

**Table 2c: Census White/non-White by Death Registration White/non-White - for the types of case for which the comparison should be the most reliable - sum of the values shown in Table 2b**

Death registration records for 2012 to 2014, inclusive, for which all of the following conditions apply

(a) high quality of match of Death Registration data to Population Spine

(b) high quality of match of census data to Population Spine

(c) ethnicity information was obtained from the census (without imputation)

(d) the death was registered by the deceased's spouse/partner, parent, child or sibling

	Death Registration ethnicity				Total 'Not provided' to 'non-White'	Number not counted because of 'suppression' of values of 1, 2 or 3
	All	Not provided	White	non-White*		
All Death Registrations satisfying the above criteria	100,760	3,294	97,127	331	100,752	8
<b>Census ethnicity</b>						
White	100,220	3,226	96,950	12	100,188	32
non-White <sup>1</sup>	539	62	141	265	468	71
Total 'White' + 'non-White'	100,759	3,288	97,091	277	100,656	
Number not counted because of 'suppression' of values of 1, 2 or 3 in Table 2	1	6	36	54		103 96

**Footnote**

1) 'non-White' includes "Mixed or Multiple ethnic group" and 'Other ethnic group'.

These figures were produced by adding up the numbers that appear in Table 2b, with values shown there as '.' counted as '0'. Therefore, some figures are slightly too small, because they do not include any contribution from values of 1, 2 or 3 that were shown as '.' in Table 2. The 'number not counted' row and column indicate the scale of the resulting under-counting.
