

| About this publication | Description |
|--|--|
| Publication title | UK Parliamentary Constituency Population Estimates |
| Description | UK Parliamentary Constituency (UKPC) Population Estimates in Scotland, broken down by single year of age and sex. |
| Theme | Population and Migration |
| Topic | Special area population estimates |
| Format | Excel workbooks and Comma Separated Value (CSV) files |
| Data source(s) | Populations for UKPCs are based on Small Area Population (SAPE) estimates where each 2011 Data Zone has been assigned to a particular UKPC. |
| Date that data is acquired | On finalisation of small area population estimates at data zone level each year, normally in July. |
| Publication Release date | 24 August 2017 |
| Frequency | Annual |
| Timeframe of data and timeliness | The estimates refer to the population as at 30 June each year. The UKPC population estimates are published 14 months from this date. |
| Continuity of data | The population estimates for UKPCs in Scotland are available for each year from 2002 up to 2014 for 2001 Data Zones, and from 2011 onwards for 2011 Data Zones. |
| Revisions statement | Revisions and corrections to previously published statistics are dealt with in accordance with the Scottish Government Statistician Group corporate policy statement on revisions and corrections - a copy of which is available on the Scottish Government website. |
| Concepts and definitions | <p>Background information on the UK Parliamentary Constituencies can be found on the Office for National Statistics website.</p> <p>Further information on the metadata can be found in the 'About this Publication' document within the latest Small Area Population Estimates publication on the National Records of Scotland (NRS) website.</p> |
| Relevance and key uses of the statistics | UK parliamentary constituencies are the areas used to elect Members of Parliament (MPs) to the House of Commons, which is the primary legislative chamber of the UK and is located in Westminster, London. The UKPC population estimates allow MPs to monitor for example population change within their constituencies. |

| | |
|------------------------------------|--|
| Accuracy | Using Non-Standard Geographies data compiled from the 2011 Census to quality assure the data, it has been shown that this method provides a good estimate for 57 (out of 59) UKPCs. The estimates for the remaining 2 UKPCs (Glasgow North West and Glasgow North) have been adjusted to account for a boundary problem. |
| Completeness: | The estimated population of an area includes all those usually resident there, whatever their nationality. Students are treated as being resident at their term-time address. Members of UK and non-UK armed forces stationed in Scotland are included; UK forces stationed outside Scotland are excluded. Short-term international migrants are excluded. |
| Comparability | Time-series comparisons are appropriate. |
| Accessibility | It is the policy of the National Records of Scotland (NRS) to make its website and products accessible according to published guidelines. More information is available in the Accessibility section of the NRS website. |
| Coherence and clarity | The statistics are provided in Excel and CSV format. They are designed to be consistent, and incorporate comparable historical data where appropriate. |
| Value type and unit of measure | Counts of males and females by single-year of age |
| Official Statistics designation | These statistics were assessed by the UK Statistics Authority and are designated as National Statistics subject to meeting the requirements set out in the assessment report. |
| UK Statistics Authority Assessment | These statistics were assessed by UK Statistics Authority as part of the Small Area Population Estimates (SAPE) in July 2015. The report can be found within the UK Statistic Authority - Assessments section on the UKSA website. |
