Note : This abridged life table is constructed from the estimated population in 2000, 2001 and 2002 and the total number of deaths registered in these years. The column headed l_x shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2000-2002. Column e_x^o shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2000-2002 mortality probabilities from age x onwards.
