

**Figure 4.3: Life expectancy at birth by council area with 95 per cent confidence intervals (CI)<sup>1</sup>, 2013-2015 (males and females)<sup>3</sup>**

**Footnotes**

1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95% probability).

2) The Scotland-level life expectancy estimates are for use only as a comparator for the corresponding sub-Scotland-level figures. The definitive Scotland-level life expectancy estimate (based on National Life Tables) is published by the Office for National Statistics.

3) Ordered by lowest to highest male life expectancy.
