

**Table A2: Scenarios and assumptions for the 2014-based principal and seven variant projections for Scotland**

<b>Variant Type</b>	<b>Fertility</b>	<b>Life expectancy</b>	<b>Migration</b>
<b>Principal projection</b>	Principal	Principal	Principal
<b>Standard 'single component' variants</b>			
High fertility	High	Principal	Principal
Low fertility	Low	Principal	Principal
High life expectancy	Principal	High	Principal
Low life expectancy	Principal	Low	Principal
High migration	Principal	Principal	High
Low migration	Principal	Principal	Low
<b>Special case scenario</b>			
Zero migration	Principal	Principal	Zero

<b>Assumptions for 2039</b>		<b>Long-term fertility (TFR)</b>	<b>Life expectancy</b>		<b>Net migration (thousands)</b>
			<b>Males</b>	<b>Females</b>	
<b>Standard variants</b>	<b>High variant</b>	1.90	84.3	86.8	24.1
	<b>Principal</b>	1.70	82.3	85.0	15
	<b>Low variant</b>	1.50	80.2	83.1	5.9
<b>Special case scenario</b>	<b>Zero migration</b>	1.70	82.3	85.0	0
