## ***Life Expectancy for Administrative Areas within Scotland, 2004-2006***

Published on 4 September 2007

---

A National Statistics publication

National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

## Main Points

The key points in this report for 2004-2006 are:

### **At Birth:**

- Life expectancy at birth for Scotland was 74.6 years for men and 79.6 years for women. This varied considerably amongst areas in Scotland;
- The council area with the highest male life expectancy was East Dunbartonshire (78.0 years), 7.5 years more than Glasgow City, the lowest at 70.5 years;
- East Renfrewshire was the council area with the highest life expectancy for women (81.9 years), 4.9 years more than Glasgow City (lowest at 77.0 years);
- The NHS board area with the lowest figure for both men and women was Greater Glasgow & Clyde (72.5 and 78.2 years respectively);
- The highest figures were for Shetland NHS board area: men (76.6 years) and women (81.5 years).

### **At age 65:**

- Life expectancy at age 65 for Scotland was 15.9 years for men and 18.6 years for women;
- The council area with the highest life expectancy at age 65 for men and woman was Shetland (18.0 years and 20.5 years respectively), 4.2 years for men and 3.2 years for women more than Glasgow City;
- The NHS board with the lowest figure for men was Greater Glasgow & Clyde (14.7 years). The lowest figure for women was in Greater Glasgow & Clyde and Lanarkshire (both 17.9 years). Shetland had the highest for both men and women (18.0 years and 20.5 years respectively).

Compared with 10 years ago in 1994-1996:

- Life expectancy at birth for Scotland has improved from 72.1 years to 74.6 years for men and 77.8 years to 79.6 years for women;
- The gap between men and women is closing, dropping from 5.7 years to 5.0 years over the period;
- Although some areas had only very small increases in life expectancy over the 10 year period, there were no areas (council or NHS board area) that experienced a decrease;
- The gap between highest and lowest council areas for men remained the same at 7.5 years. Whereas, for women, the gap increased from 4.4 years in 1994-1996 to 4.9 years in 2004-2006;
- The biggest rise in life expectancy for men was in Shetland with 4.9 years and East Dunbartonshire (2.7 years) for women;
- The smallest rise was in Clackmannanshire (0.2 years) for males and East Ayrshire (0.7 years) for females.

## 1. Background

1.1 This paper summarises the Registrar General for Scotland's life expectancy figures for the period 2004-2006 for administrative areas within Scotland and compares these with results for 1994-1996. For the first time, life expectancy at birth for all people is presented in this report, although the analysis concentrates on male and female as in previous reports. It also reports on the new NHS board areas created following the dissolution of NHS Argyll & Clyde on 31<sup>st</sup> March 2006. NHS Argyll & Clyde was split between Greater Glasgow and Highland resulting in two new NHS board areas named Greater Glasgow & Clyde and Highland. Figures have also been provided for the old NHS board areas for completeness and for comparison purposes. See **Section 5** for more information about the dissolution of Argyll & Clyde NHS board and **Section 3.3** for more information about the reliability of the results.

1.2 The results for 2004-2006, given in **Table 1**, **Table 2** and **Table 3**, have been ranked for ease of presentation. For council areas, this means that "1" is the area with the highest life expectancy and "32" the lowest. Similarly, NHS boards areas are ranked 1 to 14.

1.3 The figures quoted in this publication are all period life expectancies. Period life expectancies are calculated using age specific mortality rates for a given period with no allowance for any later actual or projected future changes in mortality after that period. They are also based on revised population estimates published on 27 July 2007. These were revised following a review of methodology used by the National Records of Scotland (NRS). More information can be found on the NRS website:

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/population/population-estimates/mid-year-population-estimates/](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/population/population-estimates/mid-year-population-estimates/)

## 2. Life Expectancy at Birth

2.1 The figures for 2004-2006 are a three year average. They are produced by aggregating deaths and population data for the three year period. Three years of data is needed to provide large enough numbers to ensure that the figures published in this report are sufficiently robust.

2.2 Period life expectancy at birth for a given time period and area is an estimate of the average number of years a new born baby would survive if he/she experienced the particular area's age specific mortality rates for that time period throughout his/her life. The figure reflects mortality among those living in the area in each period, rather than mortality among those born in each area. It is not the number of years a baby born in the area during the three year period is expected to live, both because death rates are likely to change in the future and because many of the new borns may live elsewhere for at least some part of their lives.

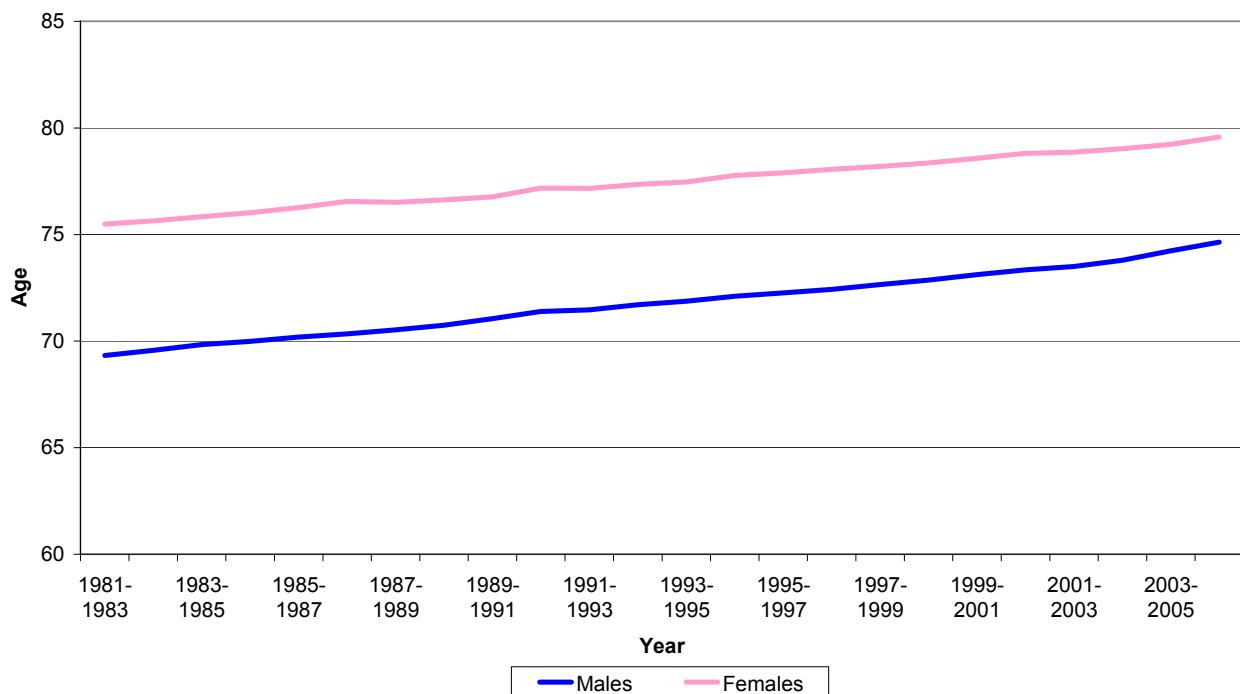

2.3 Life expectancy at birth is also not a guide to the remaining expectancy of life at any given age. It reflects the fact that survival from a particular age depends only on mortality rates beyond that age, whereas survival from birth is based on mortality rates at every age. **Table 4** and **Table 5** show life expectancy at an "exact age". Life expectancy at birth provides a useful summary measure of mortality rates actually experienced over a given period and, for past years, provides an objective means of comparison of the trends in mortality over time, between areas of a country and with other countries. More information on the methodology used is given in **Section 4.2**.

### 3. Discussion of Results

#### 3.1 The Scottish Picture

3.1.1 **Figure 1** shows that the expectation of life at birth in Scotland has improved over the last 20 years or so. It has increased from 69.3 years for males and 75.5 years for females born in the period 1981-1983 to 74.6 years and 79.6 years respectively for those born in 2004-2006, an increase of 5.3 years and 4.1 years respectively.

**Figure 1 Life expectancy at birth, Scotland, 1981-2006**

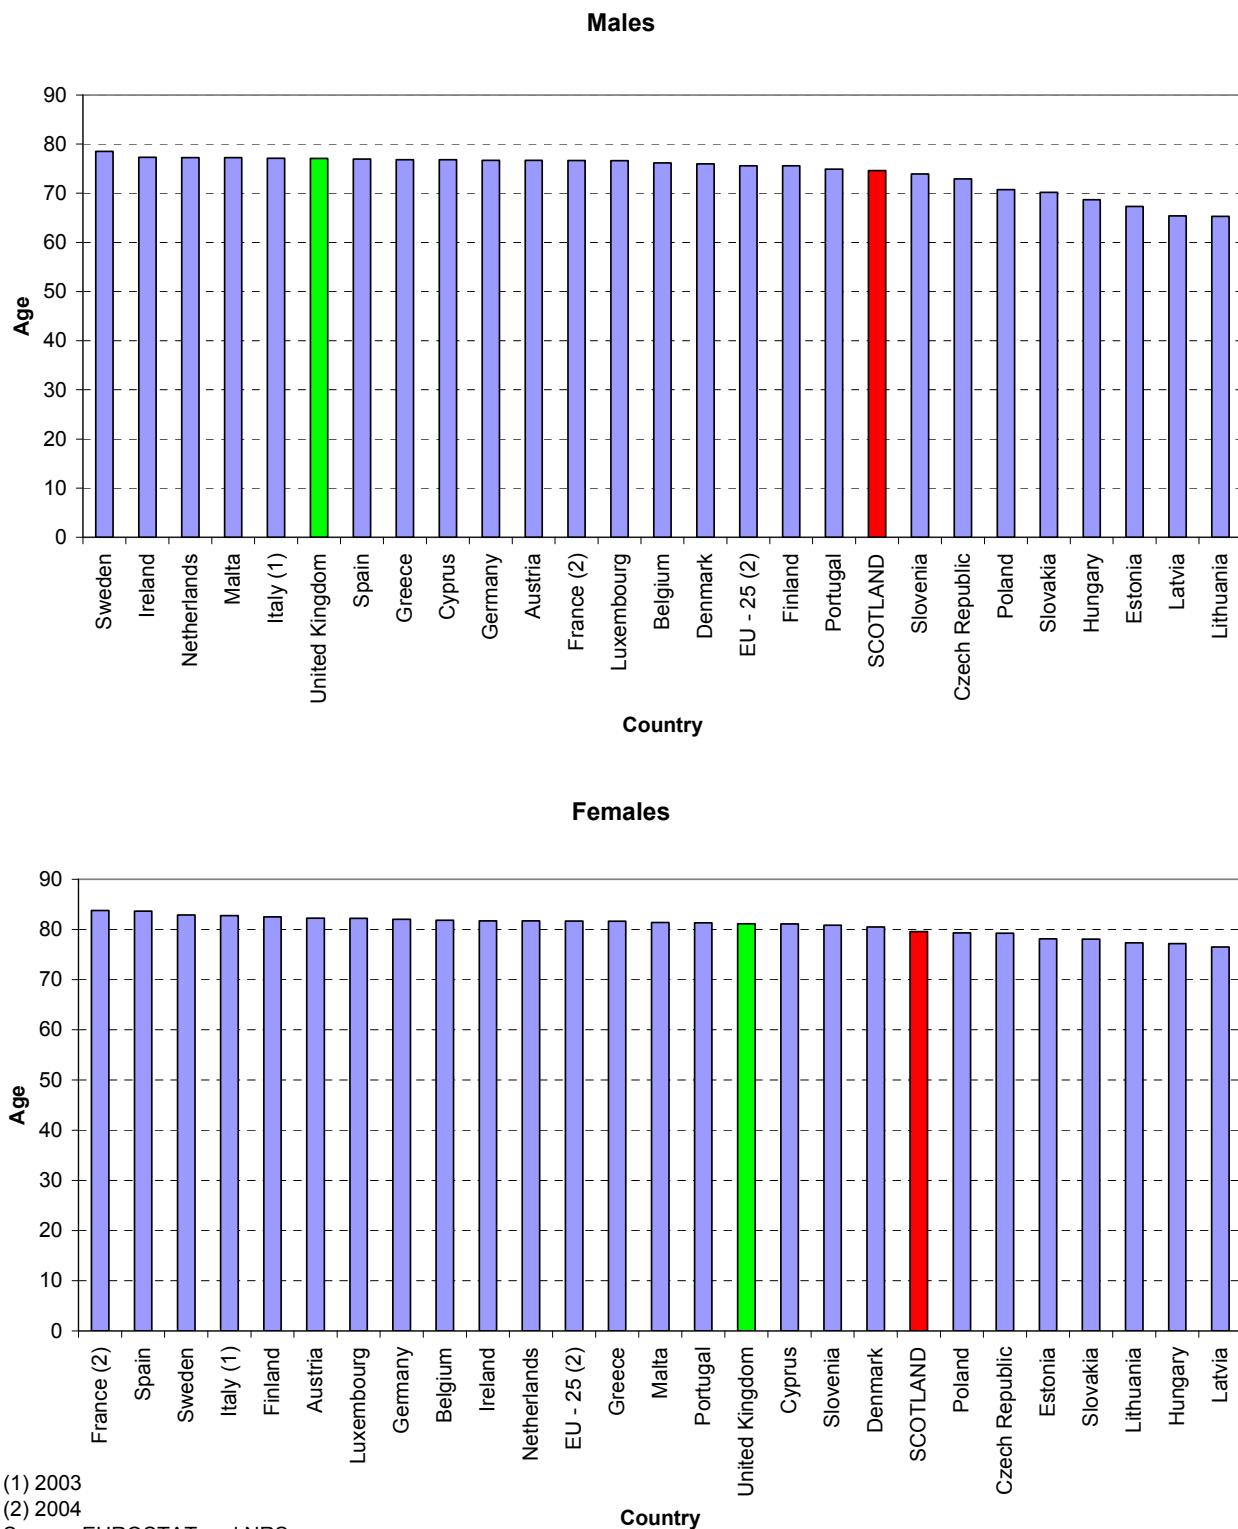

3.1.2 **Figure 1** also shows that the gap between males and females is slowly closing, dropping from 6.3 years in 1981-1983 to 5.0 years in 2004-2006.

3.1.3 Alternative, but very similar, results for Scotland are also produced by ONS. For more details see **Section 4.1**.

3.1.4 **Figure 2** shows that Scottish men and women have among the lowest expectation of life at birth in the EU-25<sup>1</sup>. The countries with lower life expectancy than Scotland were the Eastern European states which joined the EU on 1 May 2004. For Scottish males, expectation of life is almost 1 year lower than the EU average and, for females, it is almost 2 years lower. For both sexes, the expectation of life is about 4 years lower than the countries with the highest expectation of life.

<sup>1</sup> EU-25 is an abbreviation for the European Union with 25 Member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxemburg, Malta, Netherlands, Poland, Portugal, Slovenia, Slovakia, Spain, Sweden and United Kingdom.

**Figure 2 Life Expectancy at birth, 2005, selected countries**

## **3.2 Life Expectancy at Birth, 2004-2006**

3.2.1 **Table 1, Table 2 and Table 3** show life expectancy at birth in Scotland for 2004-2006 for council and NHS board areas.

3.2.2 For males, amongst the council areas, the lowest figure was for Glasgow City (70.5 years). The council area with the highest life expectancy for males was East Dunbartonshire (78.0 years), 7.5 years more than Glasgow City.

3.2.3 East Renfrewshire has the highest life expectancy for females (81.9 years), 4.9 years more than Glasgow City, the area with the lowest figure (77.0 years).

3.2.4 Of the NHS board areas, the lowest figure for both males and females was for Greater Glasgow & Clyde (72.5 and 78.2 years respectively). The highest was for Shetland for both males and females (76.6 and 81.5 years respectively).

3.2.5 **Table 4 and Table 5** show expectation of life at an “exact age”. This is the average number of years that those at this age will live thereafter. These extracts from period life tables are constructed from the estimated population in 2004, 2005 and 2006 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of  $x$ , out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2004-2006. The column headed  $e_x^0$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly  $x$  who are subject to the 2004-2006 mortality probabilities from age  $x$  onwards. For example, on this basis a male aged 80 living in Glasgow City could expect to live on average another 6.9 years, whereas a female aged 80 could expect to live on average another 8.4 years.

## **3.3 Life Expectancy at age 65, 2004-2006**

3.3.1 **Table 6** shows life expectancy at age 65 for Scotland and its administrative areas and has been ranked for ease of presentation. This shows that males aged 65 could expect to live a further 15.9 years and females a further 18.6 years if mortality rates remain the same as they were in the period 2004-2006.

3.3.2 For males and females, amongst the council areas, the lowest figure was for Glasgow City (13.8 years and 17.3 years respectively). The council area with the highest life expectancy at age 65 for males and females was Shetland (18.0 years and 20.5 years respectively), 4.2 years for males and 3.2 for females years more than Glasgow City.

3.3.3 Of the NHS board areas, the lowest figure for males was for Greater Glasgow & Clyde (14.7 years). The highest figure was Shetland (18.0 years), 3.3 years more than Greater Glasgow & Clyde.

3.3.4 Shetland NHS board area has the highest life expectancy at age 65 for females (20.5 years), 2.6 years more than Greater Glasgow & Clyde and Lanarkshire, the areas with the lowest figures (17.9 years).

### 3.4 Accuracy of Results

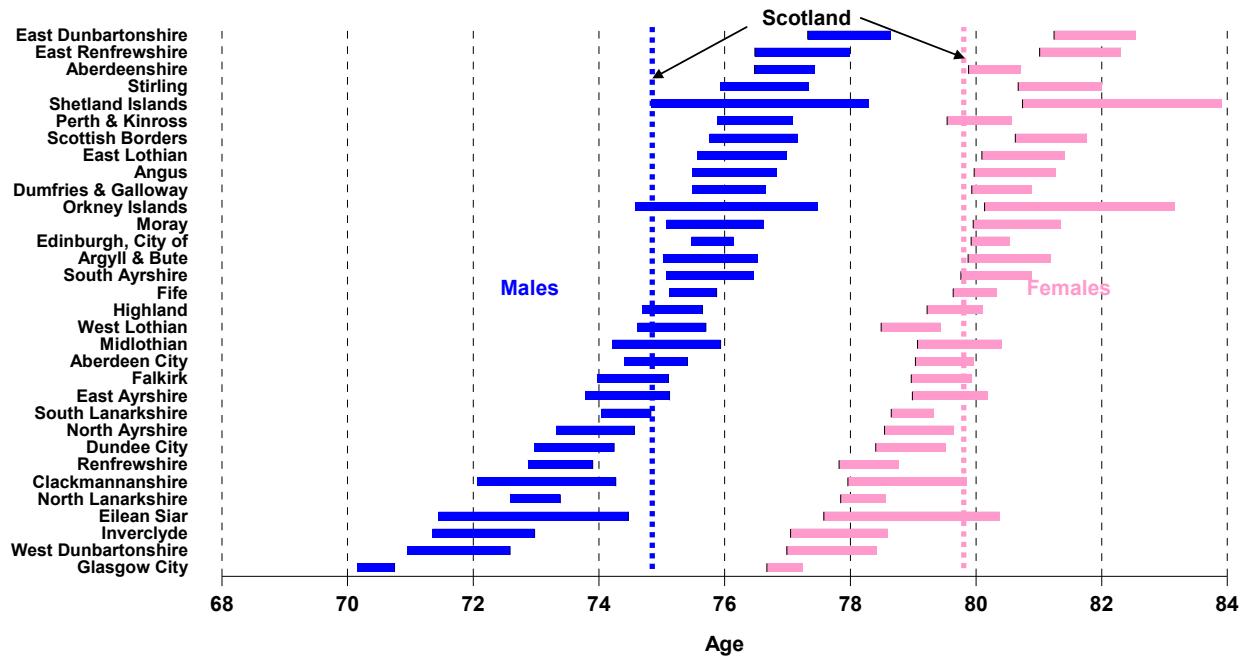

3.4.1 Life expectancy at birth, like most statistics, is an estimate which is subject to a margin of error. The accuracy of the results can be indicated by calculating a confidence interval which provides a range of values within which the true underlying life expectancy would lie (with 95% probability).

3.4.2 The 95% confidence intervals for life expectancy at birth and at age 65 are given in **Table 7** and **Table 8**, and are illustrated in **Figure 3**, **Figure 4**, **Figure 5** and **Figure 6** for council and NHS board areas within Scotland.

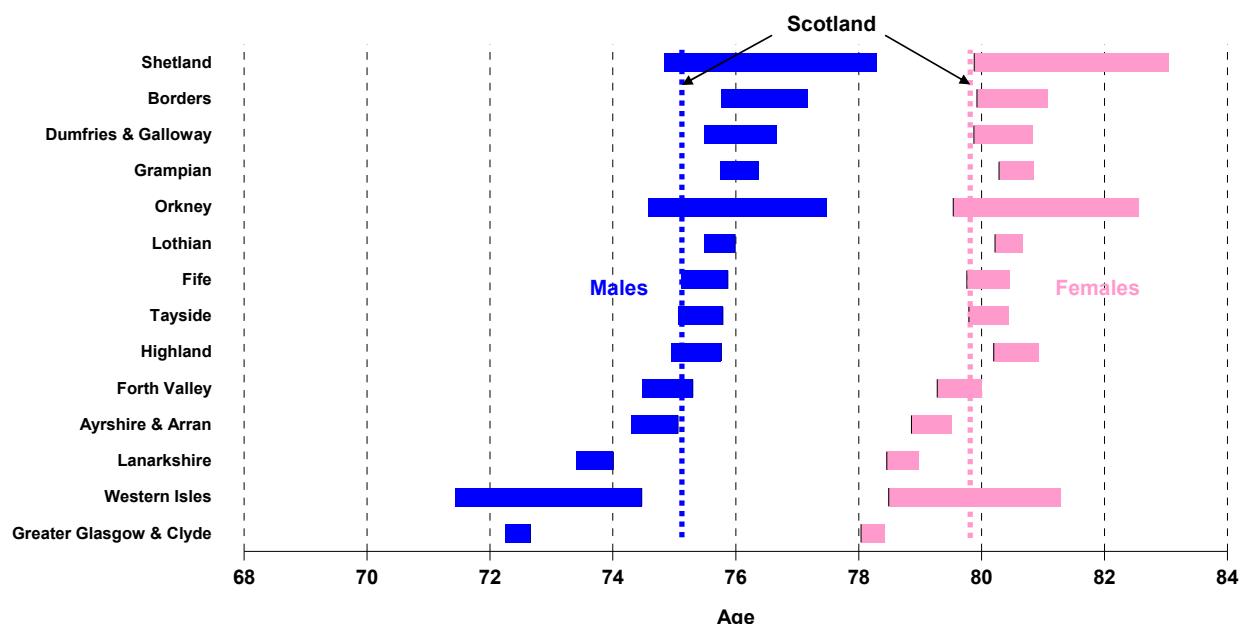

3.4.3 There is no simple “rule of thumb” for the size of confidence intervals, although it largely depends upon the size of the population, and so confidence intervals for areas with small populations tend to be wider. It is also worth noting that life expectancy results in these areas can be affected by the random variation in the number of annual deaths. This means that the results can be erratic and vary from period to period.

3.4.4 More information about the methods used to calculate the standard errors and confidence intervals used in this report can be found in the ONS methodology paper “Life expectancy at birth: methodological options for small populations”. See **Section 4.2.3** for how to access this report.

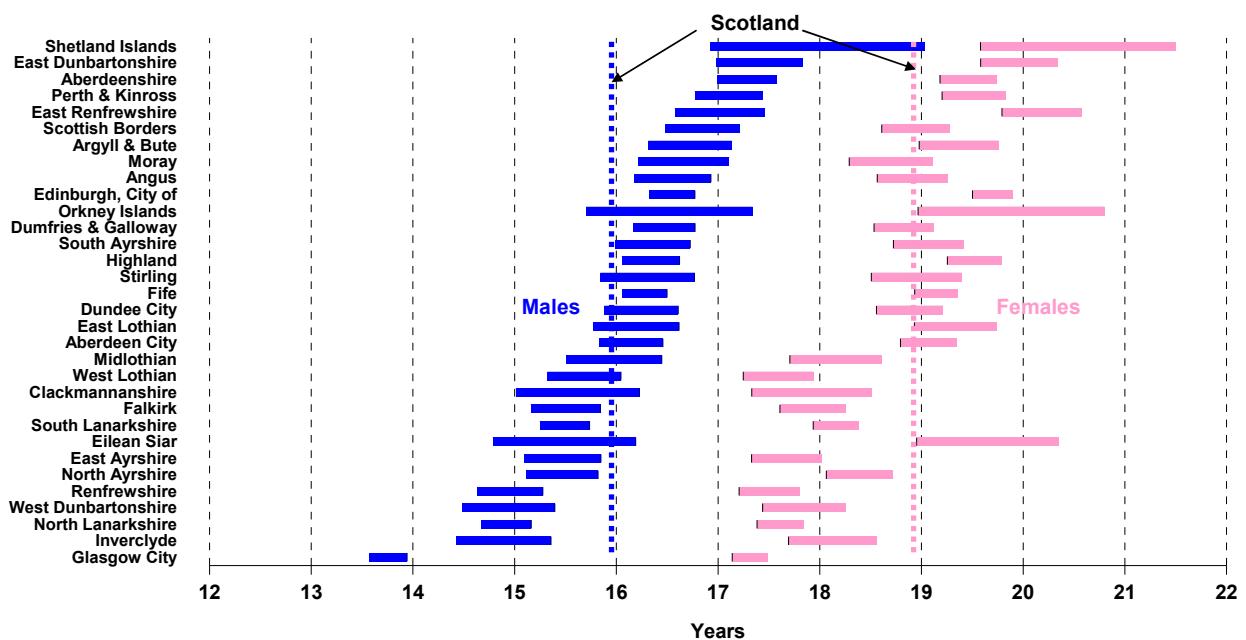

**Figure 3 Life expectancy at birth, 95% confidence intervals for council areas, 2004-2006 (Males & Females)**

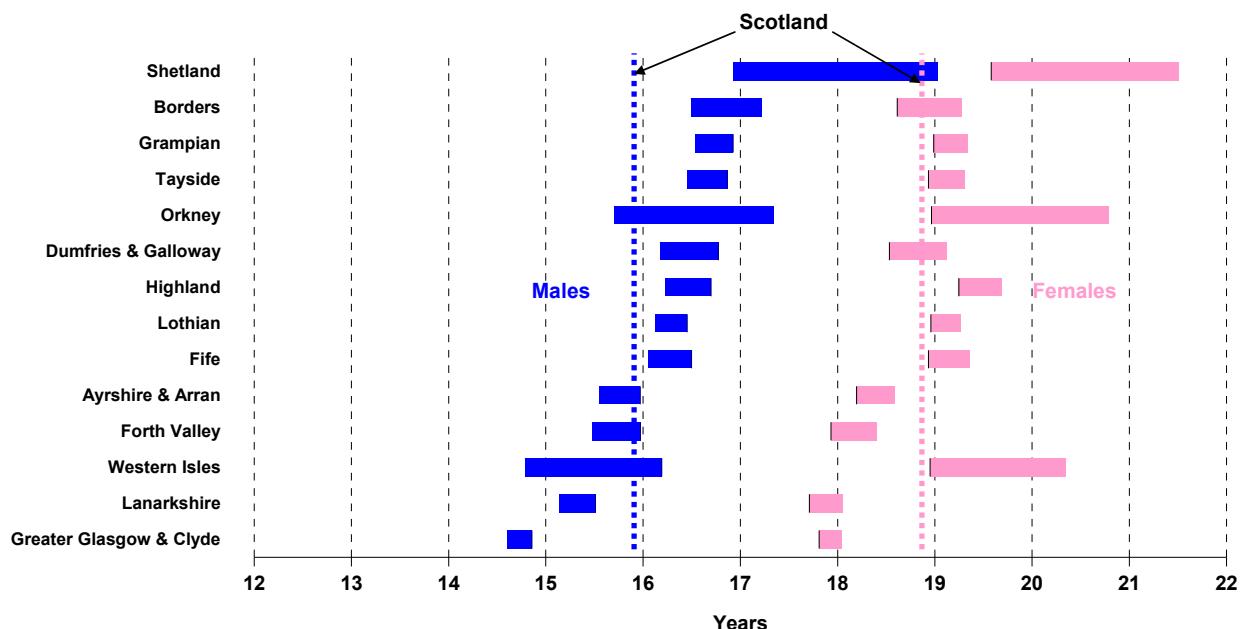

**Figure 4 Life expectancy at birth, 95% confidence intervals for NHS board areas, 2004-2006 (Males & Females)**

**Figure 5 Life expectancy at age 65, 95% confidence intervals for council areas, 2004-2006 (Males & Females)**

**Figure 6 Life expectancy at age 65, 95% confidence intervals for NHS board areas, 2004-2006 (Males & Females)**

### 3.5 Comparisons between 1994-1996 and 2004-2006

3.5.1 Life expectancy at birth in Scotland has increased between 1994-1996 and 2004-2006, from 72.1 years to 74.6 years for males, and from 77.8 years to 79.6 years for females. **Table 1**, **Table 2** and **Table 3** also show the highest and lowest ranking council and NHS board area for both periods. The tables show the gap between males and females is closing, from 5.7 years in 1994-1996 to 5.0 years in 2004-2006. For council areas, the gap between highest and lowest areas for male life expectancy at birth remains the same at 7.5 years. For females, the gap is increasing (from 4.4 years in 1994-1996 to 4.9 years in 2004-2006).

3.5.2 The maps in **Figure 7a** and **Figure 7b** and the chart in **Figure 7c** show the percentage change in life expectancy over the 10 year period for council areas. For males, the Shetland Islands had the largest increase with 6.9 percent (4.9 years) and Clackmannanshire the lowest with 0.2 percent (0.2 years). For females, East Dunbartonshire had the largest increase with 3.4 percent (2.7 years) and East Ayrshire the lowest with 0.9 percent (0.7 years).

3.5.3 **Figure 8** shows similar information for NHS boards. For males, Shetland had the largest increase at 6.9 percent (4.9 years) and the Borders the lowest with 2.2 percent (1.7 years). For females, Shetland had the largest increase with 2.9 percent (2.3 years) and Orkney and Western Isles the lowest with 1.5 percent (1.2 years).

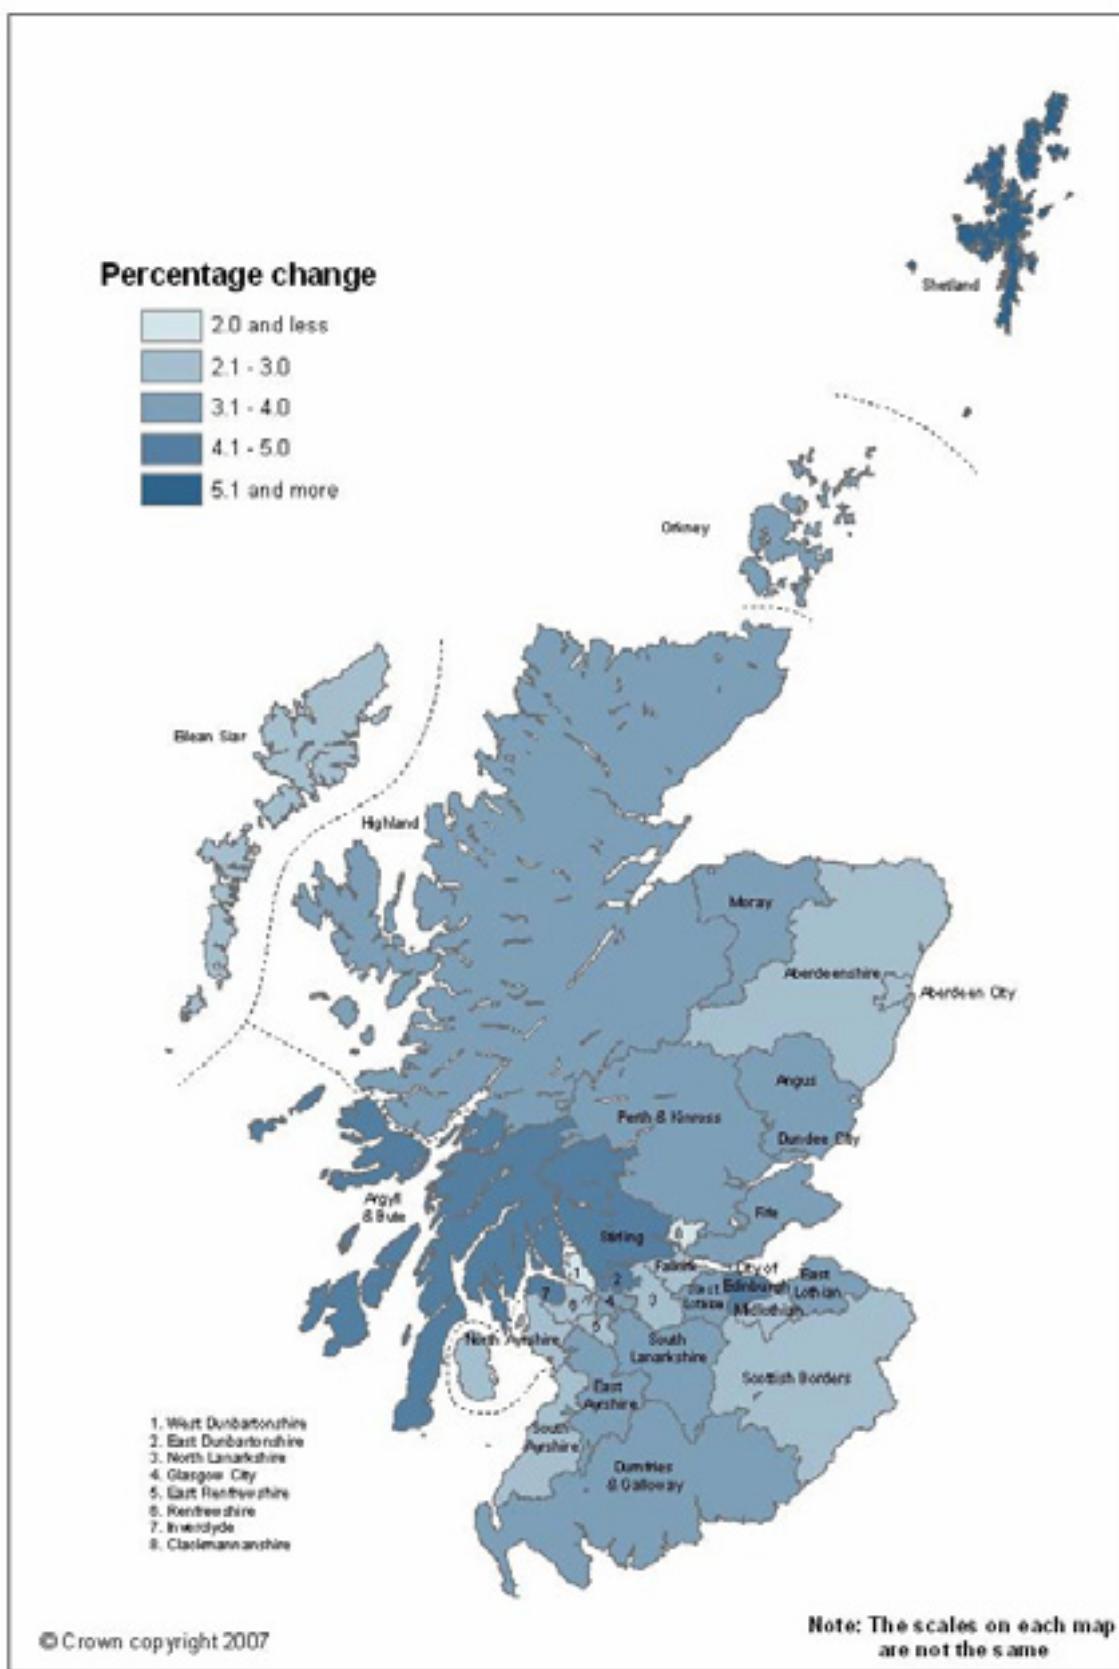

3.5.4 Over the 10 year period the ranking of many council and NHS boards has changed (**Table 1**, **Table 2** and **Table 3**). For males, amongst the council areas, the Shetland Islands has risen 20 places to 5<sup>th</sup> while Clackmannanshire has fallen 12 places to 27<sup>th</sup>. For females, Perth & Kinross and Stirling have risen 10 places to 4<sup>th</sup> and 9<sup>th</sup> respectively while Scottish Borders has fallen 8 places to 13<sup>th</sup>.

3.5.5 Of the NHS boards, Shetland has risen 11 places to 1<sup>st</sup> and Forth Valley has fallen 3 places to 10<sup>th</sup> for males. For females, Highland has risen 5 places to 3<sup>rd</sup> and Western Isles has fallen 4 places to 10<sup>th</sup>.

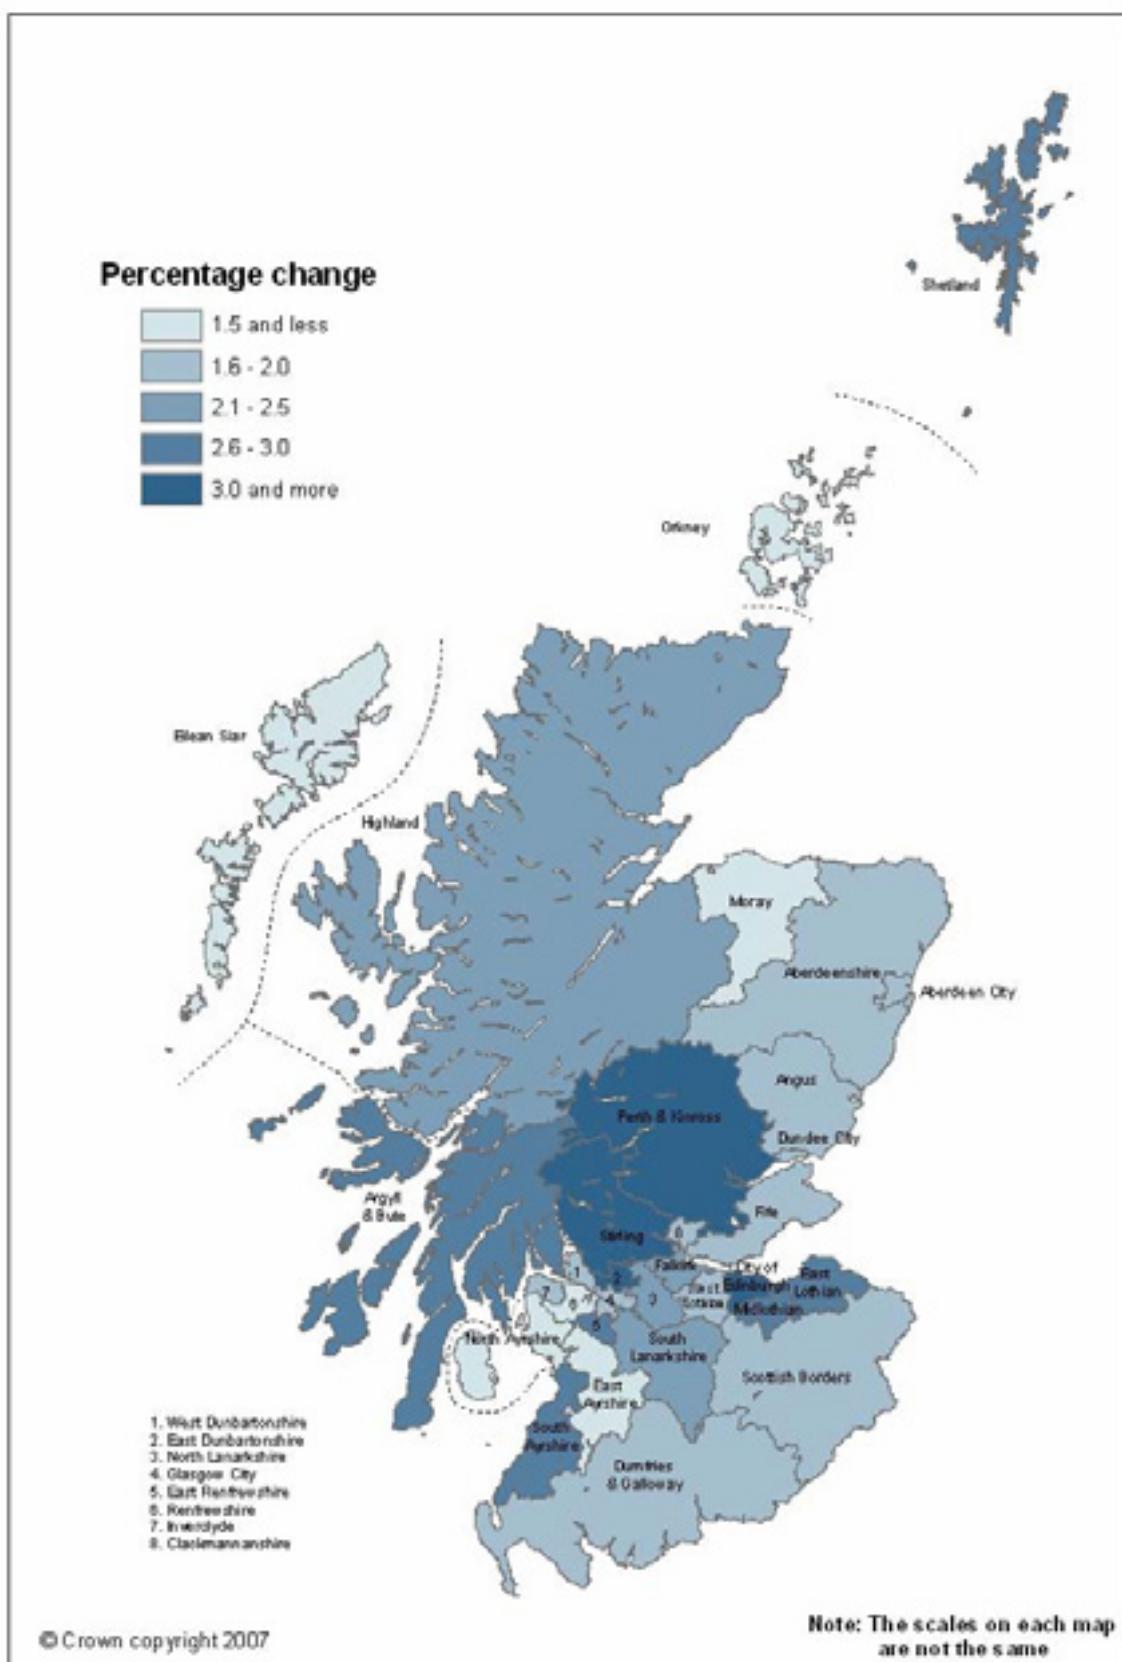

3.5.6 Of course, when confidence intervals for the results are taken into account, the rise and fall of the rankings over time are not exact, especially for areas with relatively small populations such as Orkney and Shetland. Confidence intervals for 1994-1996 are not presented here, but male and female figures are available from the Office for National Statistics (ONS) website through the following link:

[http://www.statistics.gov.uk/downloads/theme\\_population/LE\\_Scotland\\_2006.xls](http://www.statistics.gov.uk/downloads/theme_population/LE_Scotland_2006.xls)

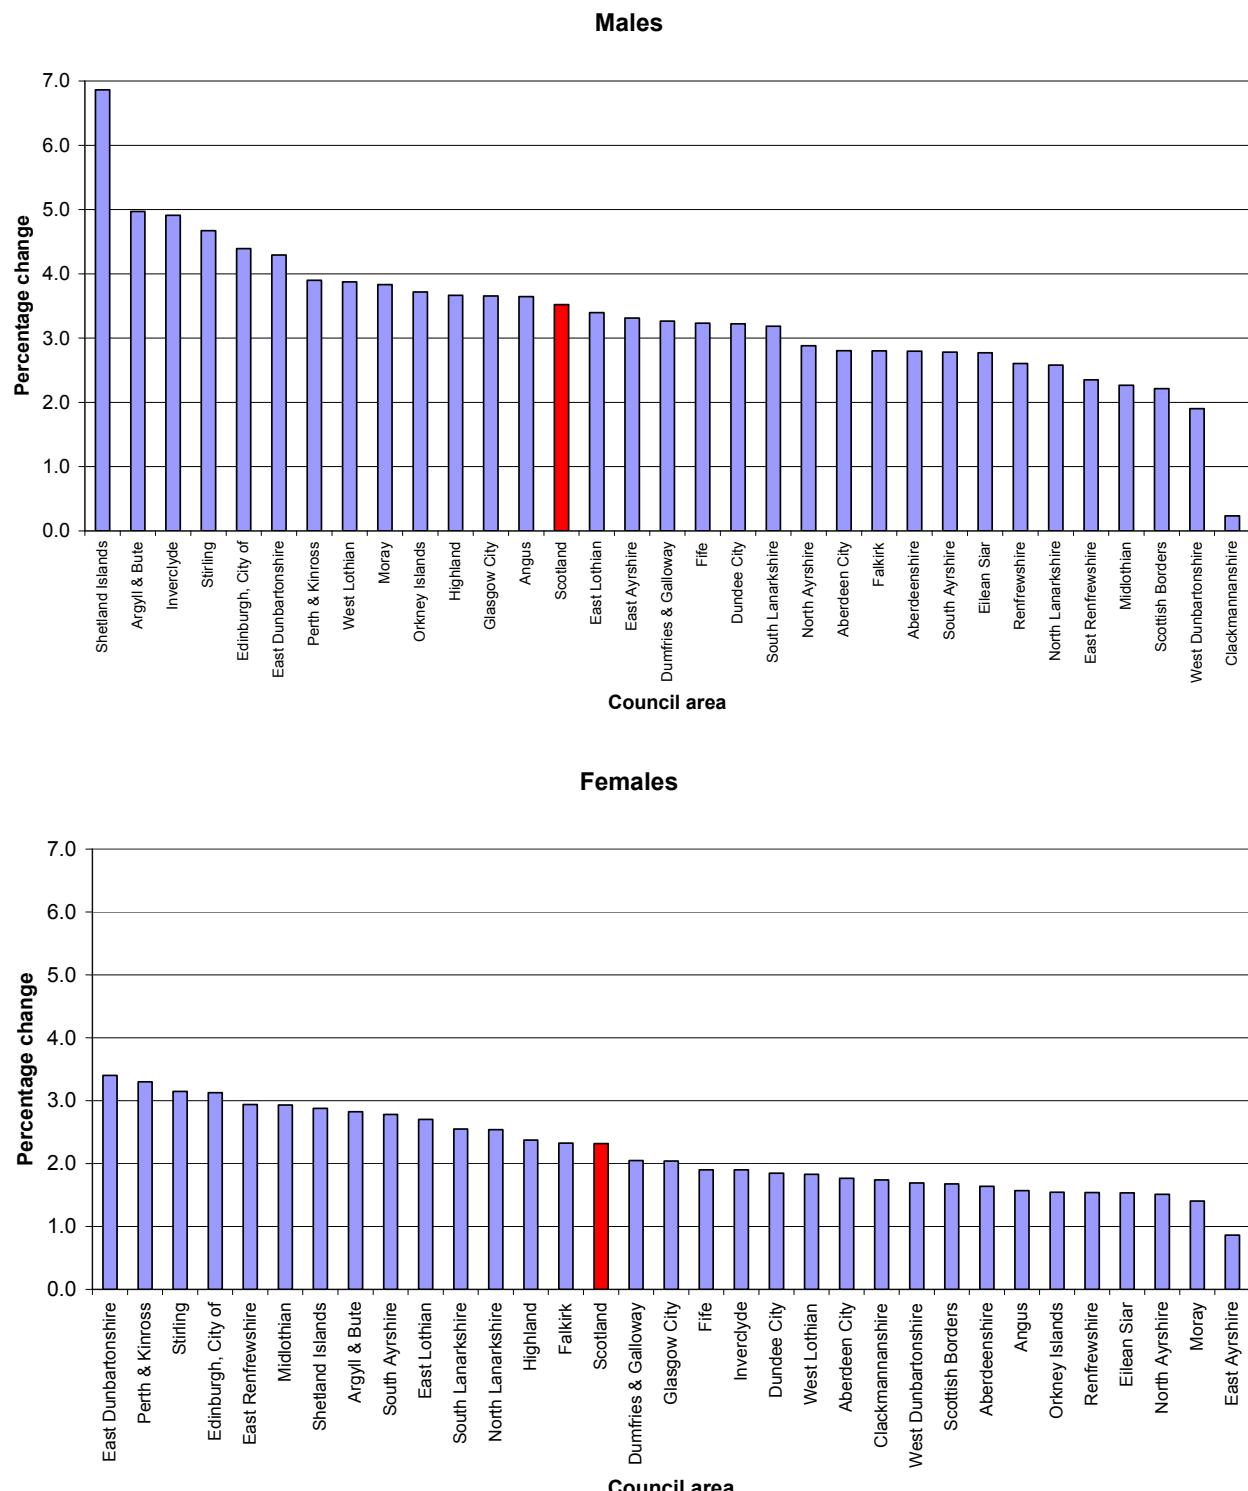

**Figure 7a Percentage change in life expectancy at birth between 1994-1996 and 2004-2006, council areas, Males**

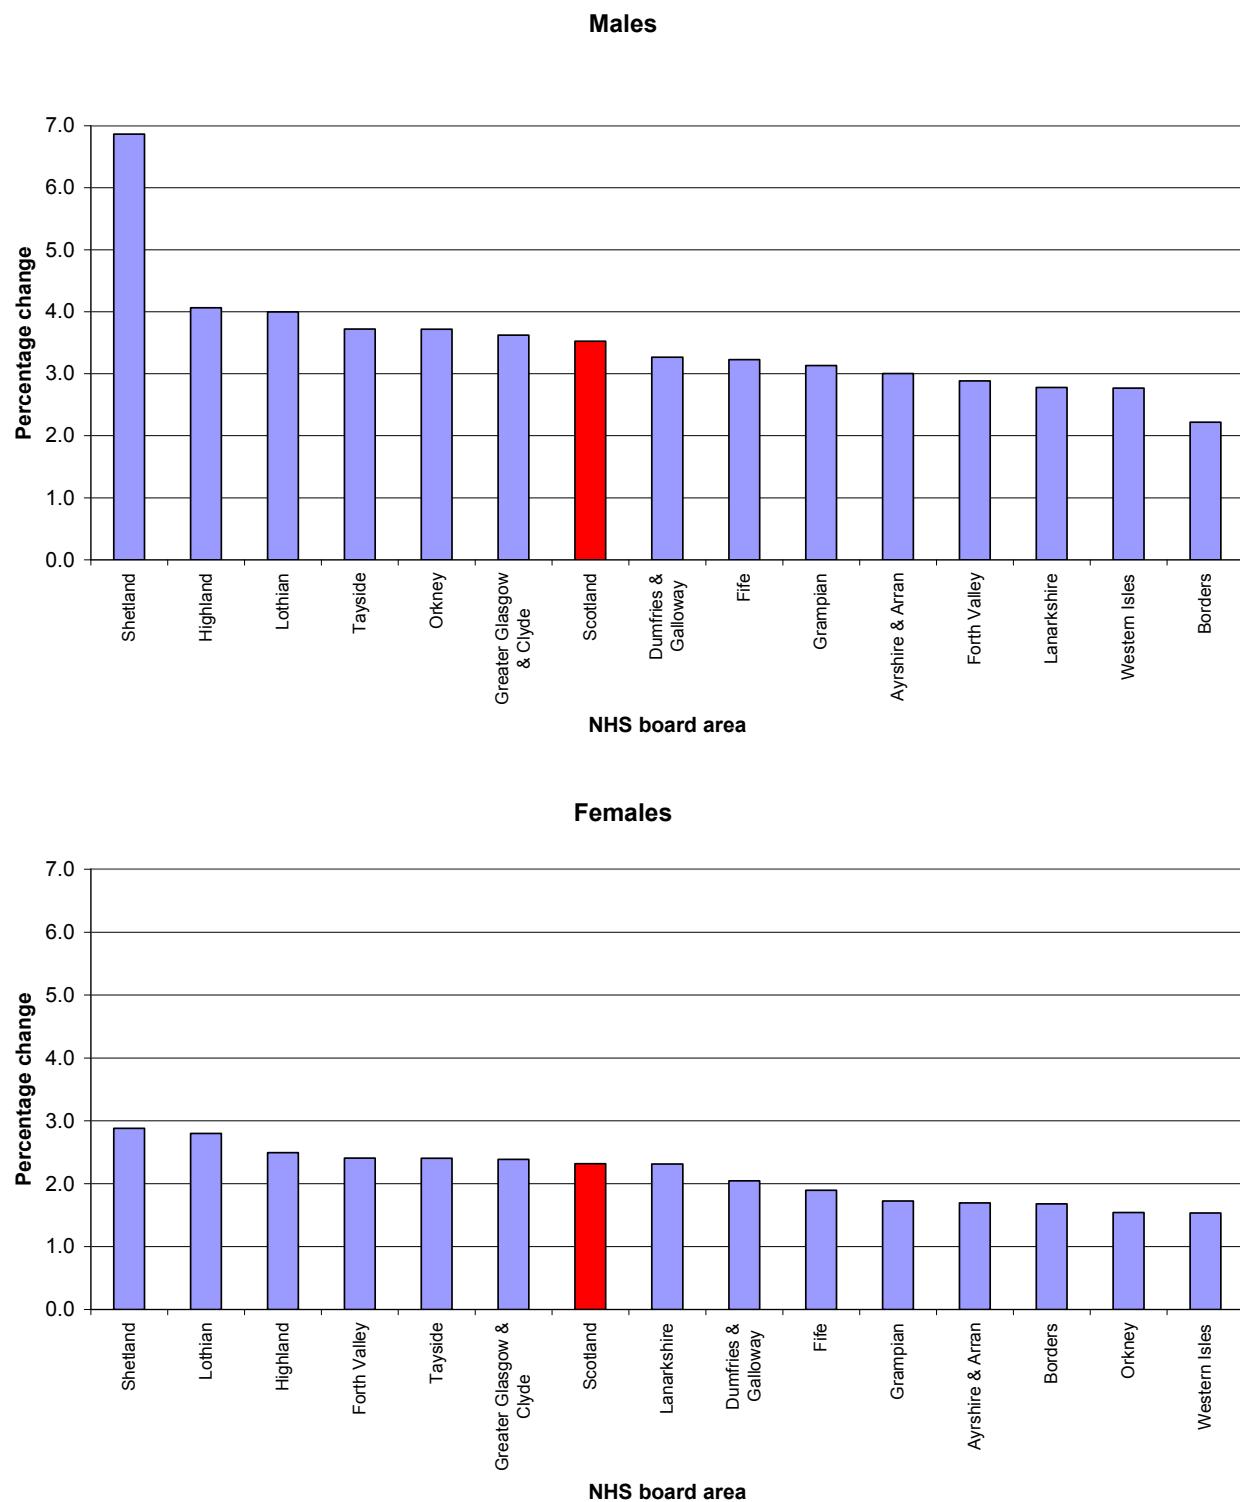

**Figure 7b Percentage change in life expectancy at birth between 1994-1996 and 2004-2006, council areas, Females**

**Figure 7c Percentage change in life expectancy at birth between 1994-1996 and 2004-2006, council areas, Males and Females**

**Figure 8 Percentage change in life expectancy at birth between 1994-1996 and 2004-2006, NHS board areas, Males and Females**

## **4. Further information**

### **4.1 National Life Expectancy at Birth**

4.1.1 The Office for National Statistics (ONS) produces national life tables for the UK and constituent countries, which give statistics on period expectation of life. Responsibility for the production of national life expectancy figures transferred to ONS from the Government Actuary's Department (GAD) on 31 January 2006.

4.1.2 Every ten years a set of graduated (smoothed) life tables for Scotland is published. In addition, each year un-graduated interim life tables are produced for Scotland, based on data for a period of three consecutive calendar years. The latter is available for 1980-1982 to 2003-2005 from the National Statistics website:

<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=14459&Pos=&ColRank=1&Rank=422>

4.1.3 Because of the differences between complete (single year of age) and abridged (grouped years) life tables, the Scotland level figures presented in this report may differ slightly from those published by ONS. A detailed description of the standard methods and notation associated with the calculation of life expectancy by ONS can be found within the Interim Life Table files on the National Statistics website.

4.1.4 Period life expectancies are worked out using the age-specific mortality rates for a given period (either a single year, or a run of years), with no allowance for any later actual or projected changes in mortality. Cohort life expectancies are worked out using age-specific mortality rates which allow for known or projected changes in mortality in later years. Period and cohort life expectancies for selected ages, based on single calendar year data, are available from the GAD website:

[http://www.gad.gov.uk/Life\\_Tables/Period\\_and\\_cohort\\_eol.htm](http://www.gad.gov.uk/Life_Tables/Period_and_cohort_eol.htm)

4.1.5 ONS intends to publish Scotland level ungraduated interim life tables for 2004-2006 in November 2007. Provisional figures for 2004-2006 are available in the vital events reference tables which go with "Scotland's Population 2006 - The Registrar General's Annual Review of Demographic Trends". These provisional results can be found on the NRS website:

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/vital-events/general-publications/vital-events-reference-tables/archive/2006/section-5-deaths](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/vital-events/general-publications/vital-events-reference-tables/archive/2006/section-5-deaths)

## **4.2 Life Expectancy for Scottish Administrative Areas**

4.2.1 Previous publications dedicated to life expectancy produced by NRS are available from our website:

[www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy](http://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy)

4.2.2 Life expectancy information for council and NHS board areas within Scotland from 1991-1993 to 2001-2003 is available on the National Statistics website, published on 15 October 2004, through the following link:

<http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8841&Pos=&ColRank=1&Rank=272>

This webpage also contains life expectancy results for local and health authorities in England, Wales and Northern Ireland.

4.2.3 A report which details the research undertaken by ONS to compare methodologies for calculating of life expectancy figures and confidence intervals can also be found on the National Statistics website:

[http://www.statistics.gov.uk/downloads/theme\\_other/GSSMethodology\\_No\\_33.pdf](http://www.statistics.gov.uk/downloads/theme_other/GSSMethodology_No_33.pdf)

## **4.3 Healthy Life Expectancy**

4.3.1 Information on healthy life expectancy (HLE) was published in March 2004 by the Information and Statistics Division (ISD) of the NHS in Scotland. HLE is defined as the number of years people can expect to live in good health. The difference between healthy life expectancy and life expectancy indicates the length of time people can expect to spend in poor health. More information on this work is available on the Scottish Public Health Observatory (ScotPHO) website at:

<http://www.scotpho.org.uk/hle>

## **4.4 Other data available from the National Records of Scotland**

4.4.1 Estimates on the resident population of Scotland are prepared by NRS each year. These are available by sex and single year of age for council and NHS board areas, together with historical data. Information is also available on a wide range of related topics such as small area population estimates, population projections, migration estimates and data from the 2001 and earlier Censuses. For further information please contact:

Note : This abridged life table is constructed from the estimated population in 2004, 2005 and 2006 and the total number of deaths registered in these years. The column headed  $l_x$  shows the numbers who would survive to the exact age of x, out of 100,000 All People who, from birth, were subject to the mortality probabilities indicated by the death records for 2004-2006. Column  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to All People aged exactly x who are subject to the 2004-2006 mortality probabilities from age x onwards.

Note : This abridged life table is constructed from the estimated population in 2004, 2005 and 2006 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of  $x$ , out of 100,000 All People who, from birth, were subject to the mortality probabilities indicated by the death records for 2004-2006. Column  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to All People aged exactly  $x$  who are subject to the 2004-2006 mortality probabilities from age  $x$  onwards.

<sup>1</sup> New NHS Board areas including parts of former Argyll & Clyde.

<sup>2</sup> Former NHS Board areas (before dissolution of Argyll & Clyde on 1 April 2006).

Highland <sup>2</sup>	18.1	17.9	18.3	16.3	16.1	16.6	19.5	19.3	19.8

<sup>1</sup> New NHS Board areas including parts of former Argyll & Clyde.

<sup>2</sup> Former NHS Board areas (before dissolution of Argyll & Clyde on 1 April 2006).

## 5. Notes and Definitions

5.1 Following the dissolution of NHS Argyll & Clyde on 31<sup>st</sup> March 2006, its area has been split between Greater Glasgow and Highland NHS Boards and the former has been renamed Greater Glasgow and Clyde. The calculation to produce figures for the new NHS Board areas in this report are as follows:

- NHS Highland = old NHS Highland plus Argyll & Bute Council area;
- NHS Greater Glasgow & Clyde = old NHS Greater Glasgow plus (old NHS Argyll & Clyde minus Argyll & Bute Council area).

5.2 The composition of the NHS Board areas in terms of Council areas is summarised in the table below. Maps of Council and NHS Board areas can be found on pages 41, 42 and 43.

<b>NHS Board area</b>	<b>Council area</b>
<b>Ayrshire &amp; Arran</b>	East Ayrshire, North Ayrshire, South Ayrshire
<b>Borders</b>	Scottish Borders
<b>Dumfries &amp; Galloway</b>	Dumfries & Galloway
<b>Fife</b>	Fife (part)
<b>Forth Valley</b>	Clackmannanshire, Falkirk (part), Stirling (part), Perth & Kinross (part)
<b>Grampian</b>	Aberdeen City, Aberdeenshire, Moray
<b>Greater Glasgow &amp; Clyde<sup>1</sup></b>	East Dunbartonshire, East Renfrewshire, Glasgow City, Inverclyde, North Lanarkshire (part), Renfrewshire, South Lanarkshire (part), Stirling (part), West Dunbartonshire
<b>Highland<sup>1</sup></b>	Argyll & Bute, Highland
<b>Lanarkshire</b>	North Lanarkshire (part), South Lanarkshire (part), West Lothian (part), Falkirk (part)
<b>Lothian</b>	East Lothian, City of Edinburgh, Midlothian, West Lothian (part), Falkirk (part)
<b>Orkney</b>	Orkney Islands
<b>Shetland</b>	Shetland Islands
<b>Tayside</b>	Angus, Dundee City, Perth & Kinross (part), Fife (part)
<b>Western Isles</b>	Eilean Siar
<b>Argyll &amp; Clyde</b>	Argyll & Bute, East Renfrewshire (part), Inverclyde, Renfrewshire, West Dunbartonshire (part), Stirling (part)
<b>Greater Glasgow &amp; Clyde part<sup>2</sup></b>	East Renfrewshire (part), Inverclyde, Renfrewshire, West Dunbartonshire (part), Stirling (part)
<b>Highland part<sup>2</sup></b>	Argyll & Bute
<b>Greater Glasgow</b>	East Dunbartonshire, East Renfrewshire (part), Glasgow City, North Lanarkshire (part), South Lanarkshire (part), West Dunbartonshire (part)
<b>Highland</b>	Highland

<sup>1</sup>New Board areas including parts of former Argyll & Clyde.

<sup>2</sup>Areas of former Argyll & Clyde inherited by new Boards on 1st April 2006.

Note: In practice there are some other very small “slivers” where NHS Board and Council area boundaries cross.

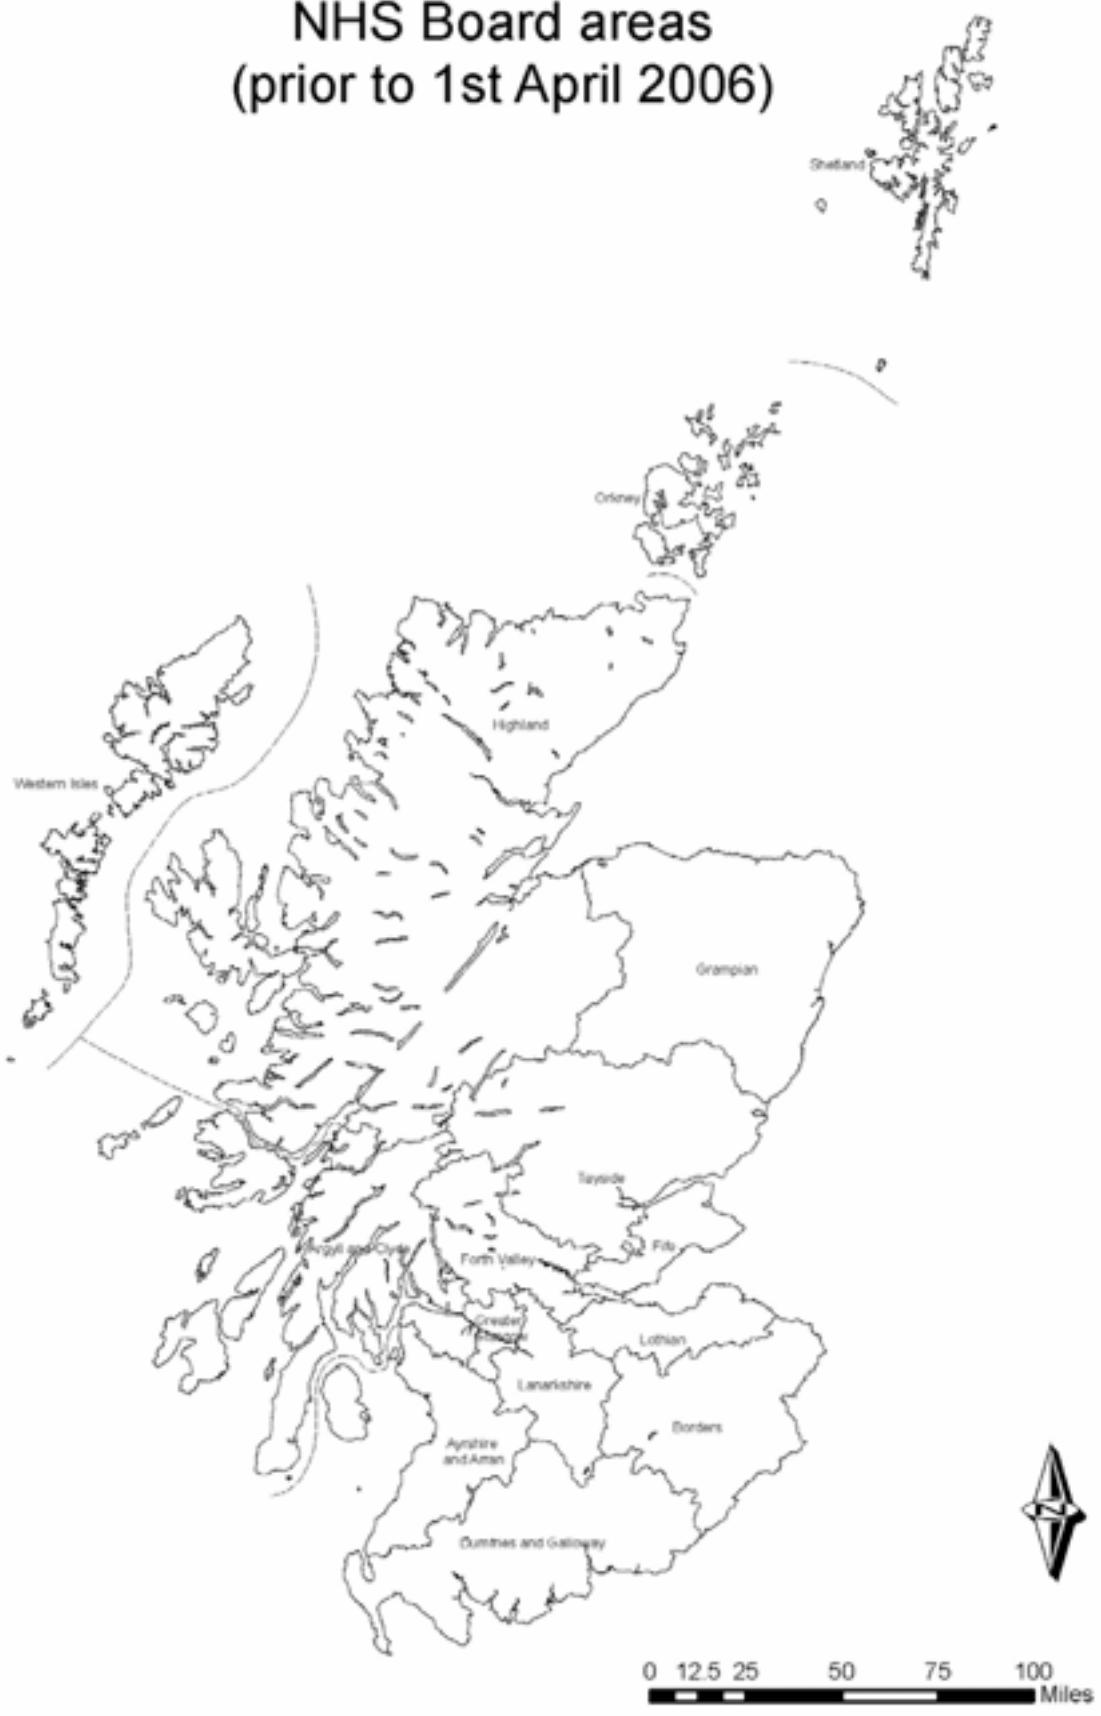

## Council areas (as at 1st April 2006)

## NHS Board areas (as at 1st April 2006)

## NHS Board areas (prior to 1st April 2006)

## 6. Notes on Statistical Publications

### ENQUIRIES ABOUT THIS PUBLICATION

Enquiries should be addressed to:  
Statistics Customer Services, National Records of Scotland, Ladywell House, Edinburgh, EH12 7TF  
Telephone: (0131) 314 4243, Fax: (0131) 314 4696, E-mail: customer@gro-scotland.gsi.gov.uk

**NATIONAL STATISTICS** This is a National Statistics publication. It has been produced to high professional standards set out in the National Statistics Code of Practice and Release Practice Protocol ([http://www.statistics.gov.uk/about\\_ns/cop/default.asp](http://www.statistics.gov.uk/about_ns/cop/default.asp)). These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

### THE NATIONAL RECORDS OF SCOTLAND (NRS)

NRS is the department of the devolved Scottish Administration responsible for the registration of births, marriages, civil partnerships, deaths, divorces and adoptions in Scotland. We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce population and household statistics. We make available important information for family history. Our website is [www.nrscotland.gov.uk](http://www.nrscotland.gov.uk).

**OTHER NRS STATISTICS** Further detailed statistics produced by NRS are available from the statistics pages of the NRS website ([www.nrscotland.gov.uk/statistics-and-data/statistics](http://www.nrscotland.gov.uk/statistics-and-data/statistics)). Statistics from the 2001 Census are on the Scotland's Census Results On-Line web site ([www.scrol.gov.uk](http://www.scrol.gov.uk)) and on the Census section of the main website ([www.nrscotland.gov.uk/statistics-and-data/census](http://www.nrscotland.gov.uk/statistics-and-data/census)).

Information about future publications is provided on the NRS website ([www.nrscotland.gov.uk/statistics-and-data/future-publications](http://www.nrscotland.gov.uk/statistics-and-data/future-publications)). If you would like to receive notification of forthcoming statistical publications, you can register your interest on the Scottish Executive ScotStat web site at [www.scotland.gov.uk/Topics/Statistics/scotstat/Intro](http://www.scotland.gov.uk/Topics/Statistics/scotstat/Intro).

**COMPLAINTS AND SUGGESTIONS** If you are not satisfied with our service, please write to Kirsty MacLachlan, Head of Demography Division, Room 1/2/7, Ladywell House, Ladywell Road, Edinburgh, EH12 7TF, Telephone: (0131) 314 4242, E-mail: [kirsty.maclashan@gro-scotland.gsi.gov.uk](mailto:kirsty.maclashan@gro-scotland.gsi.gov.uk).

We also welcome any comments or suggestions that would help us to improve our standards of service.
