

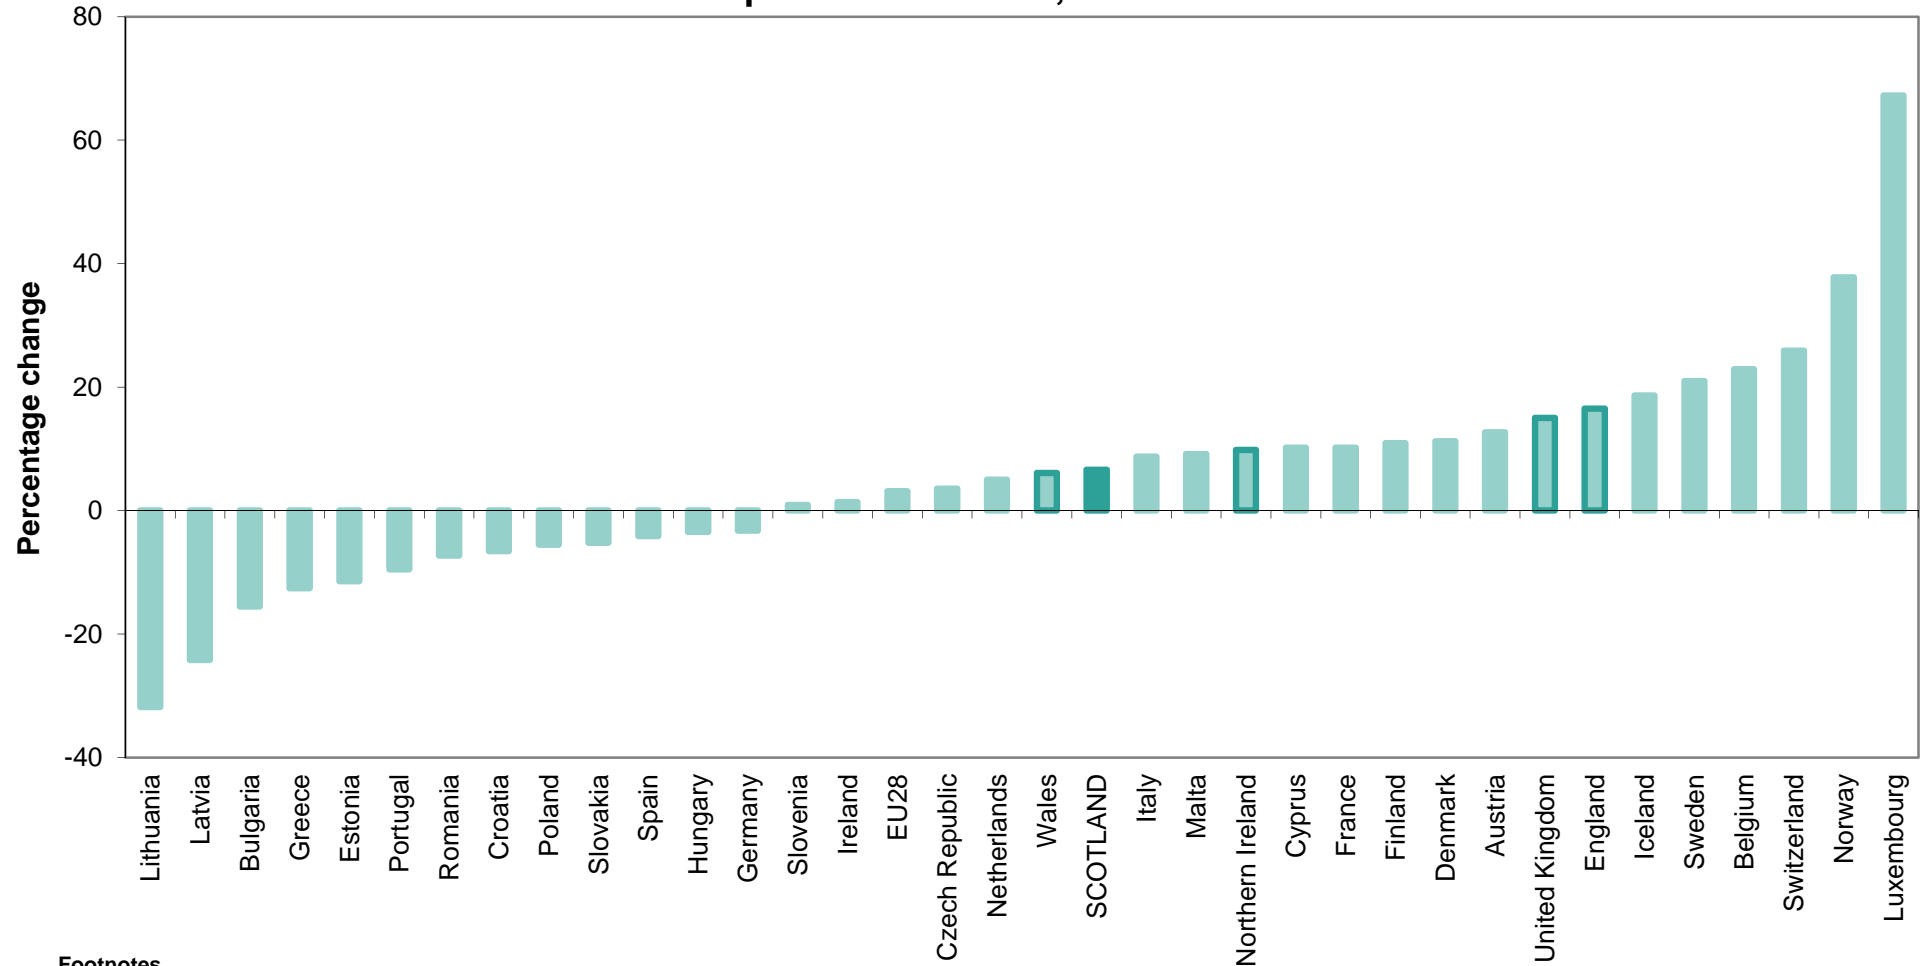

Figure 14: Projected percentage population change in selected European countries^{1,2}, 2014-2039

Footnotes

1) The Eurostat projections of population in selected European countries (2013-based) are not directly comparable to the Office for National Statistics (ONS) projections of population in the countries of the UK (2014-based). The Eurostat projections are based on estimates of the population at 1 January while the ONS projections are based on estimates of the population at 30 June. The methodologies in determining the underlying fertility, mortality and migration assumptions also differ.

2) More information on the Eurostat projections can be found on the Eurostat website.
