### Main Points

### The key points in this report for 2005-2007 are:

At Birth:

- Life expectancy at birth for Scotland was 74.8 years for men and 79.7 years for women. This varied considerably amongst areas in Scotland;
- The council area with the highest male life expectancy was East Dunbartonshire (78.0 years), 7.2 years more than Glasgow City, the lowest at 70.8 years;
- The council area with the highest female life expectancy was Shetland (82.6 years), 5.5 years more than Glasgow City (lowest at 77.1 years);
- The NHS board area with the lowest life expectancy figure for both men and women was Greater Glasgow & Clyde (72.7 and 78.5 years respectively);
- The NHS board area with the highest male life expectancy was Borders (76.6 years) and the highest female life expectancy was Shetland (82.6 years).

At age 65:

- Life expectancy at age 65 for Scotland was 16.1 years for men and 18.8 years for women;
- The council area with the highest life expectancy at age 65 for both men and woman was Shetland (18.4 years and 21.0 years respectively), 4.6 years for men and 3.6 years for women more than Glasgow City, which had the lowest life expectancy;
- Greater Glasgow & Clyde was the NHS board with the lowest life expectancy at age 65 for both men and women (14.9 years and 18.0 years respectively);
- Shetland was the NHS board with the highest life expectancy at age 65 for both men and women (18.4 years and 21.0 years respectively).

#### Compared with 10 years ago in 1995-1997:

- Life expectancy at birth for Scotland has improved from 72.3 years to 74.8 years for men and 77.9 years to 79.7 years for women;
- The gap between men and women continues to close, dropping from 5.6 years to 4.9 years over the period;
- Although some areas had only very small increases in life expectancy over the 10 year period, there were no areas (council or NHS board area) that experienced a decrease;
- The gap between highest and lowest life expectancy in council areas for men decreased by 0.3 years – from 7.5 years in 1995-1997 to 7.2 years in 2005-2007. Whereas, for women, the gap increased by 0.7 years – from 4.8 years to 5.5 years. A similar pattern was found for NHS board areas;
- Amongst Council areas, the biggest rise in life expectancy for men was in Shetland (4.0 years) and for women was in East Dunbartonshire (3.4 years);
- The smallest rise in life expectancy for men was in Clackmannanshire (1.4 years) and East Ayrshire (0.5 years) for women;
- Amongst NHS board areas, the biggest rise in life expectancy for men was in Shetland (4.0 years) and the smallest was in Orkney (1.4 years);
- For women the biggest rise in life expectancy amongst NHS board areas was in Shetland (2.5 years) and the smallest was in Dumfries & Galloway (1.2 years).

### 1. Background

1.1 This paper summarises the Registrar General for Scotland's life expectancy figures for the period 2005-2007 for administrative areas within Scotland and compares these with results for 1995-1997. Life expectancy at birth for all people is presented in this report, although the analysis concentrates on male and female as in previous reports. It reports on 14 NHS board areas only, and, unlike previous reports, does not include analysis of the former Argyll and Clyde NHS board area. Figures for the old NHS board areas are available on request for comparison purposes.

1.2 The results for 2005-2007, given in **Table 1, Table 2** and **Table 3**, have been ranked for ease of presentation. For council areas, this means that "1" is the area with the highest life expectancy and "32" the lowest. Similarly, NHS board areas are ranked 1 to 14.

1.3 The figures quoted in this publication are all period life expectancies. Period life expectancies are calculated using age specific mortality rates for a given period with no allowance for any later actual or projected future changes in mortality after that period.

### 2. Life Expectancy at Birth

2.1 The figures for 2005-2007 are a three year average. They are produced by aggregating deaths and population data for the three year period. Three years of data are needed to provide large enough numbers to ensure that the figures published in this report are sufficiently robust.

2.2 Period life expectancy at birth for a given time period and area is an estimate of the average number of years a new born baby would survive if he/she experienced the particular area's age specific mortality rates for that time period throughout his/her life. The figure reflects mortality among those living in the area in each period, rather than mortality among those born in each area. It is not the number of years a baby born in the area during the three year period is expected to live, both because death rates are likely to change in the future and because many of the new borns may live elsewhere for at least some part of their lives.

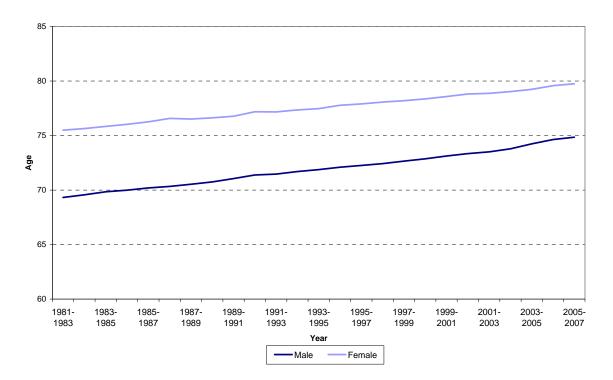

2.3 Life expectancy at birth is also not a guide to the remaining expectancy of life at any given age. It reflects the fact that survival from a particular age depends only on mortality rates beyond that age, whereas survival from birth is based on mortality rates at every age. **Table 4** and **Table 5** show life expectancy at an "exact age". Life expectancy at birth provides a useful summary measure of mortality rates actually experienced over a given period and, for past years, provides an objective means of comparison of the trends in mortality over time, between areas of a country and with other countries. More information on the methodology is given in **Section 4**.

### 3. Discussion of Results

### 3.1 The Scottish Picture

3.1.1 **Figure 1** shows that the expectation of life at birth in Scotland has improved over the last 20 years or so. It has increased from 69.3 years for males and 75.5 years for

females born in the period 1981-1983 to 74.8 years and 79.7 years respectively for those born in 2005-2007, an increase of 5.5 years and 4.2 years respectively.

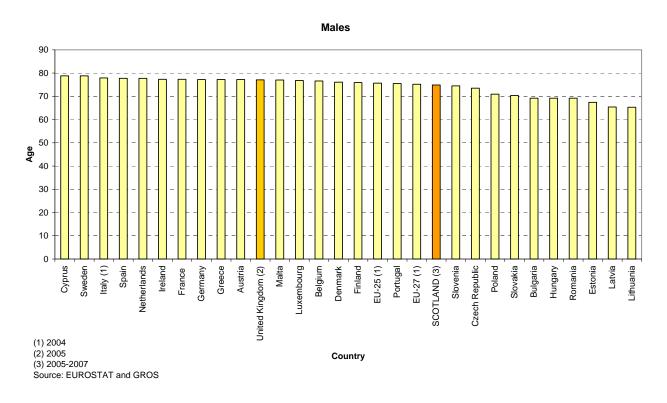

3.1.2 **Figure 1** also shows that the gap between males and females is slowly closing, dropping from 6.2 years in 1981-1983 to 4.9 years in 2005-2007.

3.1.3 Alternative, but very similar, results for Scotland are also produced by the Office for National Statistics (ONS) using single years of age rather than grouped years. For more details see **Section 4.1**.

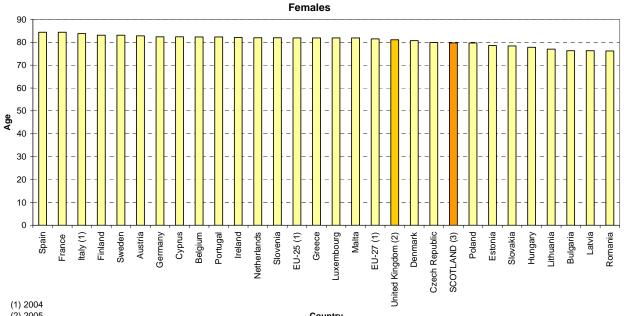

3.1.4 **Figure 2** shows that Scottish men and women have among the lowest expectation of life at birth in the EU-27<sup>1</sup>. The countries with lower life expectancy than Scotland were most of the Eastern European states which joined the EU on 1 May 2004 and 1 January 2007. For Scottish males, expectation of life is 0.4 years lower than the EU average. For females, life expectancy is almost 2 years lower. For both sexes, the expectation of life is between 4 to 5 years lower than the countries with the highest expectation of life.

3.1.5 The average life expectancy at birth for the whole of the UK is 77.1 years for men and 81.1 years for women. Only 3 Scottish council areas have higher male life expectancy than the UK average - East Renfrewshire, Aberdeenshire and East Dunbartonshire. For females, the same 3 council areas plus Perth & Kinross, Orkney Islands and Shetland Islands have higher life expectancy than the UK average.

<sup>&</sup>lt;sup>1</sup> EU-27 is an abbreviation for the European Union with 27 Member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxemburg, Malta, Netherlands, Poland, Portugal, Slovenia, Slovakia, Spain, Sweden and United Kingdom. In January 2007 Bulgaria and Romania also became Member States of the European Union.

Country

### 3.2 Life Expectancy at Birth, 2005-2007

3.2.1 **Table 1**, **Table 2** and **Table 3** show life expectancy at birth in Scotland for 2005-2007 for council and NHS board areas.

3.2.2 For males, the council area with the lowest figure was Glasgow City (70.8 years). The council area with the highest life expectancy was East Dunbartonshire (78.0 years), 7.2 years more than Glasgow City.

3.2.3 Shetland has the highest life expectancy for females (82.6 years), 5.5 years more than Glasgow City, the area with the lowest figure (77.1 years).

3.2.4 Of the NHS board areas, the lowest figure for both males and females was for Greater Glasgow & Clyde (72.7 and 78.5 years respectively). The NHS board area with the highest male life expectancy was Borders (76.6 years) and the highest female life expectancy was Shetland (82.6 years).

3.2.5 **Table 4** and **Table 5** show expectation of life at an "exact age". This is the average number of years that those at this age will live thereafter. These extracts from period life tables are constructed from the estimated population in 2005, 2006 and 2007 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2005-2007. The column headed  $e_x^{\circ}$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2005-2007 mortality probabilities from age x onwards. For example, on this basis a male aged 80 living in Glasgow City could expect to live on average another 6.9 years, whereas a female aged 80 could expect to live on average another 8.4 years.

#### 3.3 Life Expectancy at age 65, 2005-2007

3.3.1 **Table 6** shows life expectancy at age 65 for Scotland and its administrative areas and has been ranked for ease of presentation. This shows that males aged 65 could expect to live a further 16.1 years and females a further 18.8 years if mortality rates remain the same as they were in the period 2005-2007.

3.3.2 For males and females the council area with the lowest figure was Glasgow City (13.8 years and 17.4 years respectively). The council area with the highest life expectancy at age 65 for both males and females was Shetland (18.4 years and 21.0 years respectively), 4.6 years for males and 3.6 for females years more than Glasgow City.

3.3.3 For males and females the NHS board area with the lowest figure was Greater Glasgow & Clyde (14.9 years and 18.0 years respectively). The NHS board area with the highest life expectancy at age 65 for males and females was Shetland (18.4 years and 21.0 years respectively), 3.5 years for males and 3.0 years for females more than Greater Glasgow & Clyde.

#### 3.4 Accuracy of Results

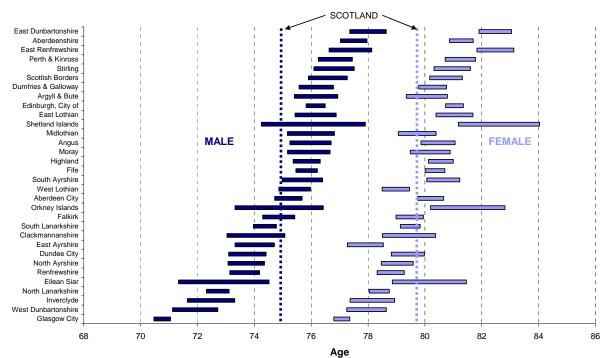

3.4.1 Life expectancy at birth, like most statistics, is an estimate which is subject to a margin of error. The accuracy of the results can be indicated by calculating a confidence interval which provides a range of values within which the true underlying life expectancy would lie (with 95% probability).

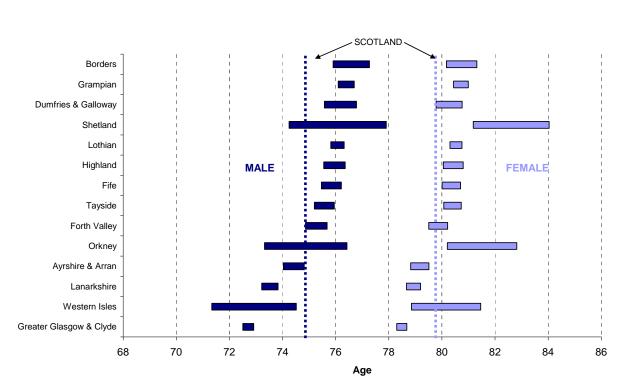

3.4.2 The 95% confidence intervals for life expectancy at birth and at age 65 are given in **Table 7** and **Table 8**, and are illustrated in **Figure 3**, **Figure 4**, **Figure 5** and **Figure 6** for council and NHS board areas within Scotland.

3.4.3 There is no simple "rule of thumb" for the size of confidence intervals, although it largely depends upon the size of the population, and so confidence intervals for areas with small populations tend to be wider. It is also worth noting that life expectancy results in these areas can be affected by the random variation in the annual number of deaths. This means that the results can be erratic and vary from period to period. For example, in **table 1**, **table 2** and **table 3**, changes in rank may be due to random variation from year to year in the population and number of deaths (particularly in the smaller areas such as Orkney and Shetland) as opposed to a real change in the number of years one can expect to live.

3.4.4 More information about the methods used to calculate the standard errors and confidence intervals used in this report can be found in the ONS methodology paper "Life expectancy at birth: methodological options for small populations". See **Section 4.2.3** for how to access this report.

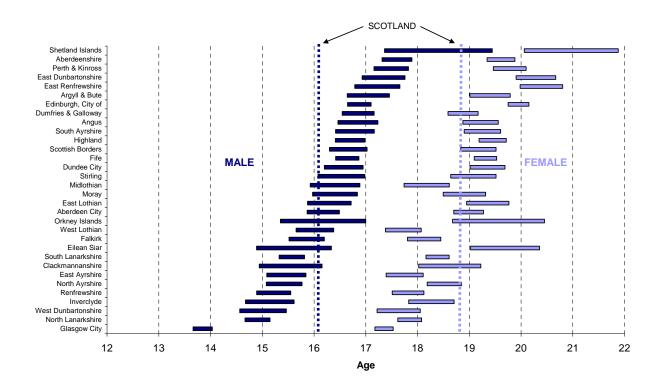

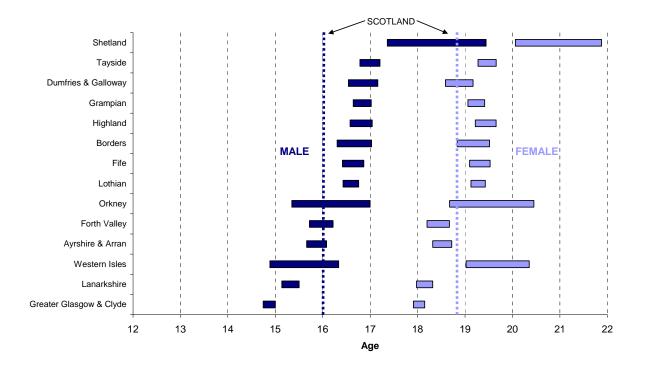

## Figure 4 Life expectancy at birth, 95% confidence intervals for NHS board areas, 2005-2007 (Males & Females)

Figure 5 Life expectancy at age 65, 95% confidence intervals for council areas, 2005-2007 (Males & Females)

## Figure 6 Life expectancy at age 65, 95% confidence intervals for NHS board areas, 2005-2007 (Males & Females)

#### 3.5 Comparisons between 1995-1997 and 2005-2007

3.5.1 Life expectancy at birth in Scotland has increased between 1995-1997 and 2005-2007, from 72.3 years to 74.8 years for males, and from 77.9 years to 79.7 years for females. **Table 1, Table 2** and **Table 3** also show the highest and lowest ranking council and NHS board area for both periods. The tables show the gap between males and females is closing, from 5.6 years in 1995-1997 to 4.9 years in 2005-2007. For council areas, the gap between highest and lowest areas for male life expectancy at birth has decreased by 0.3 years – from 7.5 years in 1995-1997 to 7.2 years in 2005-2007. For females, the gap has increased (from 4.8 years in 1995-1997 to 5.5 years in 2005-2007).

3.5.2 The maps in **Figure 7a** and **Figure 7b** and the charts in **Figure 7c** show the percentage change in life expectancy over the 10 year period for council areas. For males, the Shetland Islands had the largest increase with 5.5 per cent (4.0 years) and Clackmannanshire the lowest with 1.9 per cent (1.4 years). For females, East Dunbartonshire had the largest increase with 4.2 per cent (3.4 years) and East Ayrshire the lowest with 0.7 per cent (0.5 years).

3.5.3 The maps in **Figure 8a** and **Figure 8b** and the charts in **Figure 8c** show similar information for NHS board areas. For males, Shetland had the largest increase with 5.5 per cent (4.0 years) and Orkney the lowest with 2.0 per cent (1.4 years). For females, Shetland had the largest increase with 3.2 per cent (2.5 years) and Grampian and Dumfries & Galloway the lowest with 1.5 per cent (1.2 years).

3.5.4 Over the 10 year period, the ranking of many council and NHS boards has changed (**Table 1, Table 2** and **Table 3**). For males, Shetland council area has risen 13 places to 11<sup>th</sup> while Orkney and Angus have fallen 8 places to 20<sup>th</sup> and 13<sup>th</sup> respectively. East Dunbartonshire has replaced East Renfrewshire as the council area ranked number 1 for male life expectancy. For females, South Ayrshire and Stirling have risen 9 places to 11<sup>th</sup>

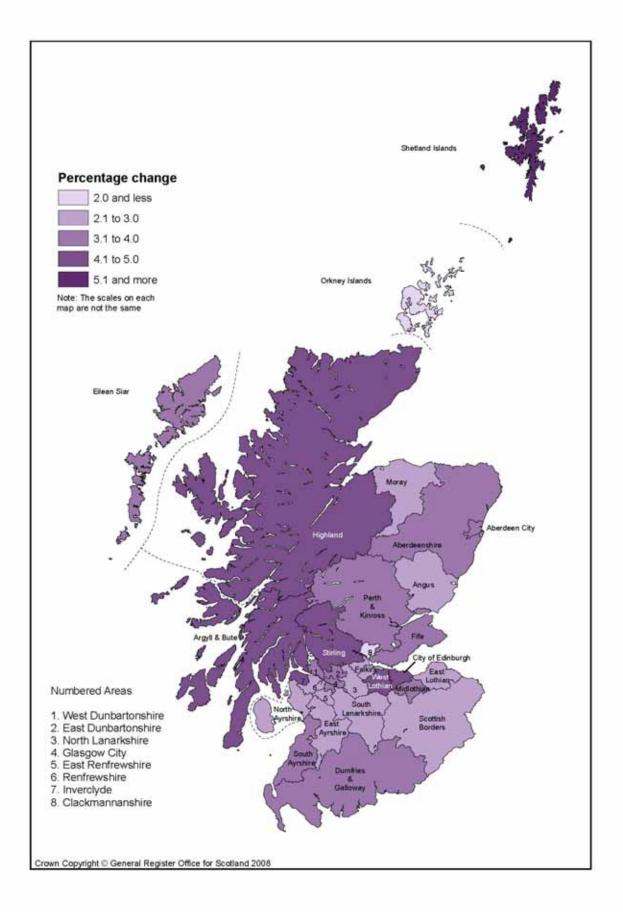

and 9<sup>th</sup> respectively, while Moray has fallen 13 places to 17<sup>th</sup>. Shetland has replaced Aberdeenshire as the council area ranked number 1 for female life expectancy.

3.5.5 Of the NHS boards, Shetland has risen 7 places to 4<sup>th</sup> and Orkney has fallen 6 places to 10<sup>th</sup> for males. For females, Lothian has risen 5 places to 5<sup>th</sup> and Dumfries & Galloway has fallen 4 places to 9<sup>th</sup>. Borders remains at rank 1 for male life expectancy as does Shetland for female life expectancy.

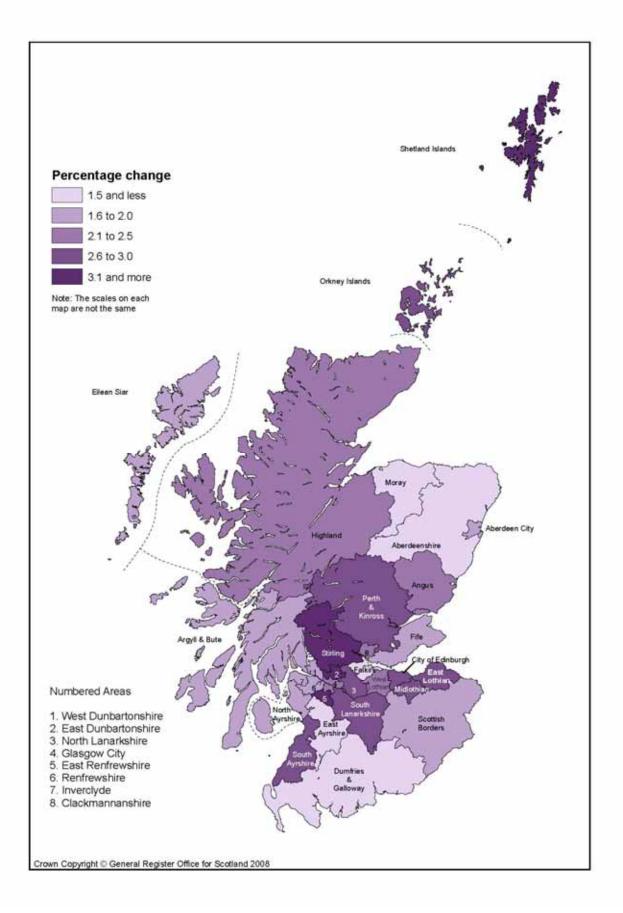

3.5.6 When confidence intervals for the results are taken into account, the rise and fall of the rankings over time are not exact, especially for areas with relatively small populations such as Orkney and Shetland. Confidence intervals for 1995-1997 are not presented here, but male and female figures are available from the Office for National Statistics (ONS) website through the following link:

http://www.statistics.gov.uk/downloads/theme\_population/LE\_Scotland\_2007.xls

### 4. Further information

### 4.1 National Life Expectancy at Birth

4.1.1 The Office for National Statistics (ONS) produces national life tables for the UK and constituent countries, which give statistics on period expectation of life. Responsibility for the production of national life expectancy figures transferred to ONS from the Government Actuary's Department (GAD) on 31 January 2006.

4.1.2 Every ten years a set of graduated (smoothed) life tables for Scotland is published. In addition, each year ungraduated interim life tables are produced for Scotland based on data for a period of three consecutive calendar years. The latter is available for 1980-1982 to 2004-2006 from the National Statistics website:

#### http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=14459&Pos=&ColRank=1&Rank= 422

4.1.3 Because of the differences between complete (single year of age) and abridged (grouped years) life tables, the abridged Scotland level figures presented in this report may differ slightly from those published by ONS, which are complete. A detailed description of the standard methods and notation associated with the calculation of life expectancy by ONS can be found within the Interim Life Table files on the National Statistics website.

4.1.4 Period life expectancies are worked out using the age-specific mortality rates for a given period (either a single year, or a run of years), with no allowance for any later actual or projected changes in mortality. Cohort life expectancies are worked out using age-specific mortality rates which allow for known or projected changes in mortality in later years. Period and cohort life expectancies using the 2006-based population projections mortality assumptions can be accessed from the ONS website at:

http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=15098

4.1.5 ONS intends to publish Scotland-level ungraduated interim life tables for 2005-2007 in October 2008. Provisional figures for 2005-2007 are available in the Life Expectancy pages of the GROS website, within the 'Life Expectancy at Scotland Level' section:

http://www.gro-scotland.gov.uk/statistics/publications-and-data/life-expectancy/index.html

### 4.2 Life Expectancy for Scottish Administrative Areas

4.2.1 Previous publications dedicated to life expectancy produced by GROS are available from our website (now including life expectancy figures for special areas (Urban/Rural, Deprivation, and Community Health Partnership) within Scotland):

http://www.gro-scotland.gov.uk/statistics/publications-and-data/life-expectancy/index.html

4.2.2 Life expectancy with 95% confidence intervals for Scottish council and NHS board areas from 1991-1993 to 2004-2006 is available on the National Statistics website, published on 15 September 2007, through the following link:

http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=8841&Pos=&ColRank=1&Rank=2 72

This webpage also contains life expectancy results for local and health authorities in England, Wales and Northern Ireland. Earlier life expectancy figures for Scottish council and NHS board areas, back to 1981-1983 are available on the GROS website in the form of abridged life tables, through the following link:

http://www.gro-scotland.gov.uk/statistics/publications-and-data/life-expectancy/le2003-05/detailed-tables-council-areas.html

4.2.3 A report which details the research undertaken by ONS to compare methodologies for calculating of life expectancy figures and confidence intervals can also be found on the National Statistics website:

http://www.statistics.gov.uk/downloads/theme\_other/GSSMethodology\_No\_33.pdf

#### 4.3 Healthy Life Expectancy

4.3.1 Healthy life expectancy (HLE) is defined as the number of years people can expect to live in good health. The difference between life expectancy and HLE indicates the length of time people can expect to spend in poor health. Information on HLE was first published in March 2004 by the Information and Statistics Division (ISD) of the NHS in Scotland. In June 2008, ISD published HLE estimates by NHS board and community health partnership area, as part of the Scottish Health and Wellbeing Profiles. These data and further information on HLE are available on the Scottish Public Health Observatory (ScotPHO) website at:

http://www.scotpho.org.uk/hle

### 4.4 Other data available from the General Register Office for Scotland

4.4.1 Estimates of the resident population of Scotland are prepared by GROS each year. These are available by sex and single year of age for council and NHS board areas, together with historical data. Information is also available on a wide range of related topics such as small area population estimates, population projections, migration estimates and data from the 2001 and earlier Censuses. For further information please contact:

Statistics Customer Services General Register Office for Scotland, Ladywell House, EDINBURGH, EH12 7TF. Telephone: 0131 314 4299 Fax: 0131 314 4696 Email: <u>customer@gro-scotland.gsi.gov.uk</u>

#### 5. Notes and Definitions

5.1 Following the dissolution of Argyll & Clyde NHS Board on 31<sup>st</sup> March 2006, its area has been split between Greater Glasgow and Highland NHS Boards and the former has been renamed Greater Glasgow and Clyde.

5.2 The composition of the NHS Board areas in terms of Council areas is summarised in the table below.

NHS Board area	Council area
Ayrshire & Arran	East Ayrshire, North Ayrshire, South Ayrshire
Borders	Scottish Borders
Dumfries & Galloway	Dumfries & Galloway
Fife	Fife (part)
Forth Valley	Clackmannanshire, Falkirk (part), Stirling (part), Perth & Kinross
-	(part)
Grampian	Aberdeen City, Aberdeenshire, Moray
Greater Glasgow &	East Dunbartonshire, East Renfrewshire, Glasgow City,
Clyde <sup>1</sup>	Inverclyde, North Lanarkshire (part), Renfrewshire, South
-	Lanarkshire (part), Stirling (part), West Dunbartonshire
Highland <sup>1</sup>	Argyll & Bute, Highland
Lanarkshire	North Lanarkshire (part), South Lanarkshire (part), West Lothian
	(part), Falkirk (part)
Lothian	East Lothian, City of Edinburgh, Midlothian, West Lothian (part),
	Falkirk (part)
Orkney	Orkney Islands
Shetland	Shetland Islands
Tayside	Angus, Dundee City, Perth & Kinross (part), Fife (part)
Western Isles	Eilean Siar
<sup>1</sup> New Board areas includ	ing parts of former Argyll & Clyde NHS board.

		1995-97			Difference	%
	Years	Years	Rank	Rank	in years	difference
Scotland Council areas	77.4	75.2	-	-	2.2	2.9
Aberdeen City	77.7	76.0	19	13	1.8	2.3

Note : This abridged life table is constructed from the estimated population in 2005, 2006 and 2007 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2005-2007. Column  $e_x^{\circ}$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2005-2007 mortality probabilities from age x onwards.

Note : This abridged life table is constructed from the estimated population in 2005, 2006 and 2007 and the total number of deaths registered in these years. The column headed  $I_x$  shows the numbers who would survive to the exact age of x, out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 2005-2007. Column  $e_x^{\circ}$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly x who are subject to the 2005-2007 mortality probabilities from age x onwards.

## Table 8 Life expectancy at age 65 in Scotland 2005-07 by administrative area, with95% upper and lower confidence intervals (All People, Males and Females)

#### 6. Notes on Statistical Publications

**ENQUIRIES ABOUT THIS PUBLICATION** Enquiries should be addressed to: Statistics Customer Services, General Register Office for Scotland, Ladywell House, Edinburgh, EH12 7TF Telephone: (0131) 314 4299, Fax: (0131) 314 4696, E-mail: <u>customer@gro-scotland.gsi.gov.uk</u>.

**NATIONAL STATISTICS** This is a National Statistics publication. It has been produced to high professional standards set out in the National Statistics Code of Practice and Release Practice Protocol (<u>www.statistics.gov.uk/about\_ns/cop/default.asp</u>). These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

**THE GENERAL REGISTER OFFICE FOR SCOTLAND (GROS)** GROS is the devolved Government department in Scotland responsible for the registration of births, marriages, civil partnerships, deaths, divorces and adoptions in Scotland. We are responsible for the Census of Population in Scotland which we use, with other sources of information, to produce population and household statistics. We make available important information for family history. Our website is <u>www.gro-scotland.gov.uk/</u>.

**OTHER GROS STATISTICS** Further detailed statistics produced by GROS are available from the statistics pages of the GROS website (<u>www.gro-scotland.gov.uk/statistics/index.html</u>). Statistics from the 2001 Census are on the Scotland's Census Results On-Line website (<u>www.scrol.gov.uk</u>) and on the Census section of the main website (<u>www.gro-scotland.gov.uk/census/index.html</u>).

Information about future publications is provided on the GROS website (<u>www.gro-scotland.gov.uk/futurepb.html</u>). If you would like to receive notification of forthcoming statistical publications, you can register your interest on The Scottish Government's ScotStat web site at <u>www.scotland.gov.uk/Topics/Statistics/scotstat/Intro</u>.

**COMPLAINTS AND SUGGESTIONS** If you are not satisfied with our service, please write to Kirsty MacLachlan, Head of Demography Division, Room 1/2/7, Ladywell House, Ladywell Road, Edinburgh, EH12 7TF, Telephone: (0131) 314 4242, E-mail: <u>kirsty.maclachlan@gro-scotland.gsi.gov.uk</u>.

We also welcome any comments or suggestions that would help us to improve our standards of service. **RELATED ORGANISATIONS**
