## Abridged life table, by sex, age and council area, Scotland 1990-92 (continued)

Note : This abridged life table is constructed from the estimated population in 1990, 1991 and 1992 and the total number of deaths registered in these years. The column headed  $l_x$  shows the numbers who would survive to the exact age of  $x$ , out of 100,000 persons who, from birth, were subject to the mortality probabilities indicated by the death records for 1990-1992. Column  $e_x^o$  shows the expectation of life, that is, the average number of years of life left to persons aged exactly  $x$  who are subject to the 1990-1992 mortality probabilities from age  $x$  onwards.
