**Footnotes**

1) The ICD-9 codes used for dementia and Alzheimer's for the period before 2000 (290 and 331.0) aren't directly comparable with the ICD-10 codes used from 2000 onwards (F01, F03, G30). Care should be taken when interpreting the trend over this period.

2) Affected by the change in coding rules between 2010 and 2011 - refer to the notes on the page which lists all the Section 6 tables.
