1. Average annual change is the result of dividing the absolute change (before rounding) by the number of years referred to.

2. Private household population: The population living in private households, i.e. people not living in communal establishments.

3. Average household size is the result of dividing "private household population" by "all households"

Note: Not all figures will sum due to rounding

These figures were revised slightly in November 2009. For more information see the page
