General Details

Dataset Title:	In, out and net migration to and from Council areas by sex, 2001/02 to most recent
Time Period of Dataset:	2001/02 to latest
Geographic Coverage:	Council areas
Supplier:	National Records of Scotland (NRS)
Department:	Demography Division, Population and Migration Statistics Branch

Methodology:

The migration estimates are those associated with the mid-year population estimates for 2001-latest.

For more information on how population and migration estimates are produced go to the methodology sections within the migration and population areas of the National Records of Scotland website.

Some commentary can be found in the mid-year estimates and the Annual Review of Demographic Trends publications for the relevant years.

Note:

Scotland level figures cannot be derived by adding together the figures for individual councils. This is because council level figures include moves within Scotland.

Figures exclude the adjustment for unmeasured migration used in the 2001 to 2006 population estimates. Asylum seekers are also excluded.

The mid-year population estimates and migration estimates for 2002 to 2010 are scheduled for revision following the 2011 Census and are to be published in December 2013.
