

P7 General health Percentage not as on form

- Value inserted
- Value imputed
- Person imputed by ONC

General Health	Numbers				Percentages		
	Total	Value inserted	Value imputed	Person imputed by ONC	Value inserted	Value imputed	Person imputed by ONC
All persons	5,062,011	121,490	56,934	198,987	2.40	1.12	3.93
Good	3,437,696	121,490	36,153	142,654	3.53	1.05	4.15
Fairly Good	1,110,453	0	14,377	38,802	0.00	1.29	3.49
Not Good	513,862	0	6,404	17,531	0.00	1.25	3.41

When a value for health was missing on the form, one ('Good') was automatically inserted depending on information available on whether the person was in work or not. This process affected 2.4 percent of all persons and 3.5 percent of people with 'Good' health.

A value was imputed from a donor in 1.1 percent of cases with a slight tendency towards the 'Fairly good' and 'Not good' categories.

Turning to imputation of person records by the ONC process, 4.2 percent of those with 'Good' health were added in this way, with lower than average rates for the 'Fairly good' and 'Not good' categories
