

**Figure 4.5: Life Expectancy at birth by urban/rural<sup>2</sup> classification with 95% confidence intervals (CI)<sup>1</sup>, 2013-2015<sup>3</sup> (males and females)**

**Footnotes**

- 1) Life expectancy at birth is an estimate which is subject to a margin of error. The accuracy of results can be indicated by calculating a confidence interval which provides a range within which the true value underlying life expectancy would lie (with 95% probability).
- 2) Scottish Government's 6-fold Urban/Rural Classification version 2014.
- 3) The Scotland-level life expectancy estimates are for use only as a comparator for the corresponding sub-Scotland-level figures. The definitive Scotland-level life expectancy estimate (based on National Life Tables) is published by the Office for National Statistics.
