat/Intro</a>.

**COMPLAINTS AND SUGGESTIONS** If you are not satisfied with our service, please write to Kirsty MacLachlan, Head of Demography Division, Room 1/2/7, Ladywell House, Ladywell Road, Edinburgh, EH12 7TF, Telephone: (0131) 314 4242, E-mail: kirsty.maclachlan@gro-scotland.gsi.gov.uk.

We also welcome any comments or suggestions that would help us to improve our standards of service.
