

## Monthly Data on Births and Deaths Registered in Scotland

### Notes

1. The information presented is based on the date of registration, not the date on which the event occurred. This is consistent with all routine data published by the National Records of Scotland (NRS) for example in the [Registrar General's Annual Reports](#). Further information on date of registration versus date of occurrence is given on the [Monthly data on Births and Deaths](#) page of the NRS website.
2. The figures shown for the latest year (or two) will be provisional, pending the publication of the final figures for each calendar year in the following summer (for example the final figures for 2007 were published in summer 2008). All provisional data are shown in italics.
3. Further monthly data will be added, and previously-published monthly data may be revised, every month.
