General Details

Dataset Title: In, out and net migration between NHS Board areas and rest of UK by sex, 1995/96 to most recent
Time Period of Dataset: 1995/96 to latest
Geographic Coverage: Scottish NHS Board areas
Supplier: National Records of Scotland (NRS)
Department: Demography Division, Population and Migration Statistics Branch

Methodology:

The migration estimates are those associated with the mid-year population estimates. However the figures for 2006/07 to 2009/10 differ from those shown in table 5 of the mid-year population estimates publication. The reason for this is that the migration figures between Scotland and the Rest of the UK shown in table 5 of the publication include people moving to and from the armed forces whereas the figures shown here do not.

The estimates are taken from the National Health Service Central Register (NHSCR).

It is assumed that migrants don't re-register with a new GP immediately on moving and so the data is lagged to account for this.

From 1 April 2006 responsibility for NHS Argyll & Clyde was split between NHS Greater Glasgow (now known as Greater Glasgow and Clyde) and NHS Highland. The tables on this website generally show the old NHS Board areas. This is because it is often not possible to create the same data for the new NHS Board areas using the available data.

For more information on how population and migration estimates are produced go to the methodology sections within the migration and population areas of this website. Some commentary can be found in the mid-year estimates and the Annual Review of Demographic Trends publications for the relevant years.

Note:

The mid-year population estimates and migration estimates for 2002 to 2010 are scheduled for revision following the 2011 Census and are to be published in December 2013.

Footnotes

1) This table shows the pre-2006 NHS Board areas. (For more information refer to the metadata tab or the methodology section on the National Records of Scotland website.)

2) The Scotland total figure shown here for 1997/98 is not consistent with that shown in other tables. This is because the figure shown here was later revised. However the associated NHS Board area figures were not revised. The figure shown here is the unrevised figure which is the sum of the individual NHS Board figures.

Footnotes

1) This table shows the pre-2006 NHS Board areas. For more information refer to the metadata tab or the migration methodology section of the National Records of Scotland website.

2) The Scotland total figure shown here for 1997/98 is not consistent with that shown in other tables. This is because the figure shown here was later revised. However the associated NHS Board area figures were not revised. The figure shown here is the unrevised figure which is the sum of the individual NHS Board areas.

Footnotes

1) This table shows the pre-2006 NHS Board areas. For more information refer to the metadata tab or the migration methodology section of the National Records of Scotland website.

2) The Scotland total figure shown here for 1997/98 is not consistent with that shown in other tables. This is because the figure shown here was later revised. However the associated NHS Board area figures were not revised. The figure shown here is the unrevised figure which is the sum of the individual NHS Board areas.
